Chapter III—Bureau of Entomology and Plant Quarantine

[B. E. P. Q. 503, Rev. 5]

PART 301—DOMESTIC QUARANTINE NOTICES

WHITE-FRINGED BEETLE; TREATMENTS AUTHORIZED

Introductory note. Further investigational work has shown that methyl bromide fumigation in partial vacuum can be applied at lower soil temperatures than heretofore authorized, for the destruction of larvae of the white-fringed beetles; also, that larvae of all species of white-fringed beetles can be included under the same treatment schedules. Dosage schedules for fumigation of nursery plants with soil balls not greater than 5 inches in diameter under normal atmospheric pressure have also been developed. Likewise fumigation schedules for produce have been developed. The administrative instructions in this circular, specifying the various authorized treatments, are therefore hereby revised.

All treatments apply to the various species of white-fringed beetles.

This circular supersedes all instructions in Circular B. E. P. Q. 503 and Supplement No. 1 revised.

§ 301.72-5c¹ *Administrative instructions; treatments authorized.* Pursuant to the authority conferred upon the Chief of the Bureau of Entomology and Plant Quarantine by paragraph (a) of § 301.72-5, Chapter III, Title 7, Code of Federal Regulations [Regulation 5 of Notice of Quarantine No. 72 on account of the white-fringed beetle], the following methods of treatment are hereby authorized effective March 27, 1944, when carried out under the supervision

of an authorized inspector of the United States Department of Agriculture.

(a) *Plants in pots or in soil balls—*
(1) *Methyl bromide fumigation at atmospheric pressures.* (i) Fumigation may be done with the dosage schedules prescribed below. The period of fumigation shall be 2 hours in all instances.

(ii) Such fumigation shall be applied only to plants in 6-inch pots or smaller, or with soil balls 5 inches or less in least diameter. The plants shall be placed on racks so that the gas mixture can have access to all sides of the pots or the soil balls.

(iii) The fumigation shall be done in a tight chamber with gastight doors. The chamber shall be of such construction so as to pass certain tests prescribed by the inspector in charge to his satisfaction.

(iv) The fumigant-air mixture shall be circulated in the fumigation chamber by means of a fan during the entire period of the treatment.

(v) The soil shall not be puddled or saturated and must be in a condition which in the judgment of the inspector is suitable for fumigation.

(2) *Methyl bromide fumigation under partial vacuum.* (i) Fumigation under partial vacuum equivalent to at least 24.5 inches of mercury may be done with dosage schedules as prescribed below. The vacuum shall be maintained during the entire period. The period of fumigation shall be 1½ hours in all instances.

Soil temperature at least ° F.:	Dosage per 1,000 cubic feet (pounds)

(ii) The soil masses shall not be more than 16 inches in least diameter.

(iii) The soil shall not be puddled or saturated and must be in a condition which in the judgment of the inspector is suitable for fumigation.

(iv) The fumigant-air mixture shall be circulated in the fumigation chamber by means of a fan the first 15 minutes of the exposure period to mix the vaporized fumigant thoroughly with the air in the chamber and to bring it in contact with the surface of the soil balls. The soil balls shall be washed with one or more changes of air at the end of the exposure period.

(v) A standard vacuum fumigation chamber that can be closed tight and will withstand an external pressure of at least one atmosphere is required. A vacuum pump of sufficient capacity to reduce the pressure within the vacuum chamber to the equivalent of 3 inches of mercury (a 27-inch vacuum at sea level) is not more than 20 minutes is necessary.

(3) *Methyl bromide solution*—(i) *Treatment method.* (Applicable to all regulated areas.) (a) The soil balls around the roots of plants must be buried in sand and plunged in boxes or trays which are watertight and approximately 1 foot deep.

(b) A 2-inch space filled with sand shall be provided between the soil balls, also above and beneath them.

(c) Such soil balls shall be treated with a solution of methyl bromide and alcohol at a concentration of 0.3 percent methyl bromide and 0.6 percent denatured ethyl alcohol by volume in water. The solution is to be prepared by first mixing the methyl bromide and alcohol together and then adding this mixture to the water and mixing thoroughly.

(d) The aqueous solution of methyl bromide and alcohol shall then be applied evenly over the surface of the sand around the plants at the rate of 40 gallons per 100 square feet of surface area by means of a sprinkling can or sprayer.

(ii) *Type of material, exposure, and temperature.* (a) In Orleans Parish, including the city of New Orleans, Saint Bernard Parish, and regulated parts of Jefferson and Plaquemines Parishes, La.,

the treatment shall be applied only to plants in soil balls not greater than 7 inches in diameter, nor greater than 7 inches in thickness when not spherical. After the required dosage has been applied, the soil balls shall remain embedded in the sand for a period of 8 hours. The temperature of the soil balls during the treatment shall not be lower than 65° F.

(b) In all regulated areas other than Orleans Parish, including the city of New Orleans, Saint Bernard Parish, and regulated parts of Jefferson and Plaquemines Parishes, La., the treatment shall be applied to soil balls not greater than 8 inches in diameter nor greater than 8 inches in thickness when not spherical. After the required dosage has been applied, the soil balls shall remain embedded in the sand for a period of 6 hours. The temperature of the soil balls during the treatment shall not be lower than 62° F.

(b) *Potting soil*—(1) *Carbon disulphide fumigation.* (i) Potting soil shall be treated in a container with carbon disulphide at a dosage of 2 pounds per cubic yard of soil for a period of 48 hours.

(ii) The grade of carbon disulphide shall be comparable to U. S. P. grade having a specific gravity of 1.25 at 68° F.

(iii) The container shall be tight, preferably lined with sheet metal, and shall have a tight cover or be covered with a tarpaulin immediately after the fumigant is applied. The container shall not be more than 36 inches deep.

(iv) The soil shall be friable, and wet soil shall not be treated by this method. The fumigant shall be applied to the soil in holes 3 inches deep, the dosage to be evenly divided among holes 1 foot apart over the surface of the soil, and the fumigant shall be covered with soil as soon as it is applied.

(v) The temperature of the soil shall not be lower than 40° F. during the entire time of treatment.

(vi) The condition of the soil and the apparatus used and the method of application of the fumigant must meet with the approval of an authorized inspector of the United States Department of Agriculture.

(2) *Methyl bromide fumigation.* (i) Potting soil must be treated in a container with methyl bromide at a dosage of 40 cubic centimeters of methyl bromide per cubic yard of soil for a period of 48 hours.

(ii) The sides, bottom, and seams of the container shall be tight, preferably lined with sheet metal, and shall have a tight cover or be covered with a tarpaulin immediately after the fumigant is applied.

(iii) The temperature of the soil shall not be lower than 40° F. during the entire time of treatment.

(iv) The condition of the soil and the apparatus used and the method of application of the fumigant must meet the approval of an authorized inspector of the United States Department of Agriculture.

(3) *Heat treatment.* (i) Live steam, under pressure of 80 pounds or more per square inch, shall be applied through a grid of perforated pipes at the bottom of the sterilizing box or truck body contain-

ing the soil, for a period of 45 minutes or until all parts of the load reach a temperature of 200° F.

(ii) The grids shall be constructed of 1-inch pipes, perforated with holes ½ inch in diameter on the upper side and connecting at one end to a manifold into which the steam is introduced.

(iii) The layer of soil in the sterilizing box shall not be more than 2 feet 6 inches deep.

(4) *Methyl bromide and carbon disulphide applied as liquid.* (See instructions in paragraph (c).)

(c) *Soil plots, plunging beds, and potting soil*—(1) *Methyl bromide.* (i) Inject the liquid methyl bromide into the soil at a depth of 6 inches by means of a hollow needle or other suitable injector at the rate of 4.7 milliliters per square foot or 7 milliliters per 1½ square feet of soil surface.

(ii) After treatment has been applied to the plot the soil should be covered with 10- or 15-pound building paper, lapped 4 inches and weighted down so that it will not be blown off.

(iii) The soil must be at a temperature not lower than 45° F. at a depth of 6 inches when the treatment is applied. At temperatures from 45° to 62° inclusive the soil must be kept covered for a period of 6 days to insure complete mortality of all eggs, larvae, pupae, and adults of the insect which may be present in the soil under treatment. At temperatures above 62° the soil must be kept so covered for a period of not less than 4 days.

(2) *Carbon disulphide.* (i) The insecticide shall be applied at the rate of 33 milliliters per square foot of soil surface, the liquid to be poured into holes at least 6 inches deep and 1-inch in diameter at the top, and covered immediately with earth.

(ii) After application the plot should be covered with 10- to 15-pound building paper which shall remain in position for at least 4 days in order to insure complete mortality of any eggs, larvae, pupae, or adults of white-fringed beetles that may be present.

(iii) The treatment shall not be applied to soil which is below 80° F. in temperature at a depth of 6 inches.

(d) *Vegetable produce (for larvae only)*—(1) *Methyl bromide fumigation at atmospheric pressure.* (i) Fumigation at atmospheric pressures may be done with dosage schedules as prescribed below. The period of fumigation shall be 2 hours in all instances.

Temperature of produce at least	Dosage per 1,000 cubic ft.	Dosage per refrigerator car	cc. (ml.) per cubic foot of volume
° F.	Pounds	Pounds	
56	4	10	1.044
62	3.6	9	0.940
68	3.2	8	0.835
74	2.8	7	0.731
80	2.4	6	0.626
86	2	5	0.522
92	1.6	4	0.418

(ii) The fumigation shall be performed in a refrigerator car, fumigation chamber, or other tight enclosure approved by the inspector in charge.

(iii) The dosage shall be volatilized into the enclosure and the fumigant-air mix-

ture shall be circulated by a blower or large fan for not less than 5 minutes.

(iv) These fumigation schedules should be applied only to produce affected by the presence of larval forms of the white-fringed beetles since they are known to be incompletely effective against eggs of this insect.

(e) *Disclaimer.* There has not been opportunity to test these treatments on all varieties of plants or produce and in authorizing the movement of potted plants, nursery stock, soil, or produce treated according to the requirements stated above, it is understood that no liability shall attach either to the United States Department of Agriculture or to any of its employees in the event of injury to plants, produce, or operators.

(f) *Caution—(1) Methyl bromide.* (i) Methyl bromide is a gas at ordinary temperatures. It is colorless and practically odorless in concentrations used for fumigation of plants or potting soil. It is a poison and the operators should use gas masks approved by the United States Bureau of Mines for use with methyl bromide, when exposed to the gas in concentrations used in fumigation, or while preparing the solution. The plants in the fumigation chamber should be well aerated by blowing air through them, and the room adequately ventilated before it is entered. After fumigating the potting soil by methyl bromide the cover should be removed and the soil allowed to become aerated.

(ii) The method for application of methyl bromide described in paragraph (c) provides a closed system in which the operator is not exposed to a dangerous concentration of the gas provided there is no leakage in any exposed portion of the equipment. Extreme care should be exercised to keep all joints of such apparatus tight and replace any defective parts to prevent accident. The operator should avoid getting any liquid methyl bromide on his clothing or his body at any time.

(2) *Carbon disulphide.* (i) The vapor of carbon disulphide is inflammable and explosive. At a temperature of 297° F. it may take fire spontaneously and in the presence of certain metals, particularly copper, it may ignite at considerably lower temperatures. It must be kept away from fire, and from hot objects, such as electric light bulbs, unprotected brush-type motors, steam pipes, etc. Lighted cigars, cigarettes, or pipes must never be brought near carbon disulphide.

(ii) Carbon disulphide is a blood poison, but poisoning by this chemical is rare. Exposure to the vapor may cause giddiness and headache. When these symptoms develop, the individual should get into the open air.

AUTHORITY: §§ 944.0 to 944.13, inclusive, issued under 48 Stat. 31, 670, 675; 49 Stat. 750; 50 Stat. 246; 7 U.S.C. 601 et seq.

§ 944.0 *Findings and determinations—(a) Findings.* Pursuant to Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act"), and the rules of practice and procedure covering the formulation of marketing agreements and milk orders (7 CFR, Cum. Supp., 900.1-900.17; 7 F.R. 3550; 8 F.R. 2815), a public hearing was held upon certain proposed amendments to the tentatively approved marketing agreement and to the order, as amended, regulating the handling of milk in the Quad Cities marketing area. Upon the basis of the evidence introduced in such hearing and the record thereof, it is hereby found that:

(1) The order regulating the handling of milk in the said marketing area, as amended and as hereby amended, and all of the terms and conditions of said order, as amended and as hereby amended, will tend to effectuate the declared policy of the act;

(2) The prices calculated to give milk produced for sale in the said marketing area a purchasing power equivalent to the purchasing power of such milk as determined pursuant to sections 2 and 8 (e) of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the said order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in the said tentatively approved marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that handlers of at least 50 percent of the volume of milk which is marketed within the said marketing area refused or failed to sign the tentatively

approved marketing agreement regulating the handling of milk in the said marketing area; and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign such tentatively approved marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order, as amended, is the only practical means pursuant to the declared policy of the act to advance the interests of the producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order is approved or favored by at least two-thirds of the producers who participated in a referendum on the question of the approval of the order, as amended, and who during the determined representative period, were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered that from and after the effective date hereof the handling of milk in the Quad Cities marketing area shall be in conformity to and in compliance with the terms and conditions of this order, as amended.

This definition shall include a cooperative association with respect to the milk of any producer which it causes to be delivered to a plant from which milk is disposed of as Class I milk in the marketing area, or which it causes to be diverted from a plant from which milk is disposed of as Class I milk in the marketing area to a plant from which no milk is disposed of as Class I milk in the marketing area.

(g) "Producer-handler" means any person who is both a producer and a handler and who receives no milk from other producers: *Provided*, That (1) the maintenance, care, and management of the dairy animals and other resources necessary to produce the milk is the personal enterprise of and at the personal risk of such person in his capacity as a producer, and (2) the processing, packaging, and distribution of the milk is the personal enterprise of and at the personal risk of such person in his capacity as a handler.

(j) "Market administrator" means the agency which is described in § 944.2 for the administration hereof.

(k) "Cooperative association" means any cooperative association which the War Food Administrator determines (1) to have its entire activities under the control of its members, and (2) to have and to be exercising full authority in the sale of milk of its members.

(l) "Emergency milk" means milk received by a handler pursuant to § 944.8 (b) from sources other than producers or other handlers.

§ 944.2 Market administrator — (a) Designation. The agency for the administration hereof shall be a market administrator who shall be a person selected by the War Food Administrator. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the War Food Administrator.

(b) **Powers.** The market administrator shall:

(1) Administer the terms and provisions hereof.

(2) Investigate and report to the War Food Administrator complaints of violation of the provisions hereof.

(3) Make rules and regulations to effectuate the terms and provisions hereof.

(c) **Duties.** The market administrator shall:

(1) Within 45 days following the date upon which he enters upon his duties, execute and deliver to the War Food Administrator a bond, conditioned upon the

faithful performance of his duties, in an amount and with surety thereon satisfactory to the War Food Administrator.

(2) Keep such books and records as will clearly reflect the transactions provided for herein, and surrender the same to his successor or to such other person as the War Food Administrator may designate.

(3) Submit his books and records to examination by the War Food Administrator at any and all times.

(4) Furnish such information and such verified reports as the War Food Administrator may request.

(5) Obtain a bond with reasonable security thereon covering each employee who handles funds entrusted to the market administrator.

(6) Publicly disclose to handlers and producers, unless otherwise directed by the War Food Administrator, the name of any person who, within 15 days after the date upon which he is required to perform such acts, has not (i) made reports pursuant to § 944.5 or (ii) made payments pursuant to § 944.8.

(7) Employ and fix the compensation of such persons as may be necessary to enable him to administer the terms and provisions hereof.

(8) Pay, out of the funds provided by § 944.11, (i) the cost of his bond and of the bonds of such of his employees as handle funds entrusted to the market administrator, (ii) his own compensation, and (iii) all other expenses necessarily incurred in the maintenance and functioning of his office.

(9) Promptly verify the information contained in reports submitted by handlers.

§ 944.3 Classification of milk — (a) Basis of classification. All milk or cream purchased or received by a handler or caused to be delivered by a cooperative association to a plant from which no milk is disposed of as Class I milk in the marketing area shall be reported by the handler and shall be classified by the market administrator in the classes set forth in (b) of this section: *Provided*, That (1) any milk of producers moving as milk to a plant of a nonhandler who disposes of fluid milk for consumption as milk shall be classified as Class I milk except for such milk in excess of the amount of fluid milk so disposed of by such nonhandler; (2) any milk of producers, other than milk classified as Class I milk pursuant to (1) of this paragraph, moving as milk or cream to a plant of a handler who disposes of fluid cream for consumption as cream shall be classified as Class II milk except for such milk or cream in excess of the amount of milk and cream disposed of by such handler as fluid cream; (3) any milk of producers, other than milk classified as Class I milk or as Class II milk pursuant to (1) and (2) of this paragraph, moving as milk or cream to a plant of a nonhandler, shall be classified in accordance with its utilization by such nonhandler, subject to verification by the market administrator; and (4) any milk moving as fluid milk from any handler's plant to a plant of another handler shall be classified as Class I milk, and any cream moving as

fluid cream to a plant of another handler shall be classified as Class II milk: *Provided*, That if such milk or cream was utilized in a lower classification, such milk or cream shall be classified accordingly, subject to verification by the market administrator.

(b) **Classes of utilization.** Subject to the conditions set forth in (a) of this section, the classes of utilization of milk shall be as follows:

(1) Class I milk shall be all milk disposed of in the form of milk and all milk not specifically accounted for as Class II milk, Class III milk, or Class IV milk.

(2) Class II milk shall be all milk disposed of as cream, for consumption as cream (including any cream product in fluid form containing 6 percent or more butterfat), buttermilk, cottage cheese, and all milk disposed of as chocolate milk or as any flavored milk drink.

(3) Class III milk shall be all milk specifically accounted for as used to produce evaporated milk, condensed milk, ice cream mix, unsalted butter, or any milk product other than those specified in Class II milk and Class IV milk.

(4) Class IV milk shall be all milk used to produce butter and American type Cheddar cheese and all milk accounted for as actual plant shrinkage: *Provided*, That such shrinkage shall not exceed 3 percent of the total receipts of milk from producers.

(c) **Responsibility of handlers in establishing the classification of milk.** In establishing the classification of milk as required in (b) of this section, the burden rests upon the handler who receives milk from producers to account for the milk and to prove to the market administrator that such milk should not be classified as Class I milk.

(d) **Computation of the milk in each class.** For each delivery period the market administrator shall compute, in the case of each handler, the amount of milk in each class as defined in (b) of this section as follows:

(1) Determine the total pounds of milk received from (i) producers; (ii) the handler's own farm production; (iii) other handlers; (iv) other sources; and (v) add together the resulting amounts.

(2) Determine the total pounds of butterfat received as follows: (i) multiply the weight of the milk received from producers by its average butterfat test; (ii) multiply the weight of milk received from handler's own farm production by its average butterfat test; (iii) multiply the weight of the milk received from other handlers by its average butterfat test; (iv) multiply the weight of the milk received from other sources by its average butterfat test; and (v) add together the resulting amounts.

(3) Determine the total pounds of milk in Class I as follows: (i) convert to pounds the total quantity of milk disposed of in the form of milk on the basis of 2.15 pounds per quart; (ii) multiply the results by the average butterfat test of such milk; and (iii) if the quantity of butterfat so computed when added to the pounds of butterfat in Class II milk, Class III milk, and Class IV milk computed pursuant to subparagraphs (4) (ii), (5) (ii),

and (6) (iv) of this paragraph is less than the total pounds of butterfat received, computed in accordance with subparagraph (2) of this paragraph, an amount equal to the difference shall be divided by 3.5 percent and added to the quantity of milk determined pursuant to subdivision (i) of this subparagraph.

(4) Determine the total pounds of milk in Class II as follows: (i) multiply the actual weight of each of the several products of Class II by its average butterfat test; (ii) add together the resulting amounts; and (iii) divide the result obtained in subdivision (ii) of this subparagraph by 3.5 percent.

(5) Determine the total pounds of milk in Class III as follows: (i) multiply the actual weight of each of the several products in Class III by its average butterfat test; (ii) add together the resulting amounts; and (iii) divide the result obtained in subdivision (ii) of this subparagraph by 3.5 percent.

(6) Determine the total pounds of milk in Class IV as follows: (i) multiply the actual weight of each of the several products of Class IV milk by its average butterfat test; (ii) add together the resulting amounts; (iii) subtract the total pounds of butterfat in Class I milk, Class II milk, and Class III milk, computed pursuant to subparagraph (3) (ii), (4) (ii), and (5) (ii) of this paragraph, and the total pounds of butterfat computed pursuant to subdivision (ii) of this paragraph from the total pounds of butterfat computed pursuant to subparagraph (2) of this paragraph, which resulting quantity shall be allowed as plant shrinkage for the purpose of this paragraph (but in no event shall such plant shrinkage allowance exceed 3 percent of the total receipts of butterfat from producers by the handler); (iv) add the result obtained in subdivision (iii) of this subparagraph (but not to exceed 3 percent of the total receipts of butterfat from producers by the handler), and the result obtained in subdivision (ii) of this subparagraph; and (v) divide the result obtained in subdivision (iv) of this subparagraph by 3.5 percent.

(7) Determine the classification of milk received from producers as follows: (i) subtract from the total pounds of milk in each class the total pounds of milk which were received from other handlers and used in such class; (ii) subtract from the remaining pounds of milk in each class the total pounds of milk which were received from sources other than producers and handlers and used in such class; (iii) subtract pro rata from the remaining pounds of milk in each class the total pounds of milk which were received from the handler's own farm production and emergency milk; and (iv) except as set forth in (e) of this section the result shall be known as the "net pooled milk" in each class.

(e) *Reconciliation of utilization of milk by classes with receipts of milk from producers.* In the event of a difference between the total quantity of milk utilized in the various classes as computed pursuant to paragraph (d) of this section and the quantity of milk received

from producers, except for excess milk or milk equivalent of butterfat pursuant to § 944.6 (d), such difference shall be reconciled as follows:

(1) If the total utilization of milk in the various classes for any handler as computed pursuant to paragraph (d) of this section, is less than the receipts of milk from producers, the market administrator shall increase the total pounds of milk in Class IV for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler, which result shall be known as the "net pooled milk" in Class IV.

(2) If the total utilization of milk in the various classes for any handler, as computed pursuant to paragraph (d) of this section, is greater than the receipts of milk from producers, the market administrator shall decrease the total pounds of milk in Class IV for such handler by an amount equal to the difference between the total utilization of milk by classes for such handler and the receipts of milk from producers, which result shall be known as the "net pooled milk" in Class IV.

(f) *Sales of a cooperative association to any other handler.* Milk caused to be delivered from a producer to any other handler by a cooperative association which is a handler shall be ratably apportioned among the receiving handler's total Class I milk, Class II milk, Class III milk, and Class IV milk.

§ 944.4 *Minimum prices.*—(a) *Class prices.* Each handler shall pay, at the time and in the manner set forth in § 944.8, not less than the prices set forth in this section per hundredweight of milk received during each delivery period at such handler's plant or caused by such handler to be delivered to a plant from which no milk is disposed of in the marketing area on the basis of milk of 3.5 percent butterfat content:

(1) For Class I milk, the price shall be the price for Class III milk for such delivery period plus 70 cents per hundredweight.

(2) For Class II milk, the price shall be the price for Class III milk for such delivery period plus 25 cents per hundredweight.

(3) For Class III milk, the price shall be the result of the following computation by the market administrator: determine the average of the basic or field prices per hundredweight ascertained to have been paid for milk of 3.5 percent butterfat content received during the period beginning with the 16th day of the previous month and ending with the 15th day of the then current month at the plants listed in this subparagraph: *Provided*, That if the price so determined is less than the price computed by the market administrator in accordance with the following formula, such formula price shall be the price of Class III milk for such delivery period: multiply by 0.4 the average weekly prevailing price per pound of the cheese known as "Twins" during said delivery period on the Wisconsin Cheese Exchange at Plymouth, Wisconsin (in the absence of such prices

the prevailing price of "Twins" at Chicago as reported by the United States Department of Agriculture (or such other Federal Agency as may hereafter be authorized to perform this price reporting function) shall be used], add the average wholesale price per pound of 92-score butter at Chicago for said delivery period as reported by the United States Department of Agriculture (or such other Federal Agency as may hereafter be authorized to perform this price reporting function) and multiply such result by 3.9.

(4) For Class IV milk, the price shall be the result of the following computation by the market administrator: multiply by 3.5 the average price per pound of 92-score butter at wholesale in the Chicago market as reported by the United States Department of Agriculture (or such other Federal Agency as may hereafter be authorized to perform this price reporting function) during the delivery period in which such milk was received, add 20 percent thereof and add any plus amount resulting from the following calculation:

Subtract 4 cents from the average price per pound of casein and multiply such result by 2.3. The price per pound of casein to be used shall be the average of the carlot prices for unground casein, f. o. b. manufacturing plants in Wisconsin, as published by the United States Department of Agriculture (or such other Federal Agency as may hereafter be authorized to perform this price reporting function) at Chicago, during the delivery period in which such milk was received, including in such average the quotations for any part of the previous delivery period which were not published and available for the price determination of such casein for the preceding delivery period.

(b) *Emergency price provisions.* (1) Whenever the War Food Administrator finds and announces that the Class I price computed for any delivery period pursuant to (a) of this section is not in the public interest, the Class I price for such delivery period shall be the same as the Class I price for the preceding delivery period: *Provided*, That if the War Food Administrator for two consecutive delivery periods finds and announces that the Class I price computed pursuant to (a) of this section is not in the public interest, he shall, upon request of interested parties, and pursuant to the applicable provisions of the act, issue notice of and opportunity for a hearing upon a proposed amendment to this section of the order.

(2) Whenever the provisions hereof require the market administrator to use a

specific price (or prices) for milk or any milk product for the purpose of determining class prices or for any other purpose, the market administrator shall add to the specified price the amount of any subsidy, or other similar payment being made by any Federal agency in connection with the milk or product, associated with the price specified: *Provided*, That if for any reason the price specified is not reported or published as indicated, the market administrator shall use the applicable maximum uniform price established by regulations of any Federal agency plus the amount of any subsidy or other similar payment: *Provided further*, That if the specified price is not reported or published and there is no applicable maximum uniform price, or if the specified price is not reported or published and the War Food Administrator determines that the market price is below the applicable maximum uniform price, the market administrator shall use a price determined by the War Food Administrator to be equivalent to or comparable with the prices specified.

(c) *Grade A premium.* In making payment for Class I milk and Class II milk which complies with the Grade A quality requirements of the Milk Ordinance of the City of Davenport, Iowa, and the minimum requirements adopted by the Davenport Board of Health for the interpretation and enforcement of such ordinance, or of the Grade A Milk and Grade A Milk Products Law of the State of Illinois, and the minimum requirements adopted by the Director of the Illinois Department of Public Health for the interpretation and enforcement of said act, there shall be added a premium of 20 cents per hundredweight to the prices set forth in (a) (1) and (2) of this section.

§ 944.5 *Reports of handlers*—(a) *Periodic reports.* (1) On or before the 5th day after the end of each delivery period each handler, with respect to all milk or milk products which were, during such delivery period, (i) received from producers, (ii) received from handlers, (iii) received from such handler's own production, (iv) received from any other source, or (v) caused to be delivered to a plant from which no milk is disposed of in the marketing area, shall report to the market administrator, in the detail and on forms prescribed by him, as follows:

(a) The receipts at each plant from producers who are not handlers;

(b) The receipts at each plant from any other handler, including any handler who is also a producer;

(c) The receipts at each plant from such handler's own production;

(d) The receipts at each plant from any other source;

(e) The respective quantities of milk and milk products disposed of or on hand; and

(f) The respective butterfat content of each of the above.

(2) On or before the 5th day after the end of each delivery period, the receipts at each plant of emergency milk as follows: (1) the amount of such milk and the average butterfat content thereof,

(ii) the date or dates upon which such milk was received during the delivery period, (iii) the plant from which such milk was shipped, (iv) the price paid or to be paid for such milk, (v) the utilization of such milk, and (vi) such other information with respect thereto as the market administrator may request.

(b) *Reports as to producers.* Each handler shall report to the market administrator within 10 days after the market administrator's request with respect to any producer and with respect to a period of time designated by the market administrator, (i) the name and address, (ii) the total pounds of milk received, (iii) the average butterfat test of milk received, and (iv) the number of days upon which milk was received.

(c) *Reports of payments to producers.* On or before the 20th day after the end of each delivery period each handler shall submit to the market administrator his producer pay roll for such delivery period, which shall show for each producer (i) the net amount of such producer's payment with the prices, deductions, and charges involved, and (ii) the total delivery of base milk and the total delivery of milk in excess of base milk with the average butterfat test thereof.

(d) *Reports of producer-handlers and handlers whose sole sources of supply are receipts from other handlers.* Producer-handlers and handlers whose sole sources of supply are receipts from other handlers shall report to the market administrator at such time and in such manner as the market administrator may request.

(e) *Verification of reports and payments.* The market administrator shall verify all reports and payments of each handler by audit of such handler's records and the records of any other handler or person upon whose disposition of milk such handler claims classification. Each handler shall keep adequate records of receipt and utilization of milk and shall, during the usual hours of business, make available to the market administrator or his representative such records and facilities as will enable the market administrator to:

(1) Verify the receipts and disposition of all milk required to be reported pursuant to this section and, in case of errors or omissions, ascertain the correct figures;

(2) Weigh, sample, and test for butterfat content the milk received from producers and any product of milk upon which classification depends; and

(3) Verify the payments to producers prescribed in § 944.8.

§ 944.6 *Application of provisions*—(a) *Producer-handlers.* (1) Sections 944.4, 944.7, 944.8, 944.9, 944.10, and 944.11 shall not apply to the handling of milk by handlers (i) whose sole source of supply are receipts from other handlers or (ii) who are producer-handlers pursuant to § 944.1 (a) (5), as verified by the market administrator in the manner provided in (2) of this paragraph.

(2) Handlers shall furnish to the market administrator for his verification, subject to review by the War Food Ad-

ministrator, evidence of their qualifications as producer-handlers pursuant to § 944.1 (a) (5), as of the effective date of the provisions hereof, and they shall furnish evidence of subsequent changes made in the manner of producing or distributing their milk that affects their qualifications as producer-handlers; such verification by the market administrator shall be made within 15 days of the date of receipt of the evidence and shall be effective retroactively to the effective date of the provisions hereof in cases verified within 45 days of such effective date and shall be effective retroactively to the first day of the delivery period during which verification is made in subsequent cases.

(b) *Milk received by a handler from another handler who is also a producer or a producer-handler.* If any handler has purchased or received milk or cream from another handler who is also a producer or a producer-handler, such milk or cream shall be considered as Class IV milk. If such receiving handler disposes of such milk or cream for other than Class IV purposes, the market administrator in computing the net pool obligation of such handler pursuant to § 944.7 (a) shall add an amount equal to the difference between (1) the value of such milk or cream in accordance with its actual utilization by such handler and (2) the value at the Class IV price.

(c) *Milk received by a handler from sources determined as other than producers or other handlers.* If any handler has purchased or received milk or cream from sources determined as other than producers or other handlers, except as provided in § 944.8 (b), such milk and the milk equivalent of such cream shall be considered as utilized in Class IV if the quantity of milk disposed of by him in this class equals or exceeds the quantity of milk from this source plus a quantity equal to actual plant shrinkage, not in excess of 3 percent. If the handler's Class IV disposition does not equal these quantities, any portion or all of such milk not thus utilized in Class IV shall be considered as utilized in Class III if the handler has a utilization in this class equal to or in excess of such quantity. Any quantity not thus considered as utilized in Class IV and Class III shall be considered as utilized as Class II.

(d) *Payment for excess milk or butterfat.* If a handler, after subtracting receipts from his own farm production, receipts from other handlers, and receipts from sources determined as other than producers or other handlers, has disposed of milk or butterfat in excess of the milk or butterfat which, on the basis of his reports, has been credited to his producers as having been delivered by them, the market administrator in computing the net pool obligation of such handler pursuant to § 944.7 (a) shall add an amount equal to the value of such milk or milk equivalent of such butterfat in accordance with its actual utilization by the handler.

§ 944.7 *Determination of uniform prices to producers*—(a) *Net pool obligation of handlers.* Subject to the provisions of § 944.6, the net pool obligation

of each handler for milk received from producers during each delivery period shall be a sum of money computed for such delivery period by the market administrator as follows: multiply the "net pooled milk" in each class, computed pursuant to § 944.3 by the class price computed pursuant to § 944.4 (a), add together the resulting amounts, and add the value of any premium required to be paid pursuant to § 944.4 (c).

(b) *Computation of the uniform prices.* For each delivery period the market administrator shall compute the uniform prices per hundredweight of milk as follows:

(1) Combine into one total the net pool obligations of all handlers, computed pursuant to (a) of this section, who made the reports pursuant to § 944.5 (a) and who made the payments pursuant to § 944.8.

(2) Subtract from the value computed pursuant to (1) of this paragraph the amount of the payments made pursuant to § 944.4 (c).

(3) Compute the total quantity of milk which represents the delivered bases of producers and which is included in the computation made pursuant to (a) of this section.

(4) Compute the total value of the milk which is in excess of the delivered bases of producers determined pursuant to (2) of this paragraph and which is included in the computation pursuant to (a) of this section as follows: (i) determine the classification of milk in excess of base by allocating such milk first to Class IV milk and then to each succeeding higher classification until all such milk has been classified, (ii) multiply the total pounds of excess milk allocated to each class by the appropriate class price provided in § 944.4 (a), and (iii) add together the resulting amounts.

(5) Compute the total value of the milk represented by the delivered bases of producers by subtracting the value obtained in (4) of this paragraph from the result obtained in (2) of this paragraph.

(6) Add to the value computed pursuant to (5) of this paragraph the amount of the cash balance in the producer-settlement fund less any amount due handlers pursuant to § 944.8 (g).

(7) Divide the result obtained in (6) of this paragraph by the quantity of milk represented by the delivered bases of producers as determined in (3) of this paragraph.

(8) Subtract from the figure obtained in (7) of this paragraph not less than 4 cents nor more than 5 cents per hundredweight of milk for the purpose of retaining a cash balance to provide against errors in reports and payments, or delinquencies, in payments by handlers. This result shall be known as the uniform price per hundredweight for such delivery period for base milk of producers containing 3.5 percent butterfat.

(9) Divide the sum obtained in (4) of this paragraph by the quantity of milk of producers in excess of their delivered base. This result shall be known as the excess price for such delivery period for milk in excess of delivered base of producers containing 3.5 percent butterfat.

(10) Divide the amount subtracted pursuant to (2) of this paragraph by the total hundredweight of base milk which complies with the Grade A milk quality requirements of the Milk Ordinance of the City of Davenport, Iowa, and the minimum requirements adopted by the Davenport Board of Health for the interpretation and enforcement of such ordinance, or of the Grade A milk and Grade A Milk Products Law of the State of Illinois, and the minimum requirements adopted by the Director of the Illinois Department of Public Health for the interpretation and enforcement of said act. The result shall be known as the Grade A premium for such delivery period per hundredweight of base milk of producers which conforms to the above requirements.

(c) *Announcement of prices.* On or before the 10th day after the end of each delivery period the market administrator shall notify all handlers and make public announcement of the computations pursuant to (b) of this section, of the uniform price per hundredweight of base milk, of the excess price, and of the Grade A premium computed pursuant to (b) of this section, of the Class I, Class II, Class III, and Class IV prices computed pursuant to § 944.4, and of the butterfat differential computed pursuant to § 944.8 (c).

§ 944.8 *Payment for milk—(a) Time and method of payment.* Each handler shall make payment subject to the butterfat differential set forth in (c) of this section, for milk purchased or received from producers by such handler during each delivery period as follows:

(1) To each producer for milk which was not caused to be delivered to such handler by a cooperative association for the account of such cooperative association, on or before the 15th day after the end of the delivery period during which such milk was received, at not less than the uniform price per hundredweight for base milk computed pursuant to § 944.7 (b) (8): *Provided*, That for that quantity of base milk which complies with the Grade A milk quality requirements of the Milk Ordinance of the City of Davenport, Iowa, and the minimum requirements adopted by the Davenport Board of Health for the interpretation and enforcement of such ordinance, or of the Grade A milk and Grade A Milk Products Law of the State of Illinois, and the minimum requirements adopted by the Director of the Illinois Department of Public Health for the interpretation and enforcement of said act, there shall be added to the announced uniform price for base milk an amount equal to the Grade A premium computed pursuant to § 944.7 (b) (10).

(2) To each producer for milk which was not caused to be delivered to such handler by a cooperative association for the account of such cooperative association, on or before the 18th day after the end of the delivery period during which such milk was purchased or received at not less than the excess price computed pursuant to § 944.7 (b) (9) for that quantity of milk received from such

producer in excess of such producer's base.

(3) On or before the 12th day after the end of each delivery period, each handler, with respect to milk which is caused to be delivered to him from producers by a cooperative association for the account of such cooperative association, shall make payment to such cooperative association for the utilization value of such milk at not less than the class prices, including the Grade A premium set forth in § 944.4, subject to the provisions of § 944.3 (f) and subject to the butterfat differential set forth in (c) of this section.

(b) *Emergency milk.* During any delivery period when the market administrator determines that the supply of milk available to any handler from producers and handlers is not sufficient to fulfill the Class I and Class II milk requirements, including the Grade A requirements of such handler, such handler, after giving notice to the market administrator of his intention to purchase milk from other than such sources, may secure milk from emergency sources on terms and conditions other than those provided in this section. Emergency milk shall be reported to the market administrator by the receiving handler separately from milk received from producers and handlers in accordance with § 944.3 (a). Such milk shall be deducted from each class in the proportion that the quantity of milk disposed of by the receiving handler in each class during the delivery period bears to the total quantity of milk received by him during such delivery period. The person from whom the handler received such milk shall not be considered a handler with respect to milk disposed of in the marketing area under the circumstances described in this paragraph, and the persons who produced such milk shall not be considered "producers" within the meaning of this order.

(c) *Butterfat differential.* If, during the delivery period, any handler has received from any producer milk having an average butterfat content other than 3.5 percent, such handler, in making the payments prescribed in paragraph (a) of this section, shall add for each one-tenth of 1 percent of average butterfat content in milk above 3.5 percent not less than, or shall deduct for each one-tenth of 1 percent of average butterfat content in milk below 3.5 percent not more than:

(1) Three cents per hundredweight when the average price of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture (or such other Federal Agency as may hereafter be authorized to perform this price reporting function) for the delivery period during which such milk is received, is less than 30 cents;

(2) Four cents per hundredweight when such average price of 92-score butter is 30 cents or over but less than 35 cents; and

(3) Five cents per hundredweight when such average price of 92-score butter is 35 cents or over.

(d) *Producer-settlement fund.* The market administrator shall establish and maintain a "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to paragraphs (e) and (g) of this section and out of which he shall make all payments to handlers pursuant to paragraphs (f) and (g) of this section.

(e) *Payments to the producer-settlement fund.* On or before the 12th day after the end of each delivery period, each handler, including a cooperative association which is a handler, shall pay to the market administrator for payment to producers through the producer-settlement fund, the amount by which the net pool obligation of such handler, including the payments required to be made pursuant to § 944.6, is greater than the sum required to be paid producers by such handler pursuant to paragraph (a) of this section.

(f) *Payments out of the producer-settlement fund.* (1) On or before the 15th day after the end of each delivery period, the market administrator shall pay to each handler for payment to producers the amount by which the sum reported to be paid producers by such handler pursuant to paragraph (a) of this section is greater than the net pool obligation of such handler, including the payments required to be made pursuant to § 944.6.

(2) If the balance in the "producer-settlement fund" is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. No handler who, on the 15th day after the end of each delivery period, has not received the balance of such reduced payment from the market administrator, shall be deemed to be in violation of paragraph (a) of this section if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

(g) *Adjustment of errors in payment.* Whenever verification by the market administrator of reports or payments of any handler discloses errors in payments to the producer-settlement fund made pursuant to paragraph (e) of this section, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days of such billing, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler pursuant to paragraph (f) of this section, the market administrator shall, within 5 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer discloses payment to such producer of an amount which is less than is required by this section, the handler shall make up such payment to the producer not later than the time of making payment to producers next following such disclosure.

§ 944.9 *Base ratings.*—(a) *Determination of base.* For each delivery period

the base of each producer shall be a quantity of milk calculated in the following manner: multiply the applicable figure computed pursuant to paragraph (b) of this section by the number of days on which milk was received from such producer during such delivery period.

(b) *Determination of daily base.* Effective January 1, 1940, and each subsequent year thereafter, the daily base of each producer for the ensuing year shall be determined by the market administrator from reports filed by handlers pursuant to § 944.5 in the following manner:

(1) Determine for each producer that month during the preceding calendar year when his daily average deliveries of milk were the lowest. Determine the 3 months of the preceding calendar year when the daily average deliveries of milk of all producers were the lowest.

(2) Determine for each producer his total deliveries of milk during each of the 4 months of the year described in subparagraph (1) of this paragraph and add together the resulting amounts.

(3) Divide the sum obtained for each producer in subparagraph (2) of this paragraph by the number of days of such 4 calendar months.

(4) Add together in one sum all the daily average amounts, computed in accordance with subparagraph (3) of this paragraph.

(5) Determine the daily average utilization of Class I milk and Class II milk during the month of the preceding year when such utilization was greatest and add to such daily average an amount not to exceed 10 percent thereof.

(6) Divide the amount determined pursuant to subparagraph (5) of this paragraph by the sum determined pursuant to subparagraph (4) of this paragraph.

(7) Multiply the daily average amount for each producer determined in subparagraph (5) of this paragraph by the percentage figure computed pursuant to subparagraph (6) of this paragraph. This result shall be known as the producer's allotted daily base.

(c) *Base rules.* The following rules shall be observed by the market administrator with respect to the administration of the base plan:

(1) Base allotted to producers pursuant to paragraph (b) of this section shall not be transferable: *Provided*, That bases allotted under a tenant and landlord relationship shall be combined and may be divided only if such relationship is terminated: *And provided further*, That any member of the producer's family may be named as the person to whom such base is to be allotted, but in no case shall a base be allotted to more than one member of such producer's family on the same farm.

(2) As soon as bases are allotted to producers pursuant to paragraph (b) of this section, the market administrator shall notify each handler of the bases of producers from whom such handler receives milk.

(3) Any producer who ceases to market milk to a handler for a period of more than 45 consecutive days shall forfeit his base.

(4) In the event a producer delivers an average quantity of milk less than 85 percent of his allotted daily base for each of 3 consecutive months, such producer shall be reallocated a base equal to his daily average deliveries of milk of his own production for the 3 consecutive months involved.

(5) A producer, whether landlord or tenant of a farm, may retain his own base when moving his entire herd of cows from one farm to another: *Provided*, That at the beginning of a tenant and landlord relationship the allotted base of such tenant and landlord shall be a combined base.

(6) A landlord who rents on shares shall be entitled to the entire base to the exclusion of the tenant if the landlord owns the entire herd. Likewise, the tenant who rents on shares shall be entitled to the entire base to the exclusion of the landlord if the tenant owns the entire herd. If the cattle are jointly owned by tenant and landlord, the base shall be divided between the joint owners according to the ownership of the cattle, if and when such joint owners terminate the tenant and landlord relationship.

(7) The base of any producer shall be automatically canceled at the beginning of any delivery period during which such producer reports milk not produced by him as being milk of his own production for the purpose of maintaining or increasing his allotted base. Such producer shall be allotted a new base computed in the manner provided in subparagraph (8) of this paragraph, and shall be treated for the purposes of this section as if he had relinquished his base.

(8) Any producer wishing to earn a new base may do so by notifying the market administrator that he is relinquishing his base at the beginning of the delivery period following that during which notice is given, except that with respect to notice given during the month of January, such producer shall be considered to have relinquished his base effective January 1 or February 1, whichever is indicated in the notice given. All milk delivered by such producer shall be considered as milk delivered in excess of base for a period of 2 full calendar months following such producer's relinquishment of his base. At the conclusion of 2 calendar months such producer shall be allotted a new base in the following manner: the market administrator shall determine the daily average deliveries of milk by such producer during the 2 full calendar months following his relinquishment of base. Such daily average deliveries of milk shall be multiplied by the percentage that base deliveries were to total deliveries of milk to the market during such 2 calendar months by all base-holding producers on the market during that period.

(9) If a producer, who has notified the market administrator within 5 days prior to his participation, enters into a program of disease eradication supervised by either county, State, or Federal authorities, the market administrator, in making his determination of that month of the preceding year when such pro-

ducer's daily average deliveries were lowest pursuant to subparagraph (1) of paragraph (b) of this section, shall disregard any month in which such disease eradication program was being performed.

(10) All milk delivered to a handler by any producer who has not previously marketed milk to a handler or who resumes delivery after not having marketed milk to a handler for a period of more than 45 consecutive days shall, during the period from the date of such producer's first delivery until the conclusion of 2 full calendar months, be considered as milk delivered in excess of base. After the conclusion of 2 full calendar months, the market administrator shall determine a base for such producer by multiplying such producer's daily average deliveries of milk during those 2 calendar months by the percentage that base deliveries were to total deliveries of milk to the market by all base-holding producers on the market during such months.

(11) In the case of a producer who distributes the milk he produces and who disposes of all or a part of his delivery routes to a handler, the market administrator shall determine a figure representing the average daily Class I and Class II milk produced and disposed of during the previous 3 months on the delivery routes of such producer which such producer and such handler jointly report as involved in the transaction, subject to verification by the market administrator. Any base so determined shall be effective until the end of the then current calendar year and thereafter shall be superseded by a figure determined pursuant to paragraph (b) of this section.

§ 944.10 *Marketing services*—(a) *Deductions for marketing services*. Except as set forth in paragraph (b) of this section, each handler shall deduct an amount not exceeding 4 cents per hundredweight (the exact amount to be determined by the market administrator, subject to review by the War Food Administrator) from the payments made to producers pursuant to § 944.8 with respect to all milk received by such handler during each delivery period from producers, and shall pay such deductions to the market administrator on or before the 15th day after the end of such delivery period. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received by handlers from producers during the delivery period and to provide such producers with market information, such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) *Producers' cooperative association*. In the case of producers for whom a cooperative association, which the War Food Administrator determines to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," is actually performing, as determined by the War Food Administrator, the services set forth in paragraph (a) of this section, each handler shall

make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by such producers and, on or before the 15th day after the end of each delivery period, pay over such deductions to the cooperative association rendering such services of which such producers are members.

§ 944.11 *Expenses of administration*—(a) *Payments by handlers*. As his pro rata share of the expense of the administration hereof, each handler, on or before the 15th day after the end of each delivery period, shall pay to the market administrator a sum not exceeding 3 cents per hundredweight with respect to all milk received during such delivery period from producers or from a producers' cooperative association or produced by such handler, the exact sum to be determined by the market administrator subject to review by the War Food Administrator: *Provided*, That such handler which is a cooperative association shall pay such prorata share of expense of administration on only that milk of producers received by such association or caused to be delivered by such association to a plant from which no milk is disposed of in the marketing area.

(b) *Suits by market administrator*. The market administrator may maintain a suit in his own name against any handler for the collection of such handler's pro rata share of expense set forth in this section.

§ 944.12 *Effective time, suspension, or termination*—(a) *Effective time*. The provisions hereof, or any amendment hereto, shall become effective at such time as the War Food Administrator may declare and shall continue in force until suspended or terminated, pursuant to paragraph (b) of this section.

(b) *Suspension or termination*. The War Food Administrator may suspend or terminate this order, as amended, or any provision hereof, whenever he finds that this order, as amended, or any provision hereof, obstructs, or does not tend to effectuate the declared policy of the act. This order, as amended, shall terminate, in any event, whenever the provisions of the act authorizing it cease to be in effect.

(c) *Continuing power and duty of the market administrator*. If, upon the suspension or termination of any or all provisions hereof, there are any obligations arising hereunder the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the War Food Administrator so directs, be performed by such other person, persons, or agency as the War Food Administrator may designate.

(1) The market administrator, or such other person as the War Food Administrator may designate, shall (i) continue in such capacity until discharged by the War Food Administrator, (ii) from time to time account for all receipts and dis-

bursements, and, when so directed by the War Food Administrator, deliver all funds or property on hand, together with the books and records of the market administrator, or such person, to such person as the War Food Administrator may direct, and (iii) if so directed by the War Food Administrator, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant hereto.

(d) *Liquidation after suspension or termination*. Upon the suspension or termination of any or all provisions hereof, the market administrator, or such person as the War Food Administrator may designate shall, if so directed by the War Food Administrator, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions hereof, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

§ 944.13 *Agents*. The War Food Administrator may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions hereof.

Issued at Washington, D. C., this 16th day of March 1944, to be effective on and after the 1st day of April 1944.

Assistant to the
War Food Administrator.

Chapter XI—War Food Administration (Distribution Orders)

[Suspension Order Docket No. FDA-GL-101]

PART 1590—SUSPENSION ORDERS

H. GRAVER COMPANY

This proceeding involves alleged violations of Meat Restriction Order 1 (7 F.R. 7839), as amended, which was issued on October 1, 1942, by the Office of Price Administration. The functions of administering and enforcing the provisions of this order, as amended, were transferred from the Office of Price Administration to the United States Department of Agriculture pursuant to Executive Order No. 9280 (7 F.R. 10179), by an order issued jointly by the Secretary of Agriculture and the Administrator of the Office of Price Administration on March 31, 1943 and effective April 1, 1943 (8 F.R. 4151). The ad-

ministration and enforcement of this order was vested in the War Food Administrator by Executive Order No. 9322 (8 F.R. 3807), as amended by Executive Order No. 9334 (8 F.R. 5423). Meat Restriction Order 1 was amended and redesignated as Food Distribution Order 61 on July 1, 1943 (8 F.R. 9108) and was superseded by Food Distribution Order 75 on August 9, 1943 (8 F.R. 11119), except insofar as violations thereof or liabilities incurred thereunder. As to these, it was provided in paragraph (x) of Food Distribution Order 75, that Food Distribution Order 61 "shall be deemed in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with respect to any such violation or liability."

This proceeding was instituted by the issuance and service of a statement of charges and procedure by the Regional Director for the Great Lakes Region, Food Distribution Administration (now Office of Distribution), War Food Administration, in which it was alleged that H. Graver Company, a corporation, 3813 South Morgan Street, Chicago, Illinois (the "respondent") had violated Meat Restriction Order 1, as amended, (1) by delivering beef, pork and veal in excess of its assigned quotas during the quota periods beginning September 27, 1942, December 27, 1942 and March 28, 1943, respectively; (2) by failing to keep certain records during these quota periods; and (3) by failing to file reports of its deliveries of controlled meat during the quota period beginning December 27, 1942.

The respondent filed an answer and requested a hearing. Pursuant to the respondent's request, this matter was heard before a presiding officer on October 21, 1943. The respondent appeared at this hearing, adduced evidence, both oral and documentary, cross-examined the witnesses who appeared on behalf of the War Food Administration and otherwise availed itself of its opportunity to be heard. A representative of the War Food Administration also appeared at the hearing, adduced evidence, both oral and documentary, and cross-examined the witnesses who testified on behalf of the respondent.

Upon the basis of the evidence adduced at the hearing, which included a stipulation by the respondent in which it admitted that it had delivered 16,121,389 pounds of controlled meat in excess of its quotas for the first, second and third quota periods, as alleged in the statement of charges, it is hereby found and determined:

(1) That H. Graver Company, the respondent, was at all times hereinafter mentioned a slaughterer as that term was defined in Meat Restriction Order 1, as amended, and subject to all the provisions of said order, as amended, relating to a slaughterer; and that respondent is now a Class 1 slaughterer, as that term is defined in § 1410.15 (a) (7) of said Food Distribution Order 75, and is subject to all the provisions of said order, as amended and supplemented, relating to a Class 1 slaughterer, including, but without limitation to, the set aside provisions of said Food Distribution Order

75, as amended and supplemented by Food Distribution Order 75-2, as amended and supplemented;

(2) That respondent's quota periods under Meat Restriction Order 1 were based on its normal accounting periods and, therefore, the first quota period began September 27, 1942 and ended December 26, 1942; the second quota period began December 27, 1942 and ended March 27, 1943; and the third quota period began March 28, 1943 and ended June 26, 1943; and that respondent was subject to the provisions of Meat Restriction Order 1, as amended, during these quota periods;

(3) That, if the respondent had complied with the provisions of § 1407.914a of Meat Restriction Order 1, as amended, its quota base would have been increased by an amount sufficient to decrease the excess deliveries of controlled meats to 15,139,054 pounds;

(4) That respondent wilfully violated Meat Restriction Order 1, as amended, by delivering during the quota periods beginning September 27, 1942, December 27, 1942 and March 28, 1943, respectively, 15,139,054 pounds of controlled meat in excess of its quotas for these quota periods as follows:

QUOTA PERIODS

	First	Second	Third	Total
Beef.....	2,995,516	5,170,637	4,984,939	13,151,092
Veal.....	206,133	518,594	485,243	1,210,770
Pork.....	291,360	202,033	283,790	777,183
Total....	3,493,009	5,891,264	5,753,972	15,139,054

(5) That respondent failed to keep adequate records from which the conversion weight of beef of cutter and canner grades slaughtered during said first, second and third quota periods could be determined.

Because of the importance of having meat distributed in a manner to assure an adequate supply and efficient distribution of meat for war and civilian needs, the aforesaid violations by the respondent have impeded the war effort by diverting meat which had been allocated to the armed forces to civilian channels and uses.

It is therefore ordered, that:

§ 1590.10 *Suspension order against H. Graver Company.* (a) H. Graver Company, the respondent, shall set aside, reserve, and hold for delivery to governmental agencies or persons entitled to purchase set aside meat under a Food Distribution Regulation, in accordance with the provisions of Food Distribution Order 75-2, as amended, or as it may be amended and supplemented.

(i) An amount of the conversion weight of each week's production of beef graded "U. S. Choice," "U. S. Good," and "U. S. Commercial," obtained from steers and heifers whose carcasses meet Army specifications for carcass beef or frozen boneless beef, which amount together with the amount of such beef required to be set aside by the respondent under Food Distribution Order 75-2, as amended, or as it may be amended and supplemented, will equal 80 percent of

the conversion weight of each week's production of such beef;

(ii) An amount of each week's production of beef graded "U. S. Utility," produced from steers and heifers whose carcasses meet Army weight specifications, in the form of carcass or frozen boneless beef meeting Army specifications, which together with the amount of such beef required to be set aside under Food Distribution Order 75-2, as amended, or as it may be amended and supplemented, will equal 80 percent of respondent's weekly production of such beef,

for and until such time as the amount of beef set aside pursuant to this order shall equal 13,151,092 pounds, the amount of beef which it has found and determined was delivered by respondent in excess of its quotas during the quota periods beginning September 27, 1942, December 27, 1942 and March 28, 1943.

(b) The beef set aside pursuant to this order shall be in addition to that which is required to be set aside under Food Distribution Order 75-2, as amended, or as it may be amended and supplemented.

(c) Any terms used in this order which are defined in Food Distribution Order 75, as amended, or as it may be amended and supplemented, and Food Distribution Order 75-2, as amended, or as it may be amended and supplemented, shall have the meaning therein given to them unless otherwise distinctly expressed or manifestly incompatible with the intent thereof.

(d) Nothing contained in this order shall be deemed to relieve respondent, its agents, successors, or assigns, from any restriction, prohibition, or provision, contained in any order or regulation issued by the War Food Administrator, except insofar as the same may be inconsistent with the provisions hereof.

(e) This order shall become effective at 12:01 a. m., e. w. t., April 3, 1944.

(2) Deliveries of machine tools or other capital equipment to prime contractors or subcontractors to produce items being procured under a prime Army or Navy contract. Directive 23 (§ 903.35) requires War Production Board approval of ratings assigned for machine tools and other capital equipment.

(3) Command construction; that is, the following types of projects ordered built by either the Chief of Staff, U. S. Army, or the Chief of Naval Operations, U. S. Navy: air fields; military housing; alien housing; facilities for the repair of finished items of munitions; overseas or theatre of operations construction; seacoast fortifications; ports and depots; camouflage and other passive defense projects (whether or not owned and operated by the Army or Navy); emergency flood control projects having a value of less than \$100,000; military hospitals; maneuver, training and staging areas and proving grounds.

(4) Engineers Corps construction; that is, projects which (i) have been determined by the War Production Board to be essential, (ii) are built by or under the supervision of the Corps of Engineers (and where appropriate, completed by the Army Air Forces) in accordance with a design directive approved by an authorized representative of the War Production Board and (iii) will be owned, leased or operated by the War Department.

(5) Panama Canal construction; that is, projects (other than command construction) which are owned by the Panama Canal.

(d) *Redelegation of authority to assign ratings.* The authority delegated to the Army and Navy Munitions Board in paragraph (c) may be redelegated by that Board, either directly or through channels, to procurement, contracting and inspecting officials or other authorized officials of the Army and Navy and to the agencies enumerated in paragraph (b) and officials thereof. Any general instructions regarding the assignment of ratings which are issued by the Army and Navy Munitions Board shall be approved before issuance by the War Production Board. Approval of specific adjustments made by ANMB within the limits prescribed by WPB Program Determinations is not required.

(e) *Method of assigning ratings.* (1) A preference rating assigned to a production schedule at the time that allotments are made and the schedule is authorized under the Controlled Materials Plan shall be assigned on an allotment form, on Form WPB-542 (formerly PD-3A), or as prescribed in subparagraph (3) below.

(3) When any government agency mentioned in paragraph (b) assigns a preference rating to deliveries to be made to it or for its account, it may do so by placing the rating on the purchase order or contract and endorsing the order or contract with a certification substantially as follows: "By authority of the War Production Board the preference ratings indicated are assigned to the deliveries on this purchase order or contract." This certification may be placed on a purchase order or contract by means of a rubber stamp or printed on the order or contract form. The certification need not be signed separately if the purchase order or contract is signed by an official who is authorized to assign ratings on behalf of the agency which is placing the order or contract. This method of assigning a rating may not be used when machine tools or capital equipment are ordered by prime or subcontractors, even if the delivery is for the account of the government agency assigning the rating.

(4) Every rating assigned under this directive on a form or certificate shall be assigned in the manner prescribed therein without attaching any further conditions or qualifications.

(f) *Application and extension of ratings.* Ratings assigned under this directive may be applied and extended only in accordance with applicable regulations of the War Production Board.

(g) *Directives and administrative orders superseded.* This directive supersedes Division Administrative Order No. 1 of the Division of Industry Operations, War Production Board, issued February 23, 1942, all amendments thereof and memoranda supplemental thereto, and all delegations of authority to assign preference ratings which have been heretofore issued to the Army and Navy Munitions Board or to any Service of the Army, to the Army Air Forces, or to any Bureau of the Navy.

PART 903—DELEGATIONS OF AUTHORITY [Directive 35]

DELEGATION OF AUTHORITY TO THE OFFICE OF PRICE ADMINISTRATION TO REQUIRE RE- PORTS OF USED EQUIPMENT AND MA- CHINERY ON FORM WPB-2574

The following directive is issued pur-
suant to authority vested in me by Ex-

ecutive Order 9024 of January 16, 1942, Executive Order 9125 of April 7, 1943 and WPB Regulation No. 1 as amended December 31, 1943, in order to facilitate the redistribution of used equipment and machinery and to avoid duplicating functions of the War Production Board and the Office of Price Administration in connection therewith.

§ 903.48 *Directive No. 35—(a) Purpose.* Various orders and regulations of the War Production Board govern the redistribution of used equipment and machinery. Maximum price schedules issued by the Office of Price Administration control the prices of such used equipment and machinery and will require reports from the holders of selling prices. The reporting of dealers' inventories is essential for programs of redistribution which may be conducted by the War Production Board. The purpose of this delegation is to consolidate essential information about prices and inventories of used equipment and machinery into one reporting form, and to authorize the Office of Price Administration to require reporting on that form.

(b) *Delegation of authority.* The Office of Price Administration may require in its own name the filing of Form WPB-2574 (otherwise known as Used Equipment and Machinery Inventory and Sales Report Form) in such manner and at such places as it shall require (subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942) by any person engaged in the business of selling second-hand machines, equipment and parts, either as principal or agent. The Office of Price Administration may exercise the power and authority of the War Production Board in requiring reports on this form.

(c) *Redelegation.* The Office of Price Administration may exercise the power, authority and discretion conferred upon it by this directive through such officials or employees as it may from time to time determine.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-506]

SINGER STEEL COMPANY

Albert Singer owns and operates a steel warehouse under the trade name of Singer Steel Company, at 6316 Kinsman Road, Cleveland, Ohio. He over-stated his deliveries of steel from warehouse

stocks during the base period, January, February, and March 1941, in the amount of 2723.6 net tons, receiving a quota and warehouse certificate upon that statement. Of the amount over-stated, 611.9 net tons were included as the result of gross negligence. Subsequently, during the third and fourth calendar quarters of 1942 and the first calendar quarter of 1943, he accepted deliveries of 1581 net tons of prime steel into stock in excess of his quota for prime steel as the result of gross negligence. During the fourth calendar quarter of 1942 and the first calendar quarter of 1943, he accepted deliveries into warehouse stock of 1505 net tons of skelp and 151 net tons of scrap, for which no quota had been assigned nor authority granted by the War Production Board, in wilful violation of Supplementary Order M-21-b.

From July 1, 1942, to March 31, 1943, on Form PD-83-g, he violated Supplementary Order M-21-b and Priorities Regulation No. 3 by improperly extending customers' ratings for the following purposes: with gross negligence to purchase product groups and types of steel other than those entered on the customers' orders; wilfully to order and accept delivery of 1,867,300 pounds of steel into warehouse stock on customers' orders, which had been filled by direct shipment from the mill to the warehouse customer; with gross negligence to order and accept delivery of steel into warehouse stock, using ratings higher than the lowest rating received as well as ratings received more than 90 days prior to placing of his order with the mill.

During the period July 1, 1942, through March 31, 1943, as the result of gross negligence, he submitted false, and misleading information to the War Production Board on Forms PD-83 concerning his operations as a steel warehouse, in violation of Priorities Regulation No. 1.

These violations of Priorities Regulation No. 1 and No. 3, and Supplementary Order M-21-b have diverted scarce materials to uses not authorized by the War Production Board, and have hampered and impeded the War Effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.506 *Suspension Order No. S-506.* (a) Albert Singer, doing business as Singer Steel Company, or under any other name, his and its successors and assigns, shall not directly or indirectly receive into his warehouse stock from producers, other distributors, holders of excess and idle stocks or any other source of supply, general steel products as defined in General Preference Order M-21-b-1 in a total quantity greater than 1600 net tons; nor shall he receive any general steel products whatever, as defined in General Preference Order M-21-b-1, if they come from producers' scheduled rollings; nor shall he order for delivery to warehouse stock from producers, other distributors, holders of excess and idle stocks or any other source of supply, general steel products as defined in General Preference Order M-21-b-1 in a total quantity greater than 1600 net tons; nor shall he order any general steel products whatever, as they are defined in General Preference Order M-21-b-1, if they come from pro-

ducers' scheduled rollings; unless hereafter specifically authorized in writing by the War Production Board. These restrictions shall apply to the successors and assigns of Albert Singer.

(b) Nothing in this order shall be deemed to relieve Albert Singer, doing business as Singer Steel Company, or under any other name, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on March 24, 1944, and shall expire on July 24, 1944.

Issued this 17th day of March 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-508]

IRVINE & JACHENS

Irvine & Jachens is a co-partnership now composed of William F. Irvine and Mrs. Esther Irvine, doing business with its principal office located at 1068 Mission Street, San Francisco, California. This firm is engaged in the manufacture of signs, plates, badges and other similar copper products. Between July 1, 1942, and July 15, 1943, the firm filled orders for such copper products under circumstances which constituted grossly negligent violations of Conservation Order M-9-c. These violations of Conservation Order M-9-c have diverted critical copper to uses unauthorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.508 *Suspension Order No. S-508.* (a) William F. Irvine and Mrs. Esther Irvine, doing business as Irvine & Jachens, or under any other name, their and its successors and assigns, are prohibited from processing, fabricating or assembling copper products or copper base alloy products in the manufacture of any items or article unless hereafter specifically authorized in writing by the War Production Board.

(b) The terms of this suspension order shall not apply to any proper order for manufacture already accepted by William F. Irvine and Mrs. Esther Irvine, doing business as Irvine & Jachens, prior to the effective date of this suspension order.

(c) Nothing contained in this order shall be deemed to relieve William F. Irvine and Mrs. Esther Irvine, doing business as Irvine & Jachens, or otherwise, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on March 24, 1944, and shall expire on May 24, 1944.

Issued this 17th day of March 1944.

(iii) To fill orders authorized on Form WPB-1319. Applications for such authorization must be filed with the appropriate War Production Board Field Office. (This application form may be used by dealers and distributors for inventory. The use of the form, for applications where the total cost (stoker plus installation) is no more than \$5,000, is required of any ultimate consumer not covered by (i) or (ii) and is permissible in lieu of application under (ii). If the total cost exceeds \$5,000, application must be made under (i) or (ii).) Any order so authorized by the War Production Board shall be deemed a "rated order" for the purposes of § 944.2 of Priorities Regulation No. 1. 4. By changing paragraph (f), formerly (i), to read as follows:

(f) *Appeals.* Any appeal from the provisions of this order shall be filed on Form WPB-1477 (formerly PD-500) with the Field Office of the War Production Board for the district in which is located

(b) *Definitions.* For the purposes of this order:

(1) "Tube" means any collapsible container in the shape of a tube, including but not limited to any such container made in whole or in part of tin, aluminum, lead, or any combination thereof and includes closures, crowns and caps for such tubes. It shall not, however, include a tube made exclusively of plastic with or without the addition of a steel fastener at the bottom of the tube.

(2) "Retailer" means a person who sells or distributes tubes to the ultimate user.

(3) "Ultimate user" means a person who acquires filled tubes for the satisfaction of personal needs (with or without paying any consideration therefor), as distinguished from one acquiring tubes for industrial or other business purposes or for further distribution.

(c) *Restrictions upon the manufacture, sale and delivery of blanks and tubes and upon the use of tubes for packing.* (1) No person shall manufacture or sell tube blanks or tubes, and no person shall purchase, accept delivery of or use any tubes, for packing products except as specifically permitted in the schedules attached to this order.

(2) Packers of commodities listed in the schedules attached to this order are restricted in the quantity of the commodity (by weight) which they may pack in tubes in any calendar year. The packing quotas and the base period for each commodity are shown in the schedules. Commodities packed in tubes sold to the Army or Navy of the United States (including military exchanges or service departments as defined in Priorities Regulation No. 17) or to the American Red Cross, shall not be included either in computing the base period quantity or the packing quota for the current year.

(d) *Exchange of tubes no longer required.* Retailers are no longer required to receive a used tube in exchange upon the sale of a filled tube. They are, how-

¹ Formerly Part 1160, § 1160.1—Coal Stokers.

ever, required to deliver all used tubes which have been turned in to them to the Tin Salvage Institute, 411 Wilson Avenue, Newark, New Jersey, agent for the Metals Reserve Company, or to any other person who is a duly authorized representative of the Tin Salvage Institute.

NOTE: Paragraphs (e) and (f), formerly (f) and (g), redesignated Mar. 25, 1944.

(e) *Certificates and reports relating to all kinds of tubes covered by this order*—(1) *Certificate of tube packers.* Each tube packer who purchases any tubes shall furnish to the tube manufacturer from whom he buys, a certificate, in substantially the form attached hereto as Exhibit A. Only one such certificate covering all present and future purchases from a given tube manufacturer need be furnished by a tube packer to that tube manufacturer (who shall retain such certificate), but no tube manufacturer shall be entitled to rely on any such certificate if he knows, or has reason to believe it to be false. No tube manufacturer shall sell any tubes except under contracts or orders validated by the certification required by this paragraph.

(2) *Reports.* Each tube manufacturer and each tube packer shall file such reports as the War Production Board may prescribe for the purpose of effective administration of the order, *Provided*, That such reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(f) *Miscellaneous provisions*—(1) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter, referring to the particular provision appealed from and stating fully the grounds for the appeal.

(2) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Sales of tin.* No person shall hereafter sell or deliver tin to any tube manufacturer or tube packer if he knows or has reason to believe that such tin is to be used in violation of the terms of this order.

(4) *Communications to the War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Containers Division, Washington 25, D. C. Ref: M-115.

(5) *Effect of other orders.* Insofar as any other order of the War Production Board heretofore or hereafter issued

limits or curtails to a greater extent than herein provided the use of any material used in the production of tubes, the limitations of such order shall control.

SPECIAL RESTRICTIONS ON ORDERING CERTAIN ITEMS

Direction 1 to Order P-142 (§ 3216.1) is amended to read as follows:

(g) *Equitable distribution.* It is the policy of the War Production Board that rubber yarn, latex yarn, elastic thread and all types of synthetic rubber yarn and thread not required to fill rated orders shall be distributed equitably. In making such distribution due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy every seller of such products, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

PART 3293—CHEMICALS

[Allocation Order M-340 as Amended Mar. 27, 1944]

MISCELLANEOUS CHEMICALS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of the chemicals subject to this order for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3293.491 Allocation Order M-340—

(a) *Definitions.* (1) "Subject chemical"

means any chemical listed in Appendix A, as therein defined.

(2) "Producer" means any person engaged in the production of any subject chemical and includes a person who imports any subject chemical or has it produced for him pursuant to toll agreement.

(3) "Distributor" means any person who buys any subject chemical for the purpose of resale without further processing and without changing the form thereof.

(4) "Supplier" means a producer or distributor.

(b) *Restrictions on deliveries.* (1) On and after the applicable effective date stated in Appendix A, no supplier shall deliver a subject chemical to any person except as specifically authorized or directed in writing by War Production Board. No person shall accept delivery of a subject chemical which he knows or has reason to believe is delivered in violation of this order.

(2) Authorizations or directions as to deliveries to be made by suppliers in each calendar month will generally be issued by War Production Board prior to the beginning of such month, but may be issued at any time. They will normally be issued on Form WPB-2947 (formerly PD-602) which is to be filed by the supplier with War Production Board as explained in paragraph (g) below.

(3) If a supplier is authorized or directed by War Production Board to deliver a subject chemical to any specific customer or group of customers, but is unable to make the delivery either because of receipt of notice of cancellation or otherwise, the subject chemical shall revert to inventory, and shall not be delivered, or used, without further instructions.

(c) *Exceptions for small deliveries.*

(1) Specific authorization in writing of War Production Board is not required for delivery by any supplier to any person in any calendar month of a subject chemical in a quantity not exceeding the quantity stated in Column 3 of Appendix B.

(2) The aggregate quantity of a subject chemical which any supplier may deliver in any calendar month pursuant to paragraph (c) (1), shall not exceed:

(i) The quantity which he has been specifically authorized, upon application pursuant to Appendix D, to deliver on small orders; or

(ii) If he is a distributor, the quantity which he acquired upon certification that it was required to fill small orders or the quantity which he acquired himself on such a small order; or

(iii) If he is a distributor who customarily delivers exclusively on small orders, any quantity.

(d) *Exceptions for deliveries for other reasons.* Specific authorization in writing of War Production Board is not required for delivery of a subject chemical by any supplier to any other person for a purpose stated in Column 4 of Appendix B.

(e) *Restrictions on use.* (1) On and after the applicable effective date stated in Appendix A, no supplier shall use a subject chemical except as specifically authorized or directed in writing by War Production Board.

(2) Each person who with an order for a subject chemical furnishes a certificate required by paragraph (f) shall use the subject chemical delivered on such order only as specified on such certificate except as otherwise specifically authorized or directed in writing by War Production Board.

(3) War Production Board may from time to time issue directions with respect to the use or uses which may or may not be made of a subject chemical to be delivered to, or then in inventory of, the prospective user.

(f) *Supplier to obtain from customer a certificate of use.* No supplier shall in any calendar month (beginning in the case of each subject chemical with the calendar month in which the order becomes effective as to that chemical as stated in Appendix A) deliver to any person a greater quantity of such subject chemical than is stated in Column 3 of Appendix B, unless he shall have received from such person a certificate as to the use for which such person is ordering such subject chemical. Such certificate must be received by the supplier not later than the 15th day of the month preceding the month in which delivery is to be made. It need not be filed with War Production Board. A supplier must not deliver a subject chemical where he knows or has reason to believe the purchaser's certificate is false, but in the absence of such knowledge or reason to believe, he may rely on the certificate.

(g) *Applications by suppliers for leave to deliver or use.* (1) Each supplier requiring authorization to make delivery of, or to use, a subject chemical during any calendar month shall file application on or before the 20th day of the preceding month. The application should be made on Form WPB-2947 (formerly PD-602) in the manner set forth in the general instructions appearing on that form, subject to the special instructions contained in Appendix D. If there is an inconsistency between the general and special instructions, the special instructions must be followed.

(2) War Production Board may issue to any supplier other and further directions with respect to preparing and filing Form WPB-2947 (formerly PD-602).

(h) *Miscellaneous provisions.* (1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of War Production Board, as amended from time to time.

Sec. 4. *Less than maximum prices.* Nothing in this regulation prevents the charging or paying of prices lower than the maximum prices established by this regulation.

ARTICLE II—MAXIMUM PRICES

Sec. 5. *Division of sales into those at list prices and those at non-list prices for the purpose of establishing maximum prices.* This regulation divides sales into two kinds:

(a) *Sales of parts at list prices.* "List price" as used in this regulation means the price for a manufacturer's sale of a part which may be derived from a price list or price sheet published and generally distributed to the trade by him. When a list price is named in this regulation as the maximum price to a purchaser, it means the price adjusted for all applicable extra charges, discounts or allowances for sales to a purchaser of the same class.

[Paragraph (a) as amended by Am. 2, 8 F.R. 15456, effective 11-15-43]

(b) *Sales of parts at non-list prices.*—(1) *Non-list price.* "Non-list price" as used in this regulation means any price or price basis other than a list price at which a manufacturer sells a part to any class of purchaser.

Sec. 6. *Maximum prices for sales of new parts and rebuilt motors at list prices.*—(a) *Determination of maximum price in accordance with previous price list.* This section sets maximum prices for sales by a manufacturer who

[Sec. heading amended by Am. 4, effective 3-30-44]

(1) Had a list price for the part being priced in effect on March 31, 1942;

(2) Placed a list price authorized by the Office of Price Administration in effect subsequent to March 31, 1942; or

(3) Has established a list price in accordance with paragraph (b) of this section.

The maximum price which such a manufacturer may charge for a part is the most recent of the list prices described in (1), (2), and (3).

(b) *Conditions requiring and permitting establishment of new list prices.*—

(1) *When new list prices must be established.* (i) A new list price must be established in accordance with section 9 for a part for which the list price is the maximum price when a specification

change or material substitution made in the part reduces by 10% or more the factory cost or purchase cost (where the manufacturer is only a reseller of the part), except where the reduction in cost for the part or set (where the part is sold in sets) amounts to less than five cents. The new list price must be established within three months from the date the specification change or material substitution is made.

(ii) A new list price must be established when there is offered for sale a part for which a list price was not in effect between March 31, 1942, and the time of offering it for sale, but for which a list price was in effect and withdrawn during the period January 1, 1932, to March 31, 1942. The new list price shall be established within thirty days from the date the part is offered for sale either in accordance with section 9 or by adopting a price no higher than the highest list price in effect during the period January 1, 1932, to March 31, 1942, as the new list price.

If the manufacturer elects to reestablish a list price he had in effect during the period January 1, 1932, to March 31, 1942, as a new list price, he is not required to report or secure approval of such price as required by section 9. As soon as it is reestablished, he may charge and accept payment at or below such price and notify his customers of applicable resale prices in accordance with section 10 (a) notwithstanding section 10 (c). However, he should notify the Office of Price Administration (the National Office, Washington, D. C., for new parts and the regional office for the region in which his principal place of business is located for rebuilt parts) in writing of such a reestablished price within thirty days after he reestablishes it and should furnish that agency, as required by section 6 (c), with catalogs, price lists and discount sheets containing these reestablished prices only when he has such data available.

(iii) A manufacturer may be exempted from the necessity of establishing a new list price as required by this subparagraph (1) when the part is produced by a special run to fill a small non-recurrent order or there is some other reason why the special run is not likely to be repeated. In lieu of establishing a new list price he may be authorized to use a list price previously in effect and withdrawn or a new non-list price determined in accordance with section 12. The procedure to be followed in requesting this exemption is stated in section 11.

[Subparagraph (1) amended, (ii) revoked and former (iii) and (iv) redesignated as (ii) and (iii) by Am. 2, 8 F.R. 15456, effective 11-15-43. Paragraph added to (ii) by Am. 4, effective 3-30-44]

(2) *When new list prices may be established.* (i) A new list price may be established in accordance with section 9 when the factory or purchase cost of a part for which a list price is the maximum price, has been increased by 10%

or more as a result of a specification change or material substitution; or

(ii) A new list price may be established when the manufacturer wishes to establish a list price for a part for which there has been no list price in effect since January 1, 1932. The new list price in such a case shall be a price no higher than the previous maximum price for the part established pursuant to section 7, 14 or 16 of this regulation, or a price established in accordance with section 9 when the part is a new part.

[Subparagraph (2) amended by Am. 1, 8 F.R. 12237, effective 9-2-43, Am. 2, 8 F.R. 15456, effective 11-15-43, and Am. 4, effective 3-30-44]

(c) *List prices to be furnished to Office of Price Administration.* The manufacturer shall furnish to the Office of Price Administration, Washington, D. C., to the extent it has not already done so, catalogs, price lists, and discount sheets, containing list prices which are established as maximum prices by this section. A rebuilder of used parts shall furnish these data to the Office of Price Administration regional office for the region in which his principal place of business is located.

[Paragraph (c) amended by Am. 4, effective 3-30-44]

SEC. 7. Maximum prices for sales of new parts and rebuilt motors at non-list prices—(a) In general. The maximum price a manufacturer may charge for the sale of a new part or a rebuilt motor for which he cannot establish a maximum price in accordance with section 6 or for which he has not established a new list price in accordance with that section and section 9, although permitted, but not required, to do so, shall be the first applicable non-list price determined as follows:

(1) If the manufacturer quoted or charged the same price to the same class of purchaser more than twice during the period from October, 1941, to March, 1942, inclusive, and did not increase that price on or before March 31, 1942, that price will be the maximum price for sales to that class of purchaser.

(2) If the manufacturer had a series of prices in effect for different classes of purchasers during the period October, 1941, to March, 1942, inclusive, and any of those prices is now his maximum price pursuant to subparagraph (1), the other prices in the series are his maximum prices for the classes to which they relate.

(3) If the manufacturer had a method of setting prices for different classes of purchasers (as by the application of discounts, differentials, etc.) during the period October, 1941, to March, 1942, inclusive, and a price for any class of purchaser determined by the use of that method is now his maximum price pur-

suant to subparagraph (1), the prices for other classes under that pricing method are his maximum prices for the classes to which they relate.

(4) If the manufacturer cannot establish a maximum price for a part in accordance with either subparagraph (1), (2) or (3), he shall determine this maximum non-list price for the part in accordance with section 12.

The price established under subparagraph (1), (2), (3) or (4) as the maximum price for the sale of a part to a certain class of purchaser shall be the maximum price for all future sales to the same class of purchaser until changed in accordance with paragraph (b) or (c) of this section. For the purpose of subparagraph (1), all deliveries under a single contract shall be considered as parts of one sale.

(b) *When a new maximum price must be established for a non-list part.* A new maximum price must be established in accordance with section 12 for a non-list part when a specification change or a material substitution reduces by 10% or more the factory or purchase cost. The new maximum price must be established within three months from the date the specification change or material substitution is made.

(c) *When a new maximum price may be established for a non-list part.* A new maximum price may be established in accordance with section 12 for a non-list part when the factory or purchase cost for the part has been increased by 10% or more as a result of a specification change or a material substitution.

[Sec. 7 amended by Am. 1, 8 F.R. 12237, effective 9-2-43, Am. 2, 8 F.R. 15456, effective 11-15-43, and Am. 4, effective 3-30-44]

SEC. 8. Maximum prices for sales of new parts and rebuilt motors which cannot be priced under section 6 or 7. Where a manufacturer cannot establish a maximum price for a part in accordance with section 6 or 7 because he is producing it in a new or converted plant or because he was not engaged as a manufacturer as defined in this regulation during a period which permits him to establish a price under section 6 or 7, or for any other reason, he shall determine the maximum price for such part in accordance with section 14.

[Sec. heading amended by Am. 4, effective 3-30-44]

SEC. 8a. Prices for rebuilt parts other than rebuilt motors. A manufacturer must have prices in accordance with this section for any rebuilt parts, other than rebuilt motors, which he sells.

(a) *Rebuilt parts, other than rebuilt motors, having list prices under section 6 prior to March 30, 1944.* If a manufacturer had a list price under section 6 for a rebuilt part, other than a rebuilt motor, prior to March 30, 1944, he may continue to price this part under that section, or, if he so elects, he may estab-

lish a price for such a part under paragraph (c) below.

(b) *All other rebuilt parts, except rebuilt motors.* All rebuilt parts, other than rebuilt motors, which are not covered by paragraph (a) shall be priced in accordance with paragraph (c) below. Parts covered by this paragraph are those having non-list prices under section 7 or 14 prior to March 30, 1944, and those for which list or non-list prices are established for the first time on or after March 30, 1944.

(c) *Method for determining prices for rebuilt parts, other than rebuilt motors.* The price for a rebuilt part other than a rebuilt motor, except as provided in paragraph (a), shall not exceed a percentage of the net retail list price suggested by a manufacturer for the same part (or lacking the same part, the nearest equivalent part) when new which is a maximum retail list price under Maximum Price Regulation 453^{1a}. These percentages are:

(1) *For a sale to a user:* 75%.

(2) *For a sale to a wholesaler or retailer:* 65%.

(d) *Prices under paragraph (c) as list prices—(1) Manufacturer's list price.* A price established under paragraph (c) will be a list price if the previous price for the part was a list price under section 6. Other prices under paragraph (c) may be established as list prices if the rebuilder elects to establish these prices as list prices.

(2) *Resale list prices.* If the rebuilder had suggested resale list prices in connection with a previous list price for the part for which he is establishing a list price under subparagraph (1) above, he shall continue to suggest resale list prices for this part. These resale list prices shall be determined in accordance with section 9 (b) (1). If he wishes to establish suggested resale list prices for the first time, he may do so for the type of sale for which rebuilders customarily had in effect suggested resale prices on March 31, 1942. The resale list prices, however, shall be established only in connection with list prices established under subparagraph (1) above, and shall be determined in accordance with subparagraph (1), (2) or (3) of section 9 (b). Any suggested resale list price determined in accordance with this subparagraph must in no event exceed 85% of the retail net price suggested by a manufacturer for the same part (or lacking the same part, the nearest equivalent part) when new which is a maximum retail price under Maximum Price Regulation 453.

(3) *Filing, approval, charging and notification of list prices determined under paragraphs (c) and (d).* Any list price

^{1a} 8 F.R. 11582, 13256, 15458.

and applicable resale list prices determined under paragraphs (c) and (d) are subject to the filing provisions of section 6 (c); the reporting, approval and charging provisions of paragraphs (c), (d) and (e) of section 9; and to the notice requirements of section 10.

(e) *Prices under paragraph (c) as non-list prices.* When a rebuilder's price under paragraph (c) is a non-list price, this price may be charged and payment received at such price subject to the reporting requirements of section 12 (b).

(f) *Exchange allowances.* Any part or other commodity exchanged, transferred or traded-in in connection with the sale of a rebuilt part under paragraph (c) is a part payment of the price for the rebuilt part. A reasonable allowance for the part or other commodity exchanged, transferred or traded-in must be given to the purchaser of the rebuilt part.

[See 8a added by Am. 4, effective 3-30-44]

ARTICLE III—METHODS FOR ESTABLISHING AND REPORTING MAXIMUM PRICES

SEC. 9. *Procedure for establishing new list prices.*—(a) *Determining a new list price.* A new list price for a part shall be a price not in excess of the sum of the manufacturer's costs for the part determined in accordance with section 13, plus the following:

(1) A percentage markup not in excess of the percentage markup he included in the price for the same part on March 31, 1942; or

(2) Where he did not sell or offer for sale the same part on March 31, 1942, a percentage markup not in excess of the percentage markup he included in the price on March 31, 1942, for the similar part (as defined in Section 21) most nearly like it; or

(3) Where he did not sell or offer for sale the same or a similar part on March 31, 1942, a percentage markup not in excess of the percentage markup he included on March 31, 1942, in the price for the part of the same type having the closest total costs to the part being priced. Examples of types for the purpose of this paragraph are engine parts, carburetor parts, electrical parts, etc.

(4) Where he cannot establish a markup in accordance with subparagraph (1), (2) or (3) because he did not sell or offer to sell to the class of purchaser for which a price is being established, a percentage markup in line with the first applicable markup which may be established in accordance with subparagraph (1), (2) or (3) for another class of purchaser and adjusted to reflect the difference between the classes of purchasers. This in-line and adjusted markup shall be determined by considering all factors which normally determined markup on March 31, 1942, including factors which caused markups to vary for different classes of

purchasers, such as sales volume and competitors' prices.

[Subparagraph (4) added by Am. 4, effective 3-30-44]

To this price the manufacturer must apply the same differentials, discounts, allowances, rebates, and deductions which he had in effect on March 31, 1942, as to the particular part named in paragraph (1), (2), or (3), the percentage markup of which is added to costs. Where the manufacturer establishes a markup in accordance with subparagraph (4) he shall establish differentials, discounts, allowances, rebates and deductions to apply to the price which includes this mark-up. He shall, however, establish them by modifying his March 31, 1942 differentials, discounts, allowances, rebates and deductions in accordance with his March 31, 1942 pricing policy.

[Above paragraph amended by Am. 1, 8 F.R. 12237, effective 9-2-43, and Am. 4, effective 3-30-44]

(b) *Determining of applicable suggested resale list prices.* If the manufacturer had suggested resale list prices for a part on or after March 31, 1942, or customarily names suggested resale prices in connection with his price list, he shall name suggested resale prices for any parts for which new list prices are established in accordance with sections 6 and 9. If a manufacturer now wishes to suggest resale prices for the first time, he may do so for a part for which new list prices are established in accordance with section 6 (b). The suggested resale prices shall be determined as follows:

(1) If the manufacturer has had suggested resale prices for the part at any time since January 1, 1932, the relationship of the new suggested resale prices to the new list price for the manufacturer's sale of the part shall be the same as the relationship that existed under the most recent price list.

(2) If the manufacturer has not had suggested resale prices for the same part at any time since January 1, 1932, but has had suggested resale prices for other parts of the same type, the relationship of the new suggested resale prices to the new list price for the manufacturer's sale of the part shall be the same as the relationship that existed for the part of the same type having the closest list price under the most recent price list. Examples of types for the purpose of this paragraph are engine parts, carburetor parts, electrical parts, etc.

(3) If the suggested resale list prices cannot be determined under (1) or (2), they will be prices in line with the prices previously charged by resellers for the same part of the same manufacturer, or, in the absence of such prices, in line with suggested resale prices for the same or similar part named by other manufacturers.

(c) *Notice to Office of Price Administration of new list prices.* After a man-

ufacturer has determined a new list price and suggested resale prices in accordance with paragraphs (a) and (b) above or section 8a he shall file a report with the Office of Price Administration as follows:

(1) *For new list prices for new parts.* The report shall be filed with the National Office of the Office of Price Administration at Washington, D. C., and shall be signed by the manufacturer or a responsible official of the manufacturer and shall contain the following information:

(i) Description of the part and its number or other designation.

(ii) The new list price and suggested resale prices and the previous list price and suggested resale prices, if any, for each class of purchaser.

(iii) The newly determined unit costs and the unit costs included in the previous list prices, if available.

(iv) If not previously filed, all the other factors used in determining the new list price and suggested resale prices such as markup, discounts, differentials, freight, and other allowances and other price determining factors.

(v) A statement that the new list price was determined in accordance with section 9 (a) and that the new suggested resale prices were determined in accordance with section 9 (b) and that the unit costs included in such prices were determined in accordance with section 13.

(2) *For new list prices for rebuilt parts.* The report shall be filed with the Office of Price Administration regional office for the region in which the manufacturer's principal place of business is located and shall be signed by the manufacturer (rebuilder) or a responsible official of the manufacturer, and shall contain the following information:

(i) Description of the part and its number or other designation.

(ii) The new list price and suggested resale prices and the previous list price and suggested resale prices, if any, for each class of purchaser.

(iii) Whether the new list price and suggested resale prices are established under section 6 or 8a (c) and (d). If the prices are under section 6, the justification should be given for pricing under such section.

(iv) Where the new list price and the suggested resale prices are established under section 6 and 9 (a), the newly determined unit costs and the unit costs included in the previous list prices, if available.

(v) Where the new list price and suggested resale prices are established under paragraphs (c) and (d) of section 8a, the retail list price which is established un-

der Maximum Price Regulation 453 as the maximum retail list price of the same part (or lacking the same part, the nearest equivalent part) when new.

(vi) All the other factors used in determining the new list price and suggested resale prices.

(vii) A statement that the new list price was determined in accordance with section 8a (c) or 9 (a) (whichever is applicable) and the new suggested resale prices were determined in accordance with section 8a (d) or 9 (b) (whichever is applicable).

(d) *Action by the Office of Price Administration.* The new list prices set forth in reports filed in accordance with paragraph (c) shall become maximum prices, and the suggested resale prices shall be considered approved, if approved by the Office of Price Administration, or if not disapproved by that agency within thirty days after the receipt of the reports. If the Office of Price Administration shall later determine that such prices were not computed in accordance with the requirements of sections 6, 9 and 13, or sections 8a and 9, they may at that time be disapproved, but such disapproval shall not be retroactive as to any deliveries completed prior to the date of the disapproval. If any price is disapproved because in some respect it is not determined in accordance with these sections, the manufacturer shall recompute the new list price in accordance with these sections and the suggestions contained in the notice of disapproval, and report the revised list price in accordance with paragraph (c) above.

[Paragraphs (b), (c), and (d) amended by Am. 2, 8 F.R. 15456, effective 11-15-43, and Am. 4, effective 3-30-44]

(e) *When the new list prices may be charged.* Upon the mailing of the reports in accordance with paragraph (c) above, the new list prices contained in such reports may be charged and any one of the following actions regarding payment may be followed:

(1) Accept payment in the amount of the existing maximum price and collect or refund the difference between the existing maximum price and the proposed maximum price upon the latter being approved or not disapproved within the thirty-day period.

(2) Accept payment in the amount of the proposed maximum price and if such a price is disapproved, collect or refund the difference between the existing maximum price and the disapproved proposed price.

(3) Do not accept payment for any deliveries until the proposed maximum price is approved or the thirty-day period elapses without disapproval. If such a price is approved or not disapproved, accept payment at the new price for the deliveries made on and subsequent to the filing of the reports and for all deliveries thereafter. If the proposed price is disapproved, accept payment for the deliveries made on and subsequent to the

filing of the reports at the existing maximum price.

[Paragraph (e) amended by Am. 2, 8 F.R. 15456, effective 11-15-43]

SEC. 10. Notice to purchasers of maximum resale list prices—(a) *Furnishing of suggested resale price lists.* A manufacturer whose maximum prices are the list prices which he had in effect on March 31, 1942, and who had suggested resale list prices in effect on that date shall furnish to his customers, to the extent they do not already have the same, copies of catalogs, price lists, and discount sheets in which are contained his resale list prices. A manufacturer whose prices are list prices placed in effect after March 31, 1942, with the authorization of the Office of Price Administration, or list prices established in accordance with sections 6 (b) and 9, or sections 8a and 9, and who also established suggested list prices, shall furnish to his customers, to the extent they do not already have the same, copies of catalogs, price lists, and discount sheets in which are contained his resale list prices. A manufacturer who reestablishes as a new list price for a part a list price in effect during the period January 1, 1932, to March 31, 1942, (in accordance with section 6) may, in lieu of furnishing catalogs, price lists, and discount sheets containing resale prices, notify his customers of such resale prices by stating these prices on the invoices which he furnishes to such customers in connection with the sale of the part. A manufacturer, in lieu of furnishing catalogs, price lists, and discount sheets to classes of customers to whom he would not ordinarily furnish such material, may notify such customers of the resale prices for a part by stating such resale prices on the invoice he furnishes to these customers in connection with the sale of a part. A manufacturer may also notify customers by invoices of new list prices approved, or not disapproved within thirty days from filing in accordance with section 9, or new list prices authorized under section 16, pending the issuance of new price lists or catalogs or supplements to existing catalogs or price lists. When the suggested resale prices are stated upon invoices in accordance with this paragraph, they shall be indicated by the appropriate description as "Retail Maximum", "Wholesale Maximum", etc. A manufacturer need not furnish catalogs, price lists and discount sheets to a customer for parts which the latter, as a manufacturer, resells under his own trade name or for which he includes his parts or catalog numbers and his suggested resale prices

in catalogs or price lists that he issues to the automotive trade. Resale price lists of the type described in this paragraph are called "Approved resale price lists" in paragraph (b).

(b) *Statements to be furnished to a customer by a manufacturer having a suggested resale price list in effect.* A manufacturer having in effect an approved resale price list (of a type described in paragraph (a)) shall furnish to all customers a statement substantially the same as the following statement, to which is affixed the signature, or a facsimile thereof, of the manufacturer, or a responsible official of the manufacturer.

The suggested resale prices, discounts and allowances in our catalog(s), price list(s), and discount sheet(s) dated _____ (or "numbered _____") are the maximum resale prices for the parts listed therein, in accordance with Maximum Price Regulation 453 (Wholesalers' and Retailers' Maximum Prices for Automotive Parts) of the Office of Price Administration.

A sample copy of the statement issued by the manufacturer should be forwarded to the Office of Price Administration, Washington, D. C. A rebuilder of used parts, however, should furnish the sample copy to the Office of Price Administration regional office for the region in which his principal place of business is located.

[Paragraphs (a) and (b) amended by Am. 2, effective 11-15-43 and Am. 4, effective 3-30-44]

(c) *When notice shall be given to customers.* Manufacturers shall act as required in paragraphs (a) and (b) as soon as practicable, but not later than October 1, 1943 with regard to price lists in effect before the effective date of this regulation. Such action shall not be taken regarding a list price established after the effective date of the regulation until the new list price has been approved in writing or thirty days have elapsed from the date the report regarding it is received by the Office of Price Administration when the report is neither approved nor disapproved in writing.

[Paragraph (c), formerly (d), amended by Am. 1, 8 F.R. 12237, effective 9-2-43, and Am. 4, effective 3-30-44; former (c) revoked and former (d) redesignated as (c) by Am. 2]

SEC. 11. Procedure for obtaining exemption from requirement of establishing new maximum list prices. The manufacturer who seeks an exemption from the requirements of establishing a new list price as required by section 6 (b) should request this exemption from the Office of Price Administration, Washington, D. C., with the exception that a rebuilder of used parts should make this request to the Office of Price Administration regional office for the region in which his principal place of business is located. In his request he should include a showing that the order for

the part is small and nonrecurrent or other reasons why neither the order nor the special run is likely to be repeated. He shall also include in his request his list price or a non-list price computed in accordance with section 12. Upon the mailing of his request, he may charge his previously established list price or non-list price, but he must not accept payment until he is either notified in writing that his request has been approved or thirty days have elapsed from the date the request is received by the Office of Price Administration without any notification of disapproval. If the request is approved, or is not disapproved, within the thirty day period, the manufacturer may then accept payment at the proposed price for deliveries made prior to approval or the end of the thirty day period and for all deliveries made thereafter. If the request is disapproved the manufacturer shall establish a new list price in accordance with section 9.

[Sec. 11 amended by Am. 4, effective 3-30-44]

SEC. 12. *Procedure for establishing new maximum non-list prices*—(a) *Determining new non-list prices.* A new non-list price shall be a price not in excess of the manufacturer's cost for the part determined in accordance with section 13, plus the following:

(1) A percentage markup not in excess of the percentage markup he included in the price for the part on March 31, 1942; or

(2) Where he did not sell or offer for sale the same part on March 31, 1942, a percentage markup not in excess of the percentage markup he included in the price for the similar part (as defined in section 21) most nearly like it; or

(3) Where he did not sell or offer for sale the same or a similar part on March 31, 1942, a percentage markup not in excess of the percentage markup he included in the price for the part of the same type having the closest total costs to the part being priced. Examples of types for the purpose of this paragraph are engine parts, carburetor parts, electrical parts, etc.

(4) Where he cannot establish a markup in accordance with subparagraph (1), (2) or (3) because he did not sell or offer to sell to the class of purchaser for which a price is being established, a percentage markup in line with the first applicable markup which may be established in accordance with subparagraph (1), (2) or (3) for another class of purchaser and adjusted to reflect the differences in the classes of purchasers. This in-line and adjusted markup shall be determined by taking into consideration all factors which normally determined markup on March 31, 1942, including factors which caused markups to vary for different classes of purchasers, such as sales volume and competitors' prices.

[Subparagraph (4) amended by Am. 4, effective 3-30-44]

To this price the manufacturer must apply the same differentials, discounts, allowances, rebates, and deductions which he had in effect on March 31, 1942, as to the particular part named in subparagraph (1), (2) or (3), the percentage markup of which is added to costs. Where the manufacturer establishes a markup in accordance with subparagraph (4), he shall establish differentials, discounts, allowances, rebates, and deductions to apply to the price which includes this markup. He shall, however, establish them by modifying his March 31, 1942, differentials, discounts, allowances, rebates and deductions in accordance with his March 31, 1942, pricing policy.

[Above paragraph amended by Am. 1, 8 F.R. 12237, effective 9-2-43 and Am. 4, effective 3-30-44]

(b) *Notice to Office of Price Administration when a non-list price computed under paragraph (a) above or section 8a is higher than the price previously charged subsequent to March 31, 1942.* If the non-list price determined under paragraph (a) above or under section 8a is higher than the price previously charged subsequent to March 31, 1942, the manufacturer shall file with the Office of Price Administration within ten days after making the first sale or delivery at such an increased price a report in accordance with the following procedure:

(1) *For new non-list prices for new parts.* The report shall be filed with the National Office of the Office of Price Administration at Washington, D. C., and shall be signed by the manufacturer or a responsible official of the manufacturer and shall contain the following information:

(i) A description of the part, its number or other identification.

(ii) The price on its sale prior to its sale at the increased price.

(iii) The new non-list price.

(iv) A statement that the new non-list price was determined in accordance with paragraph (a) above, and section 13.

(v) An explanation of the price increase.

(2) *For new non-list prices for rebuilt parts.* The report shall be filed with the Office of Price Administration regional office for the region in which the manufacturer's principal place of business is located, and shall be signed by the manufacturer (rebuilder) and shall contain the following information:

(i) A description of the part, its number or other identification.

(ii) The price on its sale prior to its sale at the increased price.

(iii) The new non-list price.

(iv) The retail list price which is established under Maximum Price Regulation 453 as the maximum retail list price of the same part (or lacking the same part, the nearest equivalent part) when new.

(v) A statement that the new non-list price was determined in accordance with section 8a.

[Paragraph (b) amended by Am. 4, effective 3-30-44]

SEC. 13. *Procedure for determining costs to be used by manufacturer in determining new maximum list or new maximum non-list prices.* When costs must be determined by a manufacturer in connection with a price determining method which must be followed in determining list or non-list prices in accordance with the provisions of this regulation, except where the determining of costs for the manufacturing of a part in a new or converted plant requires the procedure stated in section 14, the following cost determining method shall be followed:

(a) *Determination of costs when manufacturer is a producer.* When the manufacturer is a producer he shall use the same cost determining method he used on March 31, 1942.

(1) To the extent that the cost determining method includes or is based on direct labor costs, the manufacturer shall use labor rates in effect on March 31, 1942.

(i) "Labor rates in effect on March 31, 1942" are the labor rates prevailing on that date in the manufacturer's plant for each classification of labor. If the manufacturer employs labor of a particular classification not employed in such plant on March 31, 1942, he shall apply the rate prevailing on that date for such classification in the locality in which the manufacturing is to be performed. If labor of such classification was not employed on March 31, 1942, in such locality, the manufacturer shall apply the rate prevailing on that date for the nearest skill in the nearest comparable locality, as accurately as he is able to determine the same by reasonably diligent inquiry.

(ii) The permitted labor cost to be used in the pricing formula provided in this paragraph (a) is to be determined by applying to the clock hours of each classification of labor estimated to be required on the basis of previous production experience, or, where an estimate is not used, to the clock hours actually required, the hourly rate for such classification in effect on March 31, 1942. If on March 31, 1942, an average rate was used, an average rate may be applied if the labor rates and the method of computing the average in effect on March 31, 1942, are used. If individuals have been or are promoted from one classification to another because of increased efficiency, the higher rates may be used.

(iii) The amount of overtime (estimated, if necessary) required to be used in excess of that provided for in the overhead or machine hour rate may be added

to the cost of labor. In no event shall any markup, overhead, or profit be applied to that part of the labor cost which is in excess of the straight-time cost, except that no adjustment of the overhead or the machine hour rates in effect on March 31, 1942, shall be required.

[Subparagraph (1) amended by Am. 4, effective 3-30-44]

(2) To the extent that the cost determining method includes or is based on prices paid for materials, the manufacturer shall use the prices which the manufacturer's supplier had in effect to him or his class of purchaser on March 31, 1942, or if the supplier did not have a price in effect on that date for a certain commodity, the price he first had in effect after that date. However, if the Office of Price Administration has established a lower maximum price for the sale of that material to the manufacturer, such lower price shall govern. The manufacturer's supplier shall be

(i) His March 31, 1942, supplier of the material; or

(ii) Lacking a March 31, 1942 supplier of the material, his most recent supplier of the material subsequent to March 31, 1942. If neither of these exists, it shall be his proposed supplier.

For the purposes of this subparagraph (2), if the manufacturer shall receive a written statement from the seller that the material is being sold at a price which is not in excess of the maximum price established by the Office of Price Administration, and if the manufacturer shall have no cause to doubt the accuracy of the statement, the price as stated by the seller shall be deemed not to be in excess of the maximum price established by the Office of Price Administration for that material. The price the manufacturer shall use for material composed in whole or in part of silver shall be the current price not to exceed the applicable maximum price. The term "material prices" includes the prices for raw materials or products which have been processed or fabricated to any degree. However, costs for automotive parts defined in section 1 (c) (1) which are purchased from a supplier shall be the prices paid for such parts, not to exceed the applicable maximum prices established by this regulation.

[Subparagraph (2) as amended by Am. 2, 8 F.R. 15456, effective 11-15-43]

(3) To the extent that the cost determining method includes factory overhead, the manufacturer shall use factory overhead rates in effect on March 31, 1942.

[Subparagraph (3) added by Am. 4, effective 3-30-44. Former (3) and (4) redesignated (4) and (5), respectively]

(4) To the extent that the cost determining method includes or is based on prices paid for subcontracted services, whether machinery services or otherwise, or perishable tools, dies, molds, patterns, or work-holding devices, the manufacturer shall use the actual prices paid or the prices to be paid, which are estimated by his supplier if he has no reason to believe that these prices exceed the applicable maximum prices,

If a price estimated by a supplier is not available, the manufacturer shall use his own estimate of the price to be paid which he has no reason to believe exceeds the applicable maximum price.

(5) To the extent that the cost determining method includes freight rates paid, the manufacturer shall use freight rates in effect on March 31, 1942, or current actual freight rates, whichever are lower, for the mode of transportation actually used.

[Subparagraph (5), formerly (4), amended by Am. 4, effective 3-30-44]

(b) *Determination of costs when manufacturer is not a producer.* When the manufacturer is not a producer of the part he sells, he shall determine his costs by dividing the amount of the invoiced charges, including freight-in, for the units of the part he purchased during the three months preceding the date he determines his costs by the number of units of the part he purchased during the same three months' period and which are included on the same invoices. The result obtained from this division shall be the costs to be included in the pricing method of either section 9 or section 12 by the manufacturer who does not produce the part he sells. If the manufacturer did not make any purchase or a representative number of purchases during the three months immediately preceding the date these costs are determined, he shall use the invoiced charges to him, including freight-in, for the three months' period closest to the date he determines these costs in which he made a representative number of purchases. If the manufacturer did not make any purchases during either of these periods, he shall determine his costs by dividing the invoiced costs including freight in, of the units of the part for which invoices have been received by him, by the number of the units of the part included on such invoices, or where there are no invoices, by using the unit price at which the supplier agrees, either under contract or by quotation, to sell such a part to the manufacturer.

[Above sentence added by Am. 2, 8 F.R. 15456, effective 11-15-43]

(c) *Determination of costs when manufacturer produces some of the units and purchases the remainder of the units of the part he sells.* When the manufacturer produces some of the units and purchases the remainder of the units of a part he sells, he shall determine his costs by:

(1) Determining his costs for the units he produces in accordance with paragraph (a) and by determining his costs for the units he purchases in accordance with paragraph (b).

(2) Multiplying each of these costs by the respective percentage which the units produced and the units purchased each constituted of the total units produced and purchased during the three months' period preceding the date he determines his costs or during the three months' period closest to the date he determines these costs in which he purchased and produced a representative number of units. Where a manufac-

turer determines his costs in accordance with paragraph (b) by using the method permitted when he has not purchased any units of the part during either of the three months' periods described in that paragraph, for the purpose of this subparagraph, he shall multiply the costs determined in accordance with paragraph (a) and those determined in accordance with paragraph (b) by the respective percentage he estimates that the units produced and the units purchased will each constitute of the total units he estimates he will produce and purchase during a representative three months' period closest to the date he determines these costs.

[Subparagraph (2) amended by Am. 4, effective 3-30-44]

(3) Adding together the result of each of the multiplications required by subparagraph (2) to obtain a total which shall be the costs to be included in the pricing method of either section 9 or 12 by the manufacturer who produces some and purchases the remainder of the units of a part he sells.

SEC. 14. *Procedure for establishing maximum non-list prices for parts which cannot be priced under section 6 or 7.* If the manufacturer is not able to establish a maximum price in accordance with section 6 or 7 because he produces the part in a new or converted plant or because he was not engaged as a manufacturer as defined in section 1 (b) (1) of this regulation during a period on or after March 31, 1942, which would enable him to establish a maximum price in accordance with section 6 or 7, or for any other reason, he shall establish a maximum non-list price in accordance with the following:

[Above paragraph amended by Am. 4, effective 3-30-44]

(a) *Price determining method—(1) Where the manufacturer is a producer.* Where the manufacturer is a producer he shall establish a price determining method and rates for use therein (labor rates, machine hour rates, overhead rates, and profit rates, etc.) for the determination of a non-list price for such part conforming so far as possible to the provisions of section 12 and section 13. The overhead rate so established shall be a reasonable rate with respect to the operations to be performed, and shall, so far as possible, be based on costs for items of overhead in effect on March 31, 1942. In the case of a newly constructed plant, however, the manufacturer may use as a base date for all purposes the date upon which price quotations were first made or upon which production was started in the plant, whichever is earlier, and shall use labor rates for each classification of labor prevailing on that date in the locality of the plant determined in accordance with section 13 (a) (1), with the above base date substituted for the March 31, 1942, date used therein.

(2) *Where the manufacturer is not a producer.* Where the manufacturer is not a producer he shall establish a price

by determining costs for the part in accordance with section 13 (b), and adding to such costs a markup as comparable as possible to the markup he would have added if he were able to establish a price in accordance with section 9 or 12, taking into consideration discounts and allowances to be applied for different classes of purchasers.

(b) *Notifying the Office of Price Administration*—(1) *Where the manufacturer is a producer.* Where the manufacturer is a producer he shall file a report with the Office of Price Administration, Washington, D. C., except that a rebuilder of used parts shall file it with the Office of Price Administration regional office for the region in which his principal place of business is located, containing:

[Subparagraph (1) amended by Am. 4, effective 3-30-44]

(i) The price determining method and rates used in establishing prices as provided in paragraph (a);

(ii) A description of the parts for which the prices are determined;

(iii) A representative sample of prices determined in accordance with the pricing method;

(iv) An explanation of the circumstances necessitating pricing under this section;

(v) Relevant data bearing on the price determining method and rates to be used, including evidence that such method and rates were calculated as provided in paragraph (a);

(vi) A statement of whether or not quantity production has been achieved or is anticipated;

(vii) A brief description of the newly constructed or converted plant, if any; and

(viii) Any other data which the Office of Price Administration may in writing require.

(2) *Where the manufacturer is not a producer.* Where the manufacturer is not a producer he shall file a report with the Office of Price Administration, Washington, D. C., containing:

(i) A description of the part for which a price is being established;

(ii) An explanation of the circumstances necessitating pricing under this section;

(iii) The costs for the part determined in accordance with section 13 (b);

(iv) The amount of the markup to be added to the costs, together with a percentage breakdown of the expenses and profit provided for;

(v) The discounts and allowances to be applied to the price for each class of purchaser; and

(vi) Any other data which the Office of Price Administration may in writing require.

(c) *Action by the Office of Price Administration.* If the Office of Price Administration approves the prices, or the pricing method and the prices which result from its use, or fails to disapprove them within thirty days after receiving the report, the maximum non-list prices for the parts involved shall be the prices reported, or the prices calculated in accordance with the price determining

method reported, until new prices or a new pricing method is proposed and reported either upon the initiative of the manufacturer or as required by the Office of Price Administration. The prices previously filed shall not be regarded as fixed prices, but may be modified pursuant to the new prices or the new price determining method submitted. Prices determined in accordance with this section may be quoted or charged for thirty days prior to filing the report required by paragraph (b) and may be quoted or charged thereafter until the Office of Price Administration disapproves such prices, or the price determining methods from which these prices may be determined, or requires a new filing under paragraph (b). Either one of the following actions may be followed with respect to accepting payment at these prices:

(1) Accept payment at such prices and refund or collect the difference between such prices and the prices which become the established maximum prices or which are determined in accordance with the established price determining methods.

(2) Do not accept payment for any deliveries until maximum prices are established or price determining methods are established for the determination of maximum prices. Then accept payment for all deliveries at the established prices.

[Paragraph (c) as amended by Am. 2, 8 F.R. 15456, effective 11-15-43]

(d) *Refiling of prices or price determining method.* No later than six months after the last filing, in accordance with this section, of prices or a price determining method which was not disapproved by the Office of Price Administration, the manufacturer shall file a report with the Office of Price Administration, Washington, D. C., except that a rebuilder of used parts shall file this report with the Office of Price Administration regional office for the region in which his principal place of business is located, containing:

[Paragraph (d) amended by Am. 4, effective 3-30-44]

(1) A comparison of his total actual direct and indirect costs for the period under review, with the estimates on which the prices or price determining method being used was based; and

(2) So far as available for each of the representative items for which prices were previously charged, the current price being charged and a comparison of the actual direct and indirect unit costs with the estimates on which the price previously charged was based.

(e) *Revision of prices or price determining method.* The manufacturer may at any time file, and the Office of Price Administration may at any time require the filing of, revised prices or a revised pricing method, together with a representative sample of prices determined in accordance with such method. The provisions of paragraph (c) are applicable to such filing.

SEC. 14a. *Regional office authorization.* Regional offices are authorized to take any and all action that may be necessary in connection with the processing

and approving or disapproving of notices of proposed new list prices and of new non-list prices and requests for exemption from the requirement of establishing new list prices, filed in connection with rebuilt parts under the provisions of Article III of this regulation.

[Sec. 14a added by Am. 1, 8 F.R. 12237, effective 9-2-43]

SEC. 14b. *Emergency service charges.* Notwithstanding any other provision of this regulation, any manufacturer may add to the maximum price for a part when sold under a war contract or any subcontract thereunder, the extra material cost resulting from his purchasing materials, in an emergency and at the request of the customer, from a source more expensive than the current usual source. Also, any manufacturer may add to the maximum price for a part his extra transportation cost resulting from his shipping the part or materials used in the production of the part, in an emergency and at the request of the customer, by means more expensive than the current usual method of shipping. No markup, overhead or profit shall be applied to the extra material or transportation cost. The extra charges allowed by this section shall be billed separately on the invoice, and a copy of the invoice must be immediately forwarded to the Machinery Branch, Office of Price Administration, Washington, D. C.

[Sec. 14b added by Am. 4, effective 3-30-44]

[NOTE: Revised Supplementary Order No. 34 (8 F.R. 12404) permits, under certain conditions, the addition of extra packing expenses to maximum prices on sales to procurement agencies of the United States.]

ARTICLE IV—MISCELLANEOUS

Sec. 15. *Federal and State taxes.* (a) Any tax levied by any statute of the United States or statute or ordinance of any state or subdivision thereof which the manufacturer on March 31, 1942, added to the price paid by the purchaser shall not be included in the maximum price but may be collected by the manufacturer in addition to the maximum price if such tax is stated separately from the purchase price, except that such tax need not be stated separately if it is measured by the manufacturer's cost of the part.

(b) Any tax upon the sale or delivery of a part and any compensating use tax upon a part levied by any statute of the United States or statute or ordinance of any state or subdivision thereof and becoming effective on or after March 31, 1942, may also be collected by the manufacturer making such taxable sale or delivery in addition to the maximum price if such tax is stated separately from the purchase price, unless the manufacturer had increased his price on or before March 31, 1942, to reflect such new or increased tax, except that such tax need not be stated separately

if it is measured by the manufacturer's cost of the part.

(c) (1) Any separately stated tax paid by a manufacturer on a part purchased for resale may be collected by such manufacturer in addition to the maximum price upon the resale of such part unless the price in effect on March 31, 1942, reflected the amount of such tax.

(2) Any tax paid by a manufacturer upon the purchase of a component of a part which can be delivered separately from the principal assembly of the complete part may also be collected by the manufacturer upon the sale of the part as well as upon the sale of the component separately, if such tax is stated separately from the purchase price, unless the manufacturer's price for the component or the part in effect on March 31, 1942, reflected the amount of such tax.

(d) A tax on transportation of parts imposed by section 620 of the Internal Revenue Act of 1942, for the purpose of determining the applicable maximum price, shall be treated as a cost of transportation. It shall not be treated as a tax for which a charge may be made in addition to the maximum price.

SEC. 16. *Applications for adjustment and petitions for amendment*—(a) *Application for adjustment*—(1) *Application by a manufacturer of a part*—(i) *Who may receive adjustment*. The manufacturer's maximum price for a part established by this regulation may be adjusted only in the case of an essential manufacturer of an essential part. An essential part is one which contributes to the successful prosecution of the war. An essential manufacturer is one whose output or supply of a part cannot be reasonably expected to be replaced at prices lower than the proposed adjusted maximum price. In addition, any person who has entered into, or proposes to enter into, a war contract (as defined in section 21), or a subcontract thereunder, is an essential manufacturer of an essential part.

(ii) *When adjustment may be granted*—(a) *Individual adjustments*. An adjustment may be made in the maximum price of an essential manufacturer of an essential part upon the basis of information submitted by such manufacturer or of other information, and whenever it is found that the maximum price of the part is at such a level that (taking into account the cost thereof, the profits position of the manufacturer, and the nature of the business) production or supply of the part is impeded or threatened. The National Office, a regional office for the region in which the applicant's principal place of business is located, or a district office in that region authorized by order issued by such regional office, may make individual adjustments in maximum prices for rebuilt parts. The National Office only may make adjustments in maximum prices for new parts.

(b) *Group adjustments by regional offices*. The regional office for the region in which the principal places of business of a group of motor rebuilders are located may by a single order adjust the maximum prices for this group whenever it determines that in general the maximum prices of the group for rebuilt motors are such that their production is impeded or threatened and that it is not practicable to remove that impediment or threat by individual adjustment.

(iii) *Factors which may be considered*. The following factors are relevant to the consideration whether production or supply of the commodity is impeded or threatened:

(a) Whether, and by what amount, the maximum price is below or above the total unit costs (as defined in section 21) of the part less selling and administrative expenses properly allocable to the internal management of the business, and above or below the total unit costs of the part.

(b) Whether, and by what amount, the manufacturer's over-all profits (as defined in section 21), before income and excess profits taxes, are greater or less than his average over-all profits during the normal base period (as defined in section 21), increased by 7% of the additional capital investment contributed entirely by the manufacturer, or its stockholders, since the normal base period. Capital investment will be construed as including accumulated profits.

(c) Whether the proposed price is higher than the price prevailing in the industry.

(d) Whether the manufacturer's sales for the part represent only a very small part of his total sales.

(e) Whether the manufacturer previously sold the part below the total unit costs of the part.

[Subparagraphs (ii) and (iii) amended by Am. 4, effective 3-30-44]

(iv) *Application based on proposed wage or salary increase to be authorized by the National War Labor Board*. A manufacturer who believes that the conditions for an adjustment set forth in subparagraph (1) would exist if the National War Labor Board should grant a pending application for wage or salary increase may file an application for adjustment under the paragraph. Application for adjustment of maximum prices based on wage or salary increases requiring the approval of the National War Labor Board must also comply with Supplementary Order No. 28,⁸ which requires, among other things, that an application for adjustment in such case be filed within fifteen days after an application for a wage or salary adjustment has been filed with the National War Labor Board, or, in a disputed wage proceed-

ing, within fifteen days after the employer receives notification that the National War Labor Board has taken jurisdiction of the dispute.

(v) *Prices for deliveries made pending disposition of the application*. A manufacturer who has filed an application under this subparagraph (1) may contract or agree that deliveries made during the pendency of the application shall be at a specific price which is higher than the existing maximum price which the manufacturer wants to have adjusted. But no payment in excess of that existing maximum price may be received until the application is finally disposed of, and at that time the price received may not exceed the maximum price as determined by the Office of Price Administration.

A manufacturer who wishes to enter into such an arrangement must specifically state to the buyer the following:

(a) The maximum price for the part;

(b) The fact that an appropriate application for an adjustment of that maximum price has been filed with the Office of Price Administration;

(c) The fact that the specific price quoted by the manufacturer is subject to the approval of the Office of Price Administration.

(2) *Application by a manufacturer based upon an appropriate decrease of other prices*—(i) *Who may receive an adjustment under this paragraph*. Adjustments under this paragraph will be granted only in the case of an essential producer or supplier of an essential part. The meaning of these terms is explained in subparagraph (1) (i) of this section.

(ii) *When adjustment may be granted*. The Office of Price Administration may make an adjustment of the maximum price in any case in which the manufacturer agrees to make and (simultaneously with any increase in the maximum price that may be authorized under this subparagraph (2)) makes a reduction in the selling price of other commodities which will equal or exceed the total dollar amount of the adjustment granted under this subparagraph. Adjustments for rebuilders may be made by the National Office, the regional office for the region in which the applicant's principal place of business is located, or by a district office in that region authorized by order issued by such regional office. The National Office only shall make adjustments in maximum prices for new parts.

[Subparagraph (ii) amended by Am. 4, effective 3-30-44]

(iii) *What an application under this subparagraph must show*. An application for price adjustment under this subparagraph shall contain information indicating that the applicant is an essential manufacturer of an essential part and that if the proposed adjustment is granted, the gross dollar amount of sales of the parts affected by the ad-

⁸ 7 F.R. 9619; 8 F.R. 7256.

justment will not be greater than it would have been in the absence of the adjustment. In any case where such an adjustment is granted, the Office of Price Administration will require appropriate reports relating to the commodities affected.

(3) *Application by a manufacturer under a combination of both paragraphs (a) and (b).* A manufacturer who desires to apply for an adjustment under subparagraph (2) may, at the time he applies under that subparagraph, also apply under subparagraph (1), if the facts of his case entitle him to do so. In such case, the office considering his application will give the adjustment available under subparagraph (1) before applying subparagraph (2).

(4) *How the manufacturer proceeds in applying for an adjustment.* An application for an adjustment under this paragraph (a) shall be filed in accordance with Revised Procedural Regulation No. 1⁹ and shall be on Form OPA 694:478 set out in Appendix C. Copies of this form and of the instructions for completing it may be obtained from any district or regional office of the Office of Price Administration. Where application is made for an adjustment in the maximum price for a rebuilt part, the application shall be filed with the nearest regional office. All other applications for adjustment shall be filed with the Office of Price Administration, Washington, D. C.

[Subparagraph (4) amended by Am. 4, effective 3-30-44]

(5) *Nonapplication of Supplementary Order No. 9.* This paragraph (a) supersedes Supplementary Order No. 9¹⁰ (§ 1305.12), insofar as commodities covered by this regulation are concerned. Accordingly, applications for adjustment of a maximum price established by this regulation may not be filed under Procedural Regulation No. 6.¹¹

(6) *Adjusting applicable suggested resale prices.* Any manufacturer who receives, under this paragraph (a), an adjustment in a list price established as his maximum price under this regulation shall adjust his applicable suggested resale list prices, if any, as follows: He shall multiply the previously suggested resale list prices by a percentage to be determined by dividing his adjusted maximum list price by his maximum list price prior to adjustment.

[Subparagraph (6) added by Am. 2, 8 F.R. 15456, effective 11-15-43]

(b) *Petition for amendment.* Any person seeking an amendment of this regulation may file a petition for amendment in accordance with Revised Procedural Regulation No. 1. There shall be filed with such petition and incorporated therein all relevant data show-

ing the need for the proposed amendment and its conformity to the policy of this regulation and of the Emergency Price Control Act of 1942, as amended, to control inflation.

Sec. 17. *Transfer of business or stock in trade.* If the business assets or stock in trade of any business are sold or otherwise transferred after March 31, 1942, and the transferee carries on the business, or continues to deal in the same type of parts in the same competitive area and in an establishment separate from any establishment which he may previously have owned or operated, the transferee shall be subject to the same maximum prices as those to which his transferor would have been subject under this regulation if no transfer had taken place, and his obligation to keep records sufficient to verify these maximum prices shall be the same. SEC. 21. Definitions. (a) "New part" is a part which has not been previously used. The term includes unfinished parts not specifically excluded by section 1 (c) (1) and when sold by a manufacturer who is a regular producer of parts as defined in paragraph (g).

(b) "Normal base period" means the period 1936-1939. If the applicant for an adjustment under section 16 (a) shall demonstrate to the satisfaction of the Office of Price Administration either (1) that his entire industry was operating during the greater part of such period at an unusually depressed level or (2) that because of unusual conditions prevailing during that period, the manufacturer's business was operating during that period at an unusually depressed level in comparison to other businesses in the industry, and in addition that some other period prior to January 1, 1941, represents a proper normal base period, such other period may be considered. The mere fact that the rate of production or distribution has increased since 1936-1939 will not be deemed evidence that production or distribution during that period was at an unusually depressed level. If the manufacturer was not in business prior to January 1, 1941, he shall state that fact in his application.

(c) "Over-all profits" mean net profit resulting from the operation of all divisions of the manufacturer, before the creation of any reserves, except ordinary reserves for depreciation and bad debts, and before income and excess profit taxes. In the case of a subsidiary wholly owned by a parent corporation, over-all profits mean the consolidated net profit of the parent corporation and the wholly owned subsidiary, as well as the net profit of the subsidiary, before the creation of any reserves, except ordinary reserves for depreciation and bad debts, and before income and excess profit taxes.

(d) "Person" includes: an individual, corporation, partnership, association, or any other organized group; their legal successors or representatives; the United States, or any government, or any of its political subdivisions; or any agency of the foregoing.

(e) "Purchaser of the same class" refers to the practice adopted by the manufacturer in setting different prices for a part sold to different purchasers or kinds of purchasers (for example, governmental agency, public institution, dealer, service station, other individual wholesaler or retailer, mail order house), or for purchasers located in different areas or for different quantities or grades or under different conditions of sale.

(f) "Rebuilt part", which includes a reconditioned part, is a part which has been previously used and in which all

defective, worn, or missing components needing replacement or repair for satisfactory operation have been replaced or repaired, and is guaranteed to be rebuilt or equivalent to rebuilt and to render satisfactory service.

(g) "Producer", for the purpose of this regulation, means any person engaged in one or more operations in the fabrication, processing or assembly of a part described in section 1 (c) (1), and includes subcontractors as well as prime contractors.

[Paragraph (g) amended by Am. 4, effective 3-30-44]

(h) "Similar part". One part shall be deemed "similar" to another part, if the first has the same use as the second, affords the purchaser fairly equivalent serviceability, and belongs to a type which would ordinarily be sold in the same price line. In determining the similarities of such commodities, differences merely in style or design which do not affect use or serviceability, or the price line in which such commodities would ordinarily have been sold, shall not be taken into account.

(j) "Subcontract" means any purchase order or agreement to perform all or any part of the work, or to make or furnish any commodity, required for the performance of another contract or subcontract.

(k) "Total unit costs" mean:

(1) *When the manufacturer produces all the units of the part he sells*, the direct unit cost of labor, materials, and subcontracted services plus a proportion of factory overhead, administrative, selling and other expenses, based on actual operating experience, properly allocable to the production of the part, but does not include provisions for income or excess profit taxes. The allocation of factory overhead, administrative and other expenses must be made without reference to temporary fluctuations of production.

(2) *When the manufacturer purchases all the units of the part he sells*, the weighted average of his supplier's invoiced net prices, freight in and freight out, other direct costs, and selling and administrative expenses normally applicable to the handling of the commodity which are properly allocable to the manufacturer's total cost of doing business, exclusive of any provisions for income or excess profit taxes.

(3) *When the manufacturer produces some of the units and purchases the remainder of the units of the part he sells*, the result obtained by adding together the amounts derived from the multiplication of the total unit cost determined under subparagraph (1) for the units produced and the total unit cost under subparagraph (2) for the units purchased by the respective percentage each of these groups constitute of the total units sold by the manufacturer.

[Subparagraph (3) amended by Am. 4, effective 3-30-44]

(l) "Used part" is a part which has been previously used but which is not a rebuilt part as defined in paragraph (f).

(m) "War contract" means any contract with the United States, or any agency thereof, or with the government, or any agency thereof, of any country whose defense the President deems vital to the defense of the United States, under the terms of the Lend-Lease Act, for the sale of a machine or part purchased (1) for the ultimate use of the armed forces of the United States or for lend-lease purposes, or (2) by any government (or agency thereof) of any country whose defense the President deems vital to the defense of the United States under the terms of the Lend-Lease Act, or (3) for use in the production or manufacture of any commodity described in (1) or (2).

SEC. 22. Exemptions from this regulation. (a) All sales and deliveries of heavy axles pursuant to the prime contract between the United States and the Timken-Detroit Axle Company, Detroit, Michigan, Contract No. W-20-018-ORD-816 and Production No. T-10759, notwithstanding section 3 or any other section of this regulation, are exempt from the provisions of this regulation. This exemption does not extend to sales and deliveries pursuant to subcontracts under such prime contract.

[Sec. 22 added by Am. 3, 9 F.R. 1161, effective 1-28-44]

[NOTE: Supplementary Order No. 42 (8 F.R. 4968) provides that no price regulation of the OPA shall apply to sales or deliveries of any commodity or service made to Government agencies pursuant to secret contracts or subcontracts.]

Instructions for the Form—Instructions for the use of Adjustment Application Form for Automotive Parts. In preparing this application, please consider that the form is intended to cover the cases of all persons who are manufacturers as defined in Section 1 (b) (1) of Maximum Price Regulation No. 452. Therefore, you will find that some of the questions do not apply to your case. Moreover, you may find that some point

that is important in your case is not covered in the form. Adapt the form if this can be done, or state the information on a separate sheet if that will be clearer. If any difficulty is experienced in completing this form it may be taken to the nearest OPA district accountant who will give his assistance in its preparation.

Schedule C entitled "Unit Price and Cost Information" is subject to the following explanation:

1. *Price data*—(a) (1) *(List) (Non-list) price.* Please indicate whether the price is a list price or a non-list price by crossing out the term that does not apply.

2. *Dealers' commissions.* Where all dealers receive the same commission, use the full commission rate even if some sales are not subject to any commission. If several different rates affect the part covered by the application, use the rate that applies to the largest amount of sales.

3. *Trade discounts.* Deduct trade discounts at the average rate of discounts prevailing in your company for the part covered by this application.

(b) *Period to be covered.* Use a sufficient number of months prior to the date of the application to give an adequate understanding of the situation. Name the period in the allotted space and fill in commission rates or discounts.

2. *Unit cost data*—(a) (1) *In general.* A manufacturer who produces all the parts he sells should use Form (a). A manufacturer who purchases all the parts he sells should use Form (b). A manufacturer who produces some and purchases the remainder of the parts he sells should use both Forms (a) and (b) and should indicate under Form (a) or (b) what percentage each group of parts constituted of the total number of parts sold during the period for which the data are submitted. (2) Only actual costs for materials should be included in unit cost data.

(b) *Form (a).* For Form (a) the following should be noted: State separately any charges added to costs of materials.

Where standard costs are used, adjust costs for over- or under-absorption during the period to which the costs apply.

The cost data for the ceiling date may be recomputed if the part covered by the application was not manufactured on or about that date. In the recomputation apply the wage rates prevailing in your plant on the ceiling date and material cost of the same date.

Under Items (6), (7) and (8) include only costs borne by the manufacturer and not billed separately to the buyer.

Effective date. This regulation shall become effective September 2, 1943.

[Effective dates of amendments are shown in notes following the parts affected]

[MPR 452 originally issued August 19, 1943]

PART 1382—HARDWOOD LUMBER

[MPR 146, Incl. Amdts. 1-18]

APPALACHIAN HARDWOOD LUMBER

Section 1382.1 is amended; § 1382.11 (b) subparagraph (27) is redesignated (26); § 1382.12 (a) (1) (iii) through (c)

17 F.R. 3776.

is deleted; § 1382.12 (d) is redesignated (b) and amended by Amendment 18, effective March 30, 1944, so that Maximum Price Regulation No. 146 shall read as follows:

In the judgment of the Price Administrator, the prices of Appalachian hardwood lumber are threatening to rise to an extent and in a manner inconsistent with the purposes of the Emergency Price Control Act of 1942. The Price Administrator has ascertained and given due consideration to the prices of Appalachian hardwood lumber prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of said act. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected.

[Above paragraph added by Supplementary Order 61, 8 F.R. 12552, effective 9-11-43]

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, and in accordance with Procedural Regulation No. 1, issued by the Office of Price Administration, Maximum Price Regulation No. 146 is hereby issued.

* Statements of considerations are also issued simultaneously with amendments. Copies may be obtained from the Office of Price Administration.

78th Cong.; E.O. 9250, 7 F.R. 7871 and E.O. 9328, 8 F.R. 4681.

§ 1382.1 *Maximum prices for Appalachian hardwood lumber.* On and after June 1, 1942, regardless of any contract or other obligation, no person shall sell or deliver, and no person shall buy or receive in the course of business, any Appalachian hardwood lumber for direct-mill shipment at prices higher than the maximum prices established by this regulation, and no person shall agree, offer, or attempt to do any of these things.

[§ 1382.1 amended by Am. 18, effective 3-30-44]

§ 1382.2 *Less than maximum prices.* Lower prices than those set forth in Appendices A, B, and C, §§ 1382.11, 1382.12, and 1382.13, may be charged, demanded, paid, or offered.

§ 1382.3 *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of shipment; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after shipment. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to give the authorization.

The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

[§ 1382.3 amended by Am. 11, 8 F.R. 3056, effective 3-16-43, and Supplementary Order 50, 8 F.R. 10568, 14310, effective 7-27-43]

§ 1382.4 *Evasion.* (a) The price limitations set forth in this Maximum Price Regulation No. 146 shall not be evaded, whether by direct or indirect methods, in connection with an offer, solicitation, agreement, sale, delivery, purchase or receipt of or relating to Appalachian hardwood lumber, alone or in conjunction with any other commodity or by way of commission, service, transportation, or other charge or discount, premium or other privilege, or by tying-agreement or other trade understanding, or otherwise.

(b) Specifically, but not exclusively, the following practices are prohibited:

(1) Making credit terms more onerous than those in effect or available to the purchaser on October 1, 1941;

(2) Unnecessarily routing lumber through a distribution yard;

(3) Unreasonably refusing to ship an item of lumber except in a small quantity which entitles the seller to a premium;

(4) Unreasonably refusing to ship lumber on standard grades and in grade-rule range widths and lengths;

(5) Falsely or wrongly grading or invoicing lumber;

(6) Grading as a special grade lumber which normally is graded by the seller as a standard grade;

(7) Making charges for delivery which exceed the actual cost to the seller of such delivery (except as provided in § 1382.11 (f)).

(c) It is unlawful for any person to charge, receive or pay a commission for the service of procuring (including buying, selling, or locating lumber, or for any related service such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer of lumber which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any compensation, however designated, which is paid for the procurement of lumber. This prohibition has no application to the case of a bona fide employer-employee relationship where the employee serves only one employer, insofar as lumber procurement is concerned, and where the compensation paid by the employer is a fixed salary and is not based directly or indirectly on the quantity, price or value of the lumber in connection with which the service is rendered.

[Paragraph (c) added by Supplementary Order 37, 8 F.R. 2192, effective 2-23-43; amended by Supplementary Order 77, 8 F.R. 14310, effective 10-26-43]

§ 1382.5 *Records and reports.* (a) Every seller and purchaser subject to this Maximum Price Regulation No. 146 making sales or deliveries or purchases of Appalachian hardwood lumber to the value of \$500.00 or more in any one month, after June 1, 1942, shall keep for inspection by the Office of Price Administration for a period of not less than two years a complete and accurate record of each sale or delivery or purchase of Appalachian hardwood lumber, showing the date of purchase or sale, the name and address of the buyer and seller, the quantities and grades purchased or sold, and the price paid or received.

(b) Such persons shall keep such other records in addition to or in place of the records required in paragraph (a) of this section and shall submit such reports to the Office of Price Administration as that Office may from time to time require or permit.

§ 1382.6 *Enforcement.* (a) Persons violating any provision of this Maximum Price Regulation No. 146 are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided for by the Emergency Price Control Act of 1942.

[Paragraph (a) as amended by Am. 10, 7 F.R. 8384, effective 10-21-42]

(b) Persons who have evidence of any violation of this Maximum Price Regulation No. 146 or any price schedule, regulation or order issued by the Office of Price Administration or any acts or prac-

tices which constitute such a violation are urged to communicate with the nearest field or regional office of the Office of Price Administration or its principal office in Washington, D. C.

§ 1382.6a *Licensing.* The provisions of Licensing Order No. 1,⁴ licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation or schedule. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

[§ 1382.6a added by Am. 10, 7 F.R. 8384, effective 10-21-42; amended by Supplementary Order 72, 8 F.R. 13244, effective 10-1-43]

§ 1382.7 *Petitions for amendment.* Any person seeking an amendment of any provision of this Maximum Price Regulation No. 146 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1.

[Above paragraph as amended by Supplementary Order 26, 7 F.R. 8948, effective 11-4-42]

In treating with petitions for amendment or adjustment, consideration will not be given to log and bolt costs which are higher than the applicable maximum purchase prices for logs and bolts established in Revised Maximum Price Regulation 161 (West Coast Logs),⁵ or Maximum Price Regulations 313 (Prime Grade Hardwood Logs)⁶ and 348 (Logs and Bolts),⁷ or any revision or amendment of these regulations. This rule shall be followed regardless of whether the petitioner gets logs and bolts by purchasing them, logging his own standing timber, contracting for the logging of his own standing timber, or any other means. All petitions in any way based on the cost of logs or bolts must show the actual cost to the petitioner of logs and bolts received at his plant during the three months immediately prior to filing the petition, and the cost which would have been incurred by the petitioner if all of these logs and bolts had been purchased by him at ceiling prices. To figure these ceiling prices the petitioner should refer to the regulation which fixes the maximum prices for purchases and sales of the kinds of logs and bolts received at his plant.

[NOTE: Procedural Regulation No. 6 (7 F.R. 5087, 5665; 8 F.R. 6173, 6174) provides for the filing of applications for adjustment of maximum prices for commodities or services under Government contracts or subcontracts. Revised Supplementary Order No. 9 (8 F.R. 6175) makes the provisions of Procedural Regulation No. 6 applicable to all price regulations, excepting those which expressly prohibit such applications, and certain specific regulations listed in Revised Supplementary Order No. 9]

Notes on White Oak or Red Oak—Structural Stock or Sound Square Edge

Random Widths; in 2", 3" and 4" thicknesses—\$43.00.

Free of heart in 2", 3" and 4" thicknesses—add \$6.00 to maximum price for same thickness, width and length in above schedule.

Prices for Specific Sizes not in Schedule

The maximum price for material of a length not included in this schedule shall be determined by adding to the maximum price for the next shorter length the proportionate amount of the difference between the maximum price of such next shorter length and the maximum price of the next longer length.

In the case of any item for which the thickness or the width is not included in the schedule, the maximum price shall be the maximum price for the material of the next greater thickness or width.

The maximum prices set forth above supersede the maximum prices for like material authorized for individual sellers under the special pricing provisions of this regulation.

Deductions for mixed hardwoods. For mixed hardwoods, structural stock or sound square edge, deduct \$4.00 from the maximum price for white oak or red oak—structural stock or sound square edge in the same size in above schedule.

Notes on White Oak or Red Oak—Freight Car Stock, Common Dimension, Mine Car Lumber

Random Widths; in 2" and 3" thicknesses—\$50.00.

Free of Heart; in 2" and 3" thicknesses—add \$8.00 to maximum price for same thickness, width and length in above schedule.

Prices for Specific Sizes not in Schedule

The maximum price for material of a length not included in this schedule shall be determined by adding to the maximum price for the next shorter length the proportionate amount of the difference between the maximum price of such next shorter length and the maximum price of the next longer length.

In the case of any item for which the thickness or the width is not included in the schedule, the maximum price shall be the maximum price for the material of the next greater thickness or width.

The maximum prices set forth above supersede the maximum prices for like material authorized for individual sellers under the special pricing provisions of this regulation.

Deduction for mixed hardwoods. For mixed hardwoods—freight car stock, common dimension, mine car lumber, deduct \$4.00 from the maximum price for white oak or red oak—freight car stock, common dimension, mine car lumber, in the same size as shown in above schedule.

(26) FAS ONE FACE

(c) Maximum prices for dunnage.

(1) The maximum rail-delivered price

for 1,000 feet of dunnage lumber shall be as follows:

Delivered at:	Maximum delivered price
Baltimore, Maryland	\$32.00
Beaumont, Texas	22.00
Boston, Massachusetts	36.00
Charleston, South Carolina	23.00
Corpus Christi, Texas	23.00
Galveston, Texas	23.00
Gulfport, Mississippi	22.00
Houston, Texas	23.00
Jacksonville, Florida	23.00
Lake Charles, Louisiana	22.00
Mobile, Alabama	22.00
Morgan City, Louisiana	22.00
Newark, New Jersey	34.00

Delivered at:	Maximum delivered price
New Orleans, Louisiana	\$22.00
New York, New York	34.00
Pensacola, Florida	23.00
Philadelphia, Pennsylvania	33.00
Port Arthur, Texas	23.00
Portsmouth, Virginia	26.00
Savannah, Georgia	23.00
Tampa, Florida	25.00

(2) The maximum price for dunnage delivered at the above ports by water shall be the rail-delivered price as above set forth less the difference between the rail transportation charge from the point of shipment to the particular port, computed by multiplying the applicable rail rate by the weight of the lumber based on 3500 pounds per M³BM, and the actual water transportation charge from the point of shipment to the particular port.

(3) The term "dunnage" as used above means lumber of any hardwood species, of standard widths and lengths, but poorer in quality than the lowest standard grade in the particular species.

[Paragraph (c) added by Am. 13, 8 F.R. 9998, effective 7-23-43, amended by Am. 15, 8 F.R. 15737, effective 11-19-43. Former paragraphs (c) through (j) redesignated (d) through (k) by Am. 13]

(d) **Deduction for green.** For lumber shipped in a "green" condition, deduct from the maximum prices for air-dried lumber established in this Appendix "A", 10 per cent of the maximum price for rough, air-dried material in the same specifications.

This deduction shall not apply to special sawn timbers, tough ash lumber, or to lumber customarily used without air seasoning, but it shall apply to any lumber which requires further air seasoning by the purchaser before being placed in the kiln for kiln-drying, or before fabrication if not kiln-dried.

The mere fact that the lumber is not used immediately, but is stored on the purchaser's yard, does not necessarily mean that green lumber has been shipped, but in case of dispute any lumber which weighs 25% or more in excess of the air-dried weight as published in the Rules for the Measurement and Inspection of Hardwood Lumber, issued by the National Hardwood Lumber Association, January 1, 1943, or for weights filed with the Office of Price Administration by the individual shippers, shall be considered to be "green".

Any purchaser who accepts "green" lumber at prices applicable to "dry" lumber is guilty of violation of the regulation to the same extent as the seller.

[Paragraph (d), formerly (c), amended by Am. 13, 8 F.R. 9998, effective 7-23-43, and Am. 15, 8 F.R. 15737, effective 11-19-43]

(5) Inspecting, grading and measuring after kiln drying: 5 per cent of the f. o. b. mill price of the lumber in a rough air dried condition. This addition may be made only where the seller performs all three of these services, at the request of the purchaser, after kiln drying.

(6) End-racking or band sawing: No addition.

(7) Custom kiln-drying and milling. Where Appalachian hardwood lumber is kiln-dried or milled for the seller by a custom kiln or milling establishment, and the custom kiln or milling establishment is not owned or operated by, or connected with, the sawmill, the seller may add the actual cost of this custom kiln-drying or milling. The amount added may not be higher than the maximum

price established by Maximum Price Regulation 165, as amended,* services, for the custom kiln or milling establishment applicable to the sale of the services of custom kiln-drying or milling. The invoice of the custom kiln or milling establishment must be attached to the lumber invoice of the seller.

[Sub-paragraph (7) added by Am. 12, 8 F.R. 5479, effective 4-29-43]

(f) The following additions per 1,000 feet of Appalachian hardwood lumber may be charged where the purchaser (or purchasers, in the case of pool cars) orders an item, consisting of one species, thickness, and grade of Appalachian hardwood lumber, in the quantities herein indicated:

Quantity ordered	Allowable addition (per 1,000 feet)
Over 3,000 but not exceeding 4,000 feet	\$1.00
Over 2,000 but not exceeding 3,000 feet	2.00
1,000 to 2,000 feet	2.50
Less than 1,000 feet	3.00

(g) A delivered price in excess of the maximum f. o. b. mill prices set forth in paragraphs (b) and (c) hereof, may be charged, consisting of such maximum prices, plus the transportation charges set forth below: *Provided*, That the invoice contains the point of origin of the shipment, the destination, the applicable rail or truck rate, or if shipment is by private truck, the amount added for transportation, and the words "direct-mill shipment".

(1) Common or contract carrier. When shipment is by common or contract carrier, the following rules govern:

(i) When estimated weights are used, the rate times the estimated weight is the proper transportation charge. Esti-

mated weights may be used only if they have been filed with the Office of Price Administration, Washington, D. C. The weights must be the weights used by the seller during the period October 1 to October 15, 1941. The estimated weight must be the weight for the exact kind of lumber actually shipped; for example, green weights may not be used if dry lumber is shipped. The transportation charge may be evened out to the nearest quarter-dollar per M.

(ii) When estimated weights are not used, the amount added for transportation must not be more than the amount actually paid to the common or contract carrier, evened out to the nearest quarter-dollar per M.

(2) Private truck. When shipment is by truck owned or controlled by the seller, the amount added for transportation may not be more than the actual cost to the seller of delivery by truck; and, no matter what the actual cost is, the amount added may not be more than the railroad charge at the carload rate for the most similar haul. However, if this railroad charge is less than \$1.50, and if the actual cost of delivery is more than \$1.50, a transportation charge of \$1.50 may be made.

(3) Trucking to railhead. When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. However, in the following two cases a mill may apply for special permission to make an addition:

(i) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

(ii) Where a mill's rail connection has been abandoned since September 5, 1941.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington, D. C. The addition may not be made on quotations or sales until permission has been received.

(4) Truck delivery after rail haul. When truck delivery follows a rail haul, the actual cost of truck delivery may be added.

(5) All-truck haul. When an all-truck haul ends in delivery to the job site, no special addition may be made above the charges provided in subparagraphs (1) and (2) of this paragraph, since in this case delivery to the job site involves no extra expense.

[Paragraph (g), formerly (f), amended by Am. 11, 8 F.R. 3056, effective 3-16-43; Am. 15, 8 F.R. 15737, effective 11-19-43; and Am. 16, 8 F.R. 17297, effective 12-29-43]

(h) Where the purchaser requests an inspection by, and an inspection certificate issued by, the National Hardwood Lumber Association, the seller may make an added charge which does not exceed the inspection fees and expenses charged by the Association to the seller and shown on the certificate.

(i) Where Appalachian hardwood lumber is sold on a Log Run, Mill Run, or No. 1 Common and Better grade for which no maximum price has been established in this appendix the maximum price shall be the maximum price established in this appendix for the lowest grade of lumber contained in the stock that is sold on such special inspection grade; the seller, however, may grade and ship the lumber on the standard grades included in such special inspection grade and invoice the footage in each of the standard grades at a price not to exceed the maximum price established in this Maximum Price Regulation No. 146 for the respective standard grades.

(j) The maximum prices established in this appendix shall not be increased by any charges for the extension of credit and shall be decreased for prompt payment to the same extent that the sale price would have been decreased on Oc-

tober 1, 1941, in a sale of a similar nature to a purchaser of the same class as involved in the transaction subject to this Maximum Price Regulation No. 146.

(k) Export sales of Appalachian hardwood lumber are subject to the provisions of the Maximum Export Price Regulation.¹⁰

§ 1382.12 Appendix B: Maximum prices for Appalachian hardwood lumber in "recurring special" grades or items—

(a) Application of Appendix B. (1) The provisions of this appendix shall apply to Appalachian hardwood lumber in the species set forth in paragraph (a) (3) (i) of § 1382.8 which is sold on special specifications (herein referred to as "recurring special" grades or items), requested by the purchaser:

¹⁰ 2d Revision: 8 F.R. 4132, 5987, 7662, 9998, 15193; 9 F.R. 1036.

(i) Which are not covered by § 1382.11, Appendix A, of this Maximum Price Regulation No. 146; and

(ii) To which reference was made in the published price lists or unsolicited trade quotations of the producing mill at any time during the year 1941 or 1942.

(b) The maximum f. o. b. mill prices for 1,000 feet of Appalachian hardwood lumber in a rough air dried condition shipped from mills in the Appalachian area of the following particular producers, and in the following "recurring special" grades or items, shall be as follows:

(b) *Additions, adjustments and restrictions.* The additions, adjustments, and restrictions provided in paragraphs (d), (e), (f), (g), (h), (i), (j), and (k) of § 1382.11 (Appendix A) shall apply to the prices established in this Appendix.

(c) *Effect on special prices.* The maximum prices contained in this Appendix C supersede the maximum prices for like material authorized for individual sellers under the special pricing provisions of this regulation.

[§ 1382.13 added by Am. 13, 8 F.R. 9998, effective 7-23-43. Former § 1382.13 amended by Am. 8, 7 F.R. 8198, effective 10-15-42; revoked by Am. 13]

§ 1382.14 *Appendix D: Maximum prices for Appalachian hardwood lumber in grades, specifications and extras not specifically priced—(a) Application of Appendix D.* (1) Appalachian hardwood lumber sold on special grades or specifications or with special services or other extras not specifically mentioned in Appendices A and C (§§ 1382.11 and 1382.13) is nevertheless subject to this regulation. The maximum price for such lumber shall be determined in accordance with the formula in paragraph (b) below.

(2) For the purposes of this section the term "Appalachian hardwood lumber" shall include all items of lumber in the species set forth in § 1382.8 (a) (3) but shall not include the following items. (The term "items" includes specifications, workings, services and/or extras):

- (i) Glued stock.
- (ii) Moulding.
- (iii) Shiplap.
- (iv) Risers.
- (v) Step treads.
- (vi) Thresholds.
- (vii) Hand rails.
- (viii) Bevel and drop siding.
- (ix) Flooring.
- (x) Switch, cross, and mine ties.
- (xi) Mine material.
- (xii) Small dimension stock.
- (xiii) Lath.
- (xiv) Navy oak ship stock. (See Maximum Price Regulation No. 281.)

(b) *Maximum prices for grades, specifications and extras not specifically priced.* (1) The maximum price for Appalachian hardwood lumber in grades, specifications and extras not specifically priced in Appendices A and C, shall be a price which bears the October 1941 relation to the most comparable standard item. The seller should find his price difference between the special item and this most comparable standard item in October 1941 or the first month before that in which he had sales of both items, or if this is impossible, the price differential he would have used. This differ-

ence is then added to or subtracted from the maximum price of the comparable standard grade, and the result is the maximum price for the special grade. This price must be reported to the Office of Price Administration, Washington, D. C. on OPA Form 246: 1 Rev. given in paragraph (3) below. It may be ordered reduced, if it is found excessive. But if the price is not disapproved within 30 days of the receipt of the report it is approved.

Applications for approval of maximum prices for special grades and items under this section will be considered only when accompanied by (i) a true copy of the order or of customer's inquiry on the basis of which the application has been submitted; and (ii) a statement certified to be true by the purchaser or prospective purchaser to the effect that none of the grades specifically priced in the regulation will serve the purpose for which the stock is intended to be used, which purpose is to be stated; that it has been his custom to purchase lumber on such special specifications. Approval of the price will be conditional on finding that the purpose for which the special grade item is to be used is classified by the War Production Board as essential to the war effort. Prices, when approved, for such special grades or items will be based on the price differential previously established between the particular special item requirement and the related grade rule specification.

[Subparagraph (1) as amended by Am. 15, 8 F.R. 15737, effective 11-19-43]

(2) A seller using this pricing section can go ahead with delivery of the lumber and collection of the price he has computed or requested. But he must tell the buyer that the price is subject to revision within the thirty-day period, and, if the price is ordered reduced, must refund any excess over the final approved price.

PART 1347—PAPER AND PAPER PRODUCTS
[RPS 32,¹ Incl. Amdts. 1-12]

PAPERBOARD SOLD EAST OF THE ROCKY MOUNTAINS

Sections 1347.51, 1347.62 (1) (2), (1) (3), and 1347.63 (b) (2) are amended by

¹ 7 F.R. 1264.

Amendment 12,* effective March 30, 1944, so that Revised Price Schedule No. 32 shall read as follows:

The Office of Price Administration, being charged with the maintenance of price stability and the prevention of undue price rises, has determined that the establishment of maximum prices for paperboard is essential in order to accomplish these purposes and is in the interest of national defense and national welfare, and that the maximum prices set forth herein are fair and reasonable. The determination of these prices comes after exhaustive investigations and numerous conferences with representatives of all branches of the paperboard trade.

Paperboard, and the boxes and containers manufactured therefrom, have become essential to the prosecution of the defense effort. The Office of Price Administration, through voluntary agreements and the establishment of price schedules for wastepaper and other commodities, has been exerting its efforts to prevent undue price rises in those raw materials which go to make up paperboard. The price rises which are threatening in the paperboard industry are, therefore, unwarranted. Because of the countless uses for paperboard, the effect of an inflationary price would be to create a dangerous price spiral and, therefore, immediate action is necessary.

Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected.

These costs are to be given for the total production during each of the last two quarterly accounting periods, by which is meant the average actual costs for all the tons of the commodity produced during each period. Costs on only one of several runs during each period will not be sufficient for this purpose.

If the applicant has not been producing the commodity during the preceding six months, an estimate of costs for the month following the date of the application is to be given on forms to be supplied by the Office of Price Administration.

A sample of the commodity (size 8½" x 11") is to be filed with these forms, which may be obtained from the Office of Price Administration—Code 695—Washington, D. C.

(iv) Statement of the seller's over-all financial condition, including the information required by OPA Form A (Annual Financial Report) for the fiscal year next preceding the filing of the application, and the information required by OPA Form B (Interim Financial Report) for each quarterly period subsequent to the period covered by the A report: *Provided*, That for cause shown this latter requirement may be waived in whole or in part at the discretion of the Administrator.

(e) *Exception to quantity differentials.* When a single purchaser places an order, for delivery at one time, for paperboard of one grade, color, type, weight, caliper and finish, and where the sizes ordered are combined to fill the trim of the seller's papermaking machine and can be made simultaneously without a change in the slitter or chopper knives as the paperboard leaves the machine, then the combined weight of such sizes shall be considered as the quantity of an item for the application of quantity differentials. A combination of sizes which when combined are within 3% of the full trim of the papermaking machine shall be considered an acceptable trim of such machine when applying this exception to quantity differentials.

(1) The quantity differentials established in Appendix A are designed to compensate, in whole or in part, for the extra costs involved in handling and manufacturing small orders of paperboard. These quantity differentials apply on the quantity ordered for delivery at one time (see definition of item, and exception to quantity differentials.) While this regulation does not require any manufacturer to sell any person any specific quantity of paperboard, it is considered an indirect violation of this regulation for the manufacturer to demand (directly, or by threat of refusal to supply) that the customer place several orders of small quantities, rather than to accept one or more orders of larger quantities, solely for the purpose of receiving the additional income from these quantity differentials—that is, six 2 ton orders, or four 3 ton orders, rather than one 12 ton order as the customer desires to place.

(f) *Trimming.* For trimming sheets, to secure clean edges and/or more accurate measurements, add \$1.00 per ton for each side trimmed. (This charge

[Paragraphs (e) and (f) as amended by Am. 7, 8 F.R. 14811, effective 11-4-43]

(g) *Special size, special white, special color, special sizing, special test, or other special characteristics or requirements.* The prices and differentials set forth in paragraphs (a), (b), (c) and (d) of this section cover the types of paperboard described therein, or slight variations from these specified qualities. For special sizes, special whites, special colors, special sizing, special test, or other special characteristics or requirements, involving a difference in cost, the maximum price shall be determined by adding to, or subtracting from, the maximum price, as established by paragraphs (a), (b), (c) and (d) of this section for the particular type of paperboard involved, a differential therefor as follows:

(1) For items sold or contracted to be sold at a definite price by the producer during the period of October 1, 1940 to October 15, 1941, inclusive, the differential shall be the differential applied during such period to the base price of such paperboard of comparable quantity, for the special sizes, special whites, special colors, special sizing, special test, or other special characteristics or requirements, if not otherwise specifically provided for in this section.

(2) For items not sold or contracted to be sold at a definite price by the producer during such period, the differential shall be the list price for such differential therefore effective during such period. If no list price for such differential was in effect during such period, an application for approval of a differential shall be made to the Price Administrator, Washington, D. C. When submitting such differential to the Price Administrator for approval the application made by the producer or by an officer or partner of the producer, shall contain complete price and cost data in the manner and form required by the Price Administrator on one or more comparable items described in this section and sold or contracted to be sold at a definite price by the producer during such period: *Provided, however,* That orders may be accepted and manufactured, and invoices issued, at a differential subject to approval, disapproval or adjustment by letter. A notation to this effect must be made on all quotations, orders and invoices of the particular quality involved until the differential is approved or adjusted. The application must be mailed to the Office of Price Administration, Code 695, Washington, D. C., within 10 days after the item has been produced, on forms which may be secured from the Office of Price Administration, Code 695, Washington, D. C., Information must be included as to the name and address of the customer and the price agreed upon for the new grade or quality.

The differentials established by a producer under the provisions of this paragraph shall apply only to that producer and may not be used by any other pro-

ducer without the specific authorization of the Price Administrator.

[Paragraph (g) added by Am. 2, 7 F.R. 3182, effective 5-11-42; amended by Am. 7, 8 F.R. 14811, effective 11-4-43]

(h) *Delivered prices.* All of the above maximum prices are for the respective grades or tonnages delivered to the purchaser's plant actually using the paperboard.

The maximum prices set forth in this Appendix shall include all transportation costs involved, except as provided in paragraph (i) below, regardless of whether such transportation costs are paid by the seller, by the purchaser, or prorated between purchaser and seller. Billing may be f. o. b. point of shipment with freight allowed.

(i) *Added freight adjustments for long hauls.* If, in the shipment of any paperboard, the total transportation cost involved exceeds \$6.00 per ton, the maximum prices set forth in this Appendix may be increased by a sum per ton not in excess of the difference between \$6.00 and the total transportation cost involved per ton.

[NOTE: Supplementary Order No. 31 (7 F.R. 9894; 8 F.R. 1312, 3702) provides that: "Notwithstanding the provisions of any price regulation, the tax on transportation of all property (excepting coal) imposed by section 620 of the Revenue Act of 1942 shall, for purposes of determining the applicable maximum price of any commodity or service, be treated as though it were an increase of 3% in the amount charged by every person engaged in the business of transporting property for hire. It shall not be treated, under any provision of any price regulation or any interpretation thereof, as a tax for which a charge may be made in addition to the maximum price."]

¹ Where paperboard of any type covered by this Appendix is imported from a foreign country by a purchaser, and duty must be paid on such import, such purchaser may pay this duty although this payment results in a total cost to such purchaser for paperboard which exceeds the maximum prices established in this Appendix. The total amount paid by the purchaser for such imported paperboard shall in no event exceed the prices established in this Appendix plus the actual amount of the import duty paid, and such import duty must be shown as a separate item in the records required to be kept in accordance with § 1347.54 hereof.

(f) *Natural colors.* All Kraft, Jute, and Chip prices are based on standard grades in their respective natural colors.

(g) *Special size, special white, special color, special sizing, special test, or other special characteristics or requirements.* The prices and differentials set forth in paragraphs (a), (b), (c), (d) and (e) of this section cover the types of paperboard described therein, or slight variations from these specified qualities. For special sizes, special whites, special colors, special sizing, special test, or other special characteristics or requirements,

involving a difference in cost, the maximum price shall be determined by adding to, or subtracting from, the maximum price, as established by paragraphs (a), (b), (c), (d) and (e) of this section for the particular type of paperboard involved, a differential therefore as follows:

(1) For items sold or contracted to be sold at a definite price by the producer during the period of October 1, 1940 to October 15, 1941, inclusive, the differential shall be the differential applied during such period to the base price of such paperboard of comparable quantity, for the special sizes, special whites, special colors, special sizing, special test, or other special characteristics or requirements, if not otherwise specifically provided for in this section.

(2) For items not sold or contracted to be sold at a definite price by the producer during such period, the differential shall be the list price for such differential therefore effective during such period. If no list price for such differential was in effect during such period, an application for approval of a differential shall be made to the Price Administrator, Washington, D. C. When submitting such differential to the Price Administrator for approval, the application made by the producer or by an officer or partner of the producer, shall contain complete price and cost data in the manner and form required by the Price Administrator on one or more comparable items described in this section and sold or contracted to be sold at a definite price by the producer during such period: *Provided, however,* That orders may be accepted and manufactured, and invoices issued, at a differential subject to approval, disapproval, or adjustment by letter. A notation to this effect must be made on all quotations, orders and invoices of the particular quality involved until the differential is approved or adjusted. The application must be mailed to the Office of Price Administration, Code 695, Washington, D. C., within 10 days after the item has been produced, on forms which may be secured from the Office of Price Administration, Code 695, Washington, D. C. Information must be included as to the name and address of the customer, and the price agreed upon for the new grades or quality.

The differentials established by a producer under the provisions of this paragraph shall apply only to that producer and may not be used by any other producer without the specific authorization of the Price Administrator.

[Paragraph (g) added by Am. 2, 7 F.R. 3182, effective 5-11-42; amended by Am. 7, 8 F.R. 14811, effective 11-4-43]

(h) *Delivered prices.* All of the above maximum prices are for the respective grades or tonnages delivered to the purchaser's plant actually using the paperboard.

The maximum prices set forth in this Appendix shall include all transportation costs involved except as provided in paragraph (i) below, regardless of whether such transportation costs are paid by the seller, by the purchaser, or

prorated between purchaser and seller. Billing may be f. o. b. point of shipment with freight allowed.

(i) *Added freight adjustments for long hauls.* (1) If the total transportation cost involved for the type of transportation used in the shipment of Fourdrinier Kraft liners, Cylinder Kraft liners, and Kraft corrugating material, provided such liner or corrugating material is made in the United States from at least 70% virgin Kraft coniferous wood pulp, exceeds \$10.00 per ton, the maximum prices set forth in this Appendix may be increased by a sum per ton not in excess of the difference between \$10.00 and the total transportation cost involved per ton.

(2) If the total transportation cost involved for the type of transportation used in the shipment of corrugating material or liners listed in this appendix imported from Canada or Newfoundland exceeds \$12.00 per ton, the maximum prices set forth in this appendix may be increased by a sum per ton not in excess of the difference between \$12.00 and the total transportation cost involved per ton.

(3) If the total transportation cost involved for the type of transportation used in the shipment of all other types of paperboard listed in this Appendix, except those provided for in subparagraphs (1) and (2) hereof, exceeds \$6.00 per ton, the maximum prices set forth in this Appendix may be increased by a sum per ton not in excess of the difference between \$6.00 and the total transportation cost involved per ton. Total transportation cost as used in this subparagraph (3) means transportation cost involved in shipment within the United States.

[Subparagraph (2) and (3) amended by Am. 12, effective 3-30-44]

(j) A maximum variation of 5% is allowed in the specified basis weights of Fourdrinier Kraft Linerboards specifically listed in this section.

[Paragraph (j) added by Am. 6, 8 F.R. 11291, effective 8-18-43]

(k) Where the maximum price of paperboard is on a per M square foot basis, the square footage to be invoiced is to be determined by one of the following procedures:

NOTE: Paperboard on which the maximum price, as covered by this Appendix, is on a per M. square foot basis may not be invoiced at a price per ton.

(1) The paperboard in each roll is measured mechanically as it is wound to secure the lineal footage in such roll. This figure multiplied by the width of the roll (in decimals of a foot-to-two-places, e. g. 50 inch width equals 4.17 foot) results in the square footage to be invoiced.

(2) A sample is taken from each roll and cut accurately to size 12" x 12" square (1 square foot). The accurate weight of this sample (secured by weighing on a balance scale) multiplied by 1,000 results in the weight per thousand

square feet for that roll. The simple arithmetic average of these weights, from the samples of the rolls in the shipment, divided into the total weight of the shipment results in the square footage to be invoiced. Each truckload or carload of paperboard is to be considered individually as a shipment when determining the square footage to be invoiced.

[Paragraph (k) added by Am. 7, 8 F.R. 14811, effective 11-4-43]

§ 1347.63 *Appendix C: Maximum prices for paperboard and specialty paperboard not covered by §§ 1347.61 and 1347.62, sold east of the Rocky Mountains, shall apply to the following:*

(a) *Classifications:*

(3) Bogus bristols and mill blanks.

(4) Fibreboard used in the manufacture of footwear, and leatherboard for any purpose.

(5) Container boards used for foods and purposes other than foods, limited to:

(i) Milk bottle stock.

(ii) Milk bottle cap stock.

(iii) Liquid tight can stock.

(8) Clay coated folding boxboard and clay coated cardboard.

(9) Screening board.

(10) Miscellaneous specialty paperboards not covered elsewhere in this agreement.

(b) *Maximum prices for paperboard and specialty paperboard listed in paragraph (a) above.* (1) For paperboard and specialty paperboard sold or contracted to be sold at a definite price by the producer during the period of October 1, 1940, to October 15, 1941, inclusive, the maximum price shall be the highest price per ton or per thousand square feet charged by the producer for items of the same or comparable quantity during such period, subject to the following qualifications:

(i) If the price was on an f. o. b. mill basis, such price shall be the maximum price;

(ii) If the price was on a delivered basis, or f. o. b. the mill with full freight allowed, such price shall be the maximum price to the same or similarly located purchaser: *Provided, however,* That if the price was on a delivered basis by zones, the highest price in each zone shall be the maximum price for such zone, and the producer shall continue to make sales of such item or items on whichever basis he employed during such period;

(iii) If the price was on a basis of partial freight allowance to the purchaser, the highest price charged on such basis by the producer during such period shall be the maximum price to the same or similarly located purchaser, provided the producer continues to make partial

freight allowances in the same amounts and upon the same basis employed during such period.

An additional charge for packaging or packing such items may be made providing such charge does not exceed the highest charge added during such period to items of the same or comparable quantity.

(2) For paperboard or specialty paperboard not sold during such period, the maximum price shall be the highest list price therefor effective during such period. If no such list price was in effect during such period, an application for approval of the proposed price shall be made to the Price Administrator. When submitting a proposed maximum price to the Price Administrator for approval, an affidavit made by the producer or by an officer or partner of the producer, shall be submitted, containing complete price and cost data in the manner and form requested by the Price Administrator on one or more comparable items sold or contracted to be sold at a definite price by the producer during such period, establishing that such proposed maximum price is consistent with the general price level of the producer during such period.

However, orders may be accepted and manufactured, and invoices issued, at the proposed maximum price subject to approval, disapproval, or adjustment by letter. A notation to this effect must be made on all quotations, orders and invoices of the particular quality involved until the proposed maximum price is approved or adjusted. The application must be mailed to the Office of Price Administration, Code 695, Washington, D. C., within 10 days after the item has been produced, on forms which may be secured from the Office of Price Administration, Code 695, Washington, D. C. Information must be included as to the name and address of the customer, and the price agreed upon for the new grades or quality. The maximum price established by a producer under the provisions of this paragraph shall apply only to that producer and may not be used by any other producer without the specific authorization of the Price Administrator.

(2) When pulpwood is rosseed as defined in section 8 (a) (11) of this regulation, a sum not in excess of \$1.00 per cord may be added to the appropriate maximum peeled wood price set forth in paragraph (a) (1) above.

(3) The maximum price for pulpwood sold at points other than those listed above shall be arrived at by deducting from the appropriate maximum price established above an amount equal to the actual cost incurred in transporting the wood to and loading the wood at the point of shipment described above actually used, or, in the case of wood trucked to the mill, the actual costs of such trucking.

(b) (1) The appropriate maximum prices set forth in paragraph (a) (1) above shall in no event be increased by more than \$1.00 per cord when it is necessary to secure the wood in question and this is the least expensive means of securing such wood. Amounts in excess of the appropriate maximum prices can be paid only to a producer and only if the buyer makes a statement to the Paper and Paper Products Branch, Office of Price Administration, Washington, D. C., either prior to or subsequent to such payment. Such statement shall set forth fully the reasons why the excess payment is necessary, and shall explain the excess payment in itemized form, with a justification for the payment of each item.

(2) The Office of Price Administration may at any time suspend or withdraw from any buyer or buyers the privilege of paying the excess amount provided for by this para-

graph (b) over the appropriate maximum prices.

(c) The prices established herein are for wood of top quality prepared to conform with the consumer's specifications. All trade practices and customs with respect to allowance for defective wood of any kind must be observed.

(d) *Mixed shipments.* If a shipment contains a mixture of species, except a mixture of spruce and fir, the maximum price per cord shall be ascertained by determining the number of cords of each species in the shipment and then applying the maximum price for each species.

(e) When one consumer sells pulpwood to another, the maximum price shall not exceed the actual cost which the wood stands the seller, plus such actual costs of moving the wood to the buyer as the seller incurs.

(f) *Dealers allowance.* (1) In the event that a person qualifies as a dealer as defined in section 8 (a) (14) of this regulation, a consumer or consumers may pay such dealer, in addition to the producer's maximum price hereinbefore provided, a sum not in excess of \$1.00 per cord on each cord of pulpwood received. Any one consumer who is asked to pay a commission on less than 1,000 cords sold by a dealer may rely in making such payments on letters from other consumers to the dealer indicating that, at the time the commission is paid, the dealer has met the requirements of this paragraph.

(2) The maximum prices established in paragraph (a) of Appendix A, can in no case be augmented by more than one dealer's allowance for each cord. In no event shall a person receive a dealer's allowance on the cut of another person pursuant to any contract, agreement or understanding of any sort whatsoever between the two, whereby each is to sell, and charge an allowance on the wood cut by the other. In addition to the price paid by the consumer a dealer may receive a dealer's allowance only from a consumer and only if the dealer fulfills all of the following requirements with respect to the transactions:

(i) Keep copies of all contracts in which a dealer's allowance is charged.

(ii) The sale is made by the dealer to the consumer.

(iii) The dealer guarantees the merchantable quality of the pulpwood.

(iv) The dealer's allowance in such transaction is shown as a separate item on the invoice. This invoice must contain a statement that the charges are not in excess of those established in this Revised Maximum Price Regulation No. 361.

(v) The dealer's allowances is not split or divided with any other person.

(vi) All pertinent provisions in this Revised Maximum Price Regulation No. 361 are strictly complied with.

This Revised Maximum Price Regulation No. 361 shall become effective March 25, 1944.

NOTE: The reporting provisions of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 25th day of March 1944.

Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. (2) The grades set forth in Table B shall be determined in accordance with all the criteria set forth in the U. S. Standards for Table Maple Syrup, issued by the United States Department of Agriculture.

(3) The prices set forth in Table B include the cost of the container, and shall apply to maple syrup in all types of containers irrespective of their shape or composition. The prices are cash prices for the quantities and class of purchaser set forth. Packers may charge an additional 1% on those sales where credit for ten days or longer is extended.

(4) Producers and packers of maple syrup packed in fancy containers may elect to use either the prices stipulated in Table B for such size or the price established by such producer or packer under § 1499.2 (a) of the General Maximum Price Regulation.

(c) *Packers' maximum prices for maple syrup sold in bulk.* (1) The packer's maximum prices, f. o. b. plant, for the following grades of maple syrup sold in bulk shall be as follows:

TABLE C—PACKERS' MAXIMUM PRICES FOR MAPLE SYRUP SOLD IN BULK

Grades	Maximum price per pound	
	Filtered	Unfiltered
Fancy AA.....	\$0.235	\$0.225
A.....	.225	.215
B.....	.215	.205
C.....	.205	.195

(2) The grades set forth in Table C shall be determined in accordance with all the criteria set forth in the U. S. Standards for Maple Syrup for Reprocessing, issued by the United States Department of Agriculture.

(d) *Producers' and packers' maximum prices for "flavoring maple syrup."* (1) The producer's or packer's maximum prices, f. o. b. packing plant for each item, that is, for each type and container size, of "flavoring maple syrup" for each class of purchaser shall be his "base price" plus 66 cents per gallon.

(i) The "base price" shall be calculated by dividing the total dollars charged each class of purchaser for such item during the period comprising the months of April, May and June, 1941, hereinafter called the "base period," by the number of such items sold such class of purchasers during the "base period."

Example. X packer seeks the maximum price of a five gallon tin of type Q "flavoring" maple syrup. In determining his "base price," he ascertains that he sold during the "base period" a total of 1,000 5-gallon tins for which he received \$5,000. The maximum price would be computed as follows:

\$5,000 ÷ 1,000 5-gallon tins = \$5.00—base price
 5 gal. × \$0.66 = 3.30
 8.30

Producers or packers seeking to price "flavoring" maple syrup which is to be sold without the container or on a returnable container basis, shall use the same method provided for in subparagraph (1) immediately above, except that their "base price" shall be computed by using only sales that were made on a returnable container basis during the "base period."

(e) *Delivered prices.* The delivered price for any commodity subject to the provisions of this regulation shall in no case exceed the established maximum f. o. b. price plus the actual transportation charges incurred from the seller's shipping point to the place of destination which charges, in no event, shall exceed the cost of transporting an equal quantity of maple syrup from the same shipping point directly to the purchaser's customary receiving point, computed at the lowest available transportation rate for the customary mode of transportation employed.

(f) *Maximum prices for "maple syrup" items on which no price has been established.* (1) The maximum price for any item of maple syrup for which a maximum price is not established by this Revised Maximum Price Regulation No. 312, shall be determined after specific authorization from the Office of Price Administration, Washington, D. C., on application setting forth (i) a description of the grade of syrup and size of the

container of the item upon which a price is sought; and (ii) the factory door cost of such item. The "factory door cost" shall include all direct and indirect costs and expenses chargeable to the production of the item, but shall not include costs and expenses chargeable to the administration, selling, advertising or transportation; and (iii) the factory door costs and maximum selling prices of the applicant's three most comparable items together with their description.

(2) Until the Office of Price Administration shall fix a price for such item of "maple syrup", applicant may deliver the item but he may not receive payment for it.

(g) *Imports.* (1) The appropriate maximum prices for maple syrup established by this regulation shall likewise apply to all maple syrup imported into the United States, the importer being considered the producer or packer as the case may be. Such prices shall apply f. o. b. point of entry and shall include duty.

SEC. 3. Maximum prices for maple sugar—(a) *Maximum prices for block sugar.* (1) The following are maximum prices f. o. b. seller's shipping point, for block sugar. These prices include the cost of the container, and are prices before discounts. Each seller shall reduce these prices to reflect his own established trade allowance and discounts, including but not limited to the discount for prompt payment. The term "quantity of sale" as used in the following table means the total quantity of maple sugar to be delivered as a result of a single contract.

Type	Quantity of sale	Prices per pound
Fancy block sugar	2,000 lbs. or less	\$.36
Fancy block sugar	Over 2,000 lbs. but less than 40,000 lbs.	.35
Fancy block sugar	40,000 lbs. or over but less than 250,000 lbs.	.34
Fancy block sugar	250,000 lbs. and over	.33
Blended block sugar	2,000 lbs. or less	.34
Blended block sugar	Over 2,000 lbs. but less than 40,000 lbs.	.33
Blended block sugar	40,000 lbs. or over but less than 250,000 lbs.	.32
Blended block sugar	250,000 lbs. and over	.31

(2) The maximum prices for block sugar which is imported into the United States shall apply f. o. b., port of entry, and shall include duty.

(b) *Maximum prices for Canadian bag sugar.* (1) The maximum price for Canadian bag sugar, f. o. b. port of entry, duty included, shall be \$0.27 per pound.

(c) *Delivery prices.* (1) The prices for block sugar and Canadian bag sugar delivered to buyer shall in no case exceed the established maximum f. o. b. prices, plus the actual transportation charges incurred from the seller's f. o. b. shipping point to the place of destination, which charges, in no event, shall exceed the cost of transporting an equal quantity of the same commodity from the same shipping point directly to the purchaser's customary receiving point, computed at the lowest available transportation rate for the customary mode of transportation employed.

SEC. 4. Compliance with this regulation—(a) *No selling or buying above*

However, lower prices than the maximum prices may be charged or paid.

(b) *Evasion.* Price limitations set forth in this regulation shall not be evaded whether by direct or indirect methods in connection with any offer, solicitation, agreement, sale, delivery, purchase or receipt of, or relating to the commodities whose prices are herein regulated alone or in conjunction with any other commodity, or by way of commission, service, transportation, or other charge, or discount, premium or other privilege, or other trade understanding, or otherwise.

(c) *Enforcement.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

(d) *Licensing.* The provisions of Licensing Order No. 1² licensing all persons except growers, who make sales under price control, are applicable to sellers subject to this regulation. A seller's license may be suspended for violations of a license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 5. Exempt sales. (a) The provisions of this regulation shall not be applicable to sales of maple syrup at wholesale and retail except when such sales are made by producers and packers. Sales of maple syrup by wholesalers shall be subject to the applicable provisions of Maximum Price Regulation 421 and sales by retailers shall be subject to the applicable provisions of Maximum Price Regulation 422 and 423.

(b) All sales of pure maple sugar other than "Block Sugar" and "Canadian Bag Sugar" are exempt from price control.

With the first delivery of an item to a particular wholesaler or retailer after the effective date of this regulation or an amendment to it, in any case where the seller's new maximum price is different from the maximum price he previously had for the same item, he shall:

(a) Supply such wholesaler or retailer purchasing from him a written notice as follows:

(Insert date)

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for (describe items included in sale) has been changed by the Office of Price Administration. We are authorized to inform you that if you are a wholesaler or retailer pricing this item under

You must refigure your ceiling price following the rules in section 6 of Maximum Price Regulations Nos. 421, 422, or 423, whichever is applicable to you.

For a period of sixty days after determining the new maximum price for the item, and with the first shipment after the sixty day period to each person who has not made a purchase within that time, each seller shall include in each case, carton, or other receptacle containing the item, the written notice set forth above, or securely attach it to the outside. However, for sales direct to any retailer, the seller may supply the notice by attaching it to, or stating it on, the invoice covering the shipment, instead of providing it with the goods.

SEC. 7. Records and reports. (a) Every producer and packer who makes sales of maple syrup or maple sugar after the effective date of this regulation shall make and preserve for examination by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, all records of the same kind as he has customarily kept, relating to the prices which he charged for any of such items sold after the effective date of this regulation.

(b) Every person making sales of maple syrup pursuant to this regulation shall submit such reports to the Office of Price Administration, and such other records as the Office of Price Administration may from time to time require, subject to approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(c) Every producer or packer who sells an item of "flavoring maple syrup" shall within ten days after calculating his maximum price for each such item submit to the Office of Price Administration, Washington, D. C., a statement showing his "base prices" and his maximum prices as computed under section 2, paragraph (d) and shall include in such statement, the figures which were the basis of the required computations.

SEC. 8. Export sales. The maximum prices at which a person may export maple syrup or maple sugar shall be determined in accordance with the Second Revised Maximum Export Price Regulation, as amended, issued by the Office of Price Administration.

SEC. 9. Applicability of the General Maximum Price Regulation. (a) The provisions of this Revised Maximum Price Regulation No. 312 supersede the provisions of the General Maximum Price Regulation with respect to sales and deliveries of maple syrup and maple sugar for which maximum prices are or may be established by this regulation except where otherwise provided in this regulation.

(b) The following sections of the applicable regulation or order shall apply to sales covered by this Revised Maximum Price Regulation 312.

(1) Section 1499.14 of the GMPR *Sales slips and receipts.*

(2) Section 4.4 of Rev. SR No. 1 and § 1499.46 (b) (115) of Rev. SR No. 11 *Developmental contracts*.

(3) Supplementary Order No. 42 *Secret contracts*.

(4) Section 4.3 (f) of Rev. SR No. 1 *Emergency purchases*.

(5) Supplementary Order No. 27 *Sales by certain stores operated or regulated by the War Department or the Department of the Navy*.

SEC. 10. Transfers of business or stock in trade. If the business, assets or stock in trade of any seller are sold or otherwise transferred on or after the effective date of this regulation and the transferee carries on the business, the maximum prices of the transferee shall be the same as those to which his transferor would have been subject if no transfer had taken place, and his obligation to keep records sufficient to verify those prices shall be the same. The transferor shall either preserve and make available, or turn over to the transferee, all records of transactions prior to the transfer, which are necessary to enable the transferee to comply with the record provisions contained in this regulation.

SEC. 11. General amendments. Any person seeking a general modification of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1² and amendments, issued by the Office of Price Administration.

SEC. 12. Adjustable pricing. Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery. No person may deliver or agree to deliver at a price to be adjusted upward after delivery except upon authorization of the Office of Price Administration. Such authorization may be given when a request for a change in the applicable maximum price is pending, if the authorization is deemed necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to whom authority to grant such authorization has been delegated. The authorization will be by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 13. Taxes. Any tax upon or incident to, the sale or delivery of maple syrup imposed by any statute of the United States or statute or ordinance of any state or subdivision thereof, shall be treated as follows in determining the seller's maximum price for such commodity and in preparing the records of such seller with respect thereto:

(a) *As to a tax in effect prior to the effective date of this regulation.* (1) If the seller paid such tax, or if the tax was paid by any prior vendor, irrespective of whether the amount thereof was separately stated and collected from the seller, but the seller did not customarily

state and collect separately from the purchase price prior to the effective date for such item the amount of the tax paid by him or tax reimbursement collected from him by his vendor, the seller may not collect such amount in addition to the maximum price, and in such a case shall include such amount in determining the maximum price under this regulation.

(2) In all other cases, if, at the time the seller determines his maximum price, the statute or ordinance imposing such tax does not prohibit the seller from stating and collecting the tax separately from the purchase price, and the seller does state it separately, the seller may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased and in such case the seller shall not include such amount in determining the maximum price under this regulation.

(b) *As to a tax or increase in a tax which becomes effective after the effective date of this regulation.* If the statute or ordinance imposing such tax or increase does not prohibit the seller from stating and collecting the tax or increase separately from the purchase price, and the seller does separately state it, the seller may collect, in addition to the maximum price, the amount of the tax or increase actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased.

(2) Whiskey barrel. A used whiskey barrel with all sound staves, heads and hoops which has been flagged, if necessary, and recoopered to liquid tightness; except, at the buyer's option, one sound, fitting head may be furnished loose and the hoops not driven to a final tightness, provided the barrel has been completely recoopered and tested.

They must also show the name and address of the seller, the name and address of the purchaser, the origin and destination of the shipment, the quantity and price and any items, including delivery charges, affecting the price.

SEC. 7. Prohibited practices. Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, and the like.

ARTICLE III—MISCELLANEOUS

SEC. 8. Adjustable pricing. Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by

any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

Sec. 9. *Applications for adjustment and petitions for amendment*—(a) *Government contracts*. See Procedural Regulation No. 6¹ for adjustments on certain government contracts and sub-contracts.

PART 1394—RATIONING OF FUEL AND FUEL PRODUCTS

[Rev. RO 11,¹ Amdt. 1]

FUEL OIL

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Revised Ration Order 11 is amended in the following respects:

1. Section 1394.5001 (a) (22) (iv) is amended to read as follows:

(iv) The first person to have possession within the limitation area is not the primary supplier if the person from whom he purchased the fuel oil maintains within the limitation area a regular place of business at which the order was placed. Instead, the person from whom the purchase is made is a primary supplier and the place of business at which the order for the fuel oil was placed is the primary supplier establishment.

2. Section 1394.5001 (a) (29) is amended by adding after the period at the end of the subparagraph the parenthetical sentence, "(Section 1394.5735 explains the application of the term transfer where fuel oil is delivered for another person's account.)"

3. Section 1394.5603 (a) (8) is added as follows:

(8) The fuel oil is used for compoundings or laboratory research, experimental or refining purposes by a primary supplier who is engaged in the business of transferring fuel oil.

4. Section 1394.5652 (a) is amended by adding after the period at the end of the paragraph the parenthetical sentence, "(Section 1394.5735 explains to whom evidences must be surrendered (or a primary supplier registration number furnished) when fuel oil is delivered to a person for another person's account.)"

5. Section 1394.5652 (c) is added as follows:

(c) A primary supplier engaged in the business of transferring fuel oil may without obtaining a ration for the purpose acquire fuel oil for his own use for compoundings, experimentation, laboratory research and refining.

6. Section 1394.5660 is amended to read as follows:

§ 1394.5660 *Transfers by consumers to dealers or primary suppliers*. (a) A consumer may transfer fuel oil to a dealer or primary supplier. If the dealer or primary supplier to whom such a transfer is made is a depositor, he must, at the time of the transfer, issue his ration check for the amount of the fuel oil transferred, drawn to the Office of Price Administration and deliver it to the consumer. If the dealer or primary supplier is not a depositor, he must, at the time of the transfer, deliver to the consumer an exchange certificate equal in gallonage value to the amount of the fuel oil transferred. Before delivering

¹ F. R. 2357.

the check or exchange certificate to the consumer, the dealer or primary supplier must endorse upon the back of it his name, the name and address of the consumer and the words, "Not transferable." No consumer may accept a ration check or an exchange certificate of a gallonage value in excess of the amount of the fuel oil transferred by him.

(b) A consumer to whom a ration check or an exchange certificate has been delivered in accordance with paragraph (a) must surrender the check or exchange certificate to his Board. No such ration check or exchange certificate may be used or accepted by any person for a transfer of fuel oil. If the consumer's ration has not expired under § 1394.5501 or § 1394.5502, the Board will issue him a Class 3 coupon sheet containing coupons of a gallonage value equal to the amount of the check or exchange certificate surrendered, or if the consumer is a depositor, a fuel oil deposit certificate for the amount of the check or exchange certificate surrendered.

7. Section 1394.5668 is added as follows:

§ 1394.5668 *Adjustments by non-banking dealers and primary suppliers with consumers*. (a) A dealer or primary supplier who is not a depositor and who is required to make an adjustment between the amount of evidences received from a consumer and the amount of fuel oil transferred to the consumer in exchange for such evidences must deliver to the consumer an exchange certificate equal in gallonage value to the amount of the adjustment. Before delivering the exchange certificate to the consumer, the dealer or primary supplier must endorse upon the back of it his name, the name and address of the consumer and the words "Not transferable".

(b) A consumer to whom an exchange certificate has been delivered in accordance with paragraph (a) must surrender it to his Board. No such exchange certificate may be used or accepted by any person for a transfer of fuel oil. If the consumer's ration has not expired under § 1394.5501 or § 1394.5502, the Board will issue him a Class 3 coupon sheet containing coupons of a gallonage value equal to the amount of the exchange certificate surrendered, or if the consumer is a depositor, a fuel oil deposit certificate for the amount of the exchange certificate surrendered.

8. Section 1394.5686 (b) is amended to read as follows:

(b) To a person from whom he has received evidences to make any necessary adjustment between the amount of evidences received and the amount of fuel oil transferred to such person in exchange for such evidences. However, no ration check may be drawn to a consumer who is not a depositor for the purpose of making an adjustment. (Section 1394.5690 explains how adjustments may be made with consumers who are not depositors.)

9. Section 1394.5690 is added as follows:

§ 1394.5690 *Adjustments by depositors with consumers.* (a) A depositor who is required to make an adjustment between the amount of evidences received from a consumer who is not a depositor and the amount of fuel oil transferred to the consumer in exchange for such evidences must issue his ration check for the amount of the adjustment, drawn to the Office of Price Administration and deliver it to the consumer. Before delivering the check to the consumer, the person issuing it must endorse upon the back the name and address of the consumer and the words, "Not transferable". The consumer must surrender the check to his Board. No such ration check may be used or accepted by any person for a transfer of fuel oil. If the consumer's ration has not expired under § 1394.5501 or § 1394.5502, the Board will issue him a Class 3 coupon sheet containing coupons of a gallonage value equal to the amount of the check.

10. Section 1394.5701 (a) is amended to read as follows:

(a) *Primary suppliers.* A primary supplier shall apply for registration on Form OPA R-1116 (Revised), in duplicate, to any Board within the limitation area within five (5) days after becoming a primary supplier. If an establishment is already included in an earlier primary supplier registration under Ration Order No. 11 or Revised Ration Order 11, application for registration for such establishment need not be made.

(1) The applicant shall furnish together with such other information as may be required by the form:

(i) His name, firm name, and business address.

(ii) The total fuel oil storage capacity (as defined in § 1394.5703) and the total inventory of fuel oil on hand (as defined in § 1394.5702) as of the time he became a primary supplier. (This subdivision (ii) shall not apply to stationary storage facilities maintained without the limitation area.)

(iii) The location of, and the storage capacity and inventory on hand at, each establishment included in the proposed registration; or, if he does not maintain stationary storage facilities within the limitation area, the number of mobile and portable units operated by him within the area and included in the registration, and the capacity and vehicle license number of each of such mobile delivery units. If more than one establishment or mobile unit is included in the registration, the applicant shall attach a schedule or schedules to Form OPA R-1116 (Revised), supplying the information required with respect to each such establishment or mobile unit.

(iv) A statement as to the facts which constitute him a primary supplier under the definition of "primary supplier" in § 1394.5001 (a) (22).

(v) If he applies for registration after the time fixed by paragraph (a), a signed statement, in duplicate, setting forth his reasons for not applying within the time fixed for the application.

(2) A primary supplier shall include in one application for his primary supplier registration all the establishments or mobile facilities at or from which he conducts operations constituting him a primary supplier and all stationary storage facilities in which he commingles fuel oil with that of other primary suppliers irrespective of the ownership of such facilities. However, facilities in which a primary supplier commingles fuel oil pursuant to Directive No. 59 of the Petroleum Administration for War shall be included in his application only if operations constituting him a primary supplier are conducted at or from such facilities. If he has other establishments within the limitation area, he may include some or all of them in his application if he chooses to do so.

(i) He shall apply for registration as a dealer as to each establishment at which he engages in the business of transferring fuel oil and which he does not choose to include in his primary supplier registration.

(ii) Where the operations of a primary supplier are divided by him among two or more accounting and financial districts, he may make a separate application for any district if he has at least one establishment in such district at or from which primary supplier operations are conducted.

(iii) A person may include in his application the fuel oil storage facilities of any person who receives fuel oil on consignment from him, title to the fuel oil remaining in the consignor until the time of transfer by the consignee. If such facilities are included in the application, the consignee shall for all purposes of this order be deemed to be an agent of the primary supplier with respect to such fuel oil. If the consignee's facilities are not included in the application, the consignee shall apply for registration with respect to such facilities, and notwithstanding the retention of title by the consignor to the fuel oil consigned, the consignee shall, if he is a dealer, surrender coupons or other evidences upon the transfer of such fuel oil to him and include the fuel oil in his inventory.

(iv) An establishment without the limitation area and an establishment within the limitation area must not be included in the same application for registration.

(3) Registration certificates shall be issued in accordance with § 1394.5704.

11. Section 1394.5704 is amended to read as follows:

§ 1394.5704 *Issuance of registration certificates—(a) How applications are granted.* Upon determining that all information required by OPA Form R-1116 (Revised) has been properly entered on the form, the Board shall, in the case of application for registration as a dealer, grant the application by authorized signature and return the original to the registrant. In the case of application for registration as a primary supplier, the Board shall note upon the application a temporary primary supplier registration number and furnish that number to the applicant. The original and duplicate

of the application will be mailed promptly by the Board to the Control and Audit Section, Fuel Oil Rationing Branch, Washington Office. If the registrant qualifies as a primary supplier, the Washington Office will assign a permanent registration number to the application and return the original application to the registrant.

(b) *Late dealer registration.* Whenever a person applies for registration as a dealer after the time fixed therefor by § 1394.5701, the Board shall, after the granting of the application, notify the District Office.

(c) *Registration certificate to be exhibited.* The original of the application for registration, bearing the registration number assigned by the Control and Audit Section in the case of a primary supplier or the authorized signature of the Board in the case of a dealer, shall be retained as a certificate of registration at the business address stated on the application. The certificate shall be presented at any time when requested by a Board or by an authorized representative of the Office of Price Administration.

(d) *Saving clause; late registrations.* Neither the granting of an application for a dealer registration by a Board nor the assignment of a primary supplier registration number (temporary or permanent) shall operate as a waiver of any violation of this Order by the applicant.

12. Section 1394.5707 (a) is amended by adding after the period at the end of the paragraph the parenthetical sentence, "(Section 1394.5735 explains to whom evidences must be surrendered (or a primary supplier registration number furnished) when fuel oil is delivered to a person for another person's account.)"

13. Section 1394.5707 (a) (1) is deleted.

14. Section 1394.5707 (b) is added as follows:

(b) *Transfers to primary suppliers from without the limitation area or from other primary suppliers within the area—*

(1) *Transfers from without the area.* No exchange of coupons or other evidences shall accompany a transfer of fuel oil directly from without the limitation area to a primary supplier within the limitation area.

(2) *Transfers within the area between primary suppliers.* Beginning April 1, 1944, a primary supplier may transfer fuel oil within the limitation area to another primary supplier who may accept such a transfer, only if the transferor and the transferee each furnishes to the other at the time or in advance of the transfer his permanent registration number assigned by the Washington Office, or if that number has not been received, the temporary registration number assigned by the Board. No coupons or other evidences shall accompany such a transfer.

15. Section 1394.5709 (a) is amended by adding after the period at the end of the paragraph the parenthetical sentence, "(Section 1394.5735 explains to whom evidences must be surrendered (or a primary supplier registration number furnished) when fuel oil is delivered to a person for another person's account.)"

16. Section 1394.5723 (a) is amended by deleting the sentence, "No dealer or primary supplier shall knowingly accept, for exchange certificates delivered to the Board, another exchange certificate of a gallonage value in excess of the amount of fuel oil transferred for the coupons or other evidences for which such exchange certificates were issued."; and by adding after the period at the end of the paragraph the sentence, "No exchange certificate endorsed to a consumer may be used or accepted by any person for a transfer of fuel oil."

17. Section 1394.5725 (a) is amended by adding the word "(Revised)" after the phrase "OPA Form R-1119."

18. Section 1394.5726 (b) is amended by adding the word "(Revised)" after the phrase "OPA Form R-1119."

19. Section 1394.5731 (a) is amended to read as follows:

(a) On or before the 25th day of each month, commencing on the 25th day of April, 1944, every primary supplier shall forward to the Control and Audit Section, Fuel Oil Rationing Branch, Office of Price Administration, Washington (25), D. C., a report on OPA Form R-1119 (Revised), giving the information required by the form. The report shall cover the preceding month and shall be prepared in accordance with the instructions, OPA Form R-1119B. Each report must be accompanied by a certified ration check (or if the primary supplier is not a ration banking depositor, an exchange certificate) for the amount required by the form and the instructions. No ration check (or exchange certificate) submitted to accompany a report on OPA Form R-1119 (Revised) shall include any evidence surrendered to the primary supplier for transfers of fuel oil made by him after the close of the month for which the report is made.

20. Section 1394.5731 (d) is deleted.

21. Section 1394.5732 (a) is amended by inserting after the first sentence in the paragraph the following two sentences, "If the fuel oil is delivered to a person for another person's account, the person making the delivery (other than as a carrier) need furnish the invoice, delivery ticket or other customary document of transfer only to the person for whose account the delivery is made. That invoice, delivery ticket or other customary document of transfer shall also state the name and address of the person to whom the fuel oil is delivered. The person for whose account the delivery is made must furnish an invoice, delivery ticket or other customary document of transfer to the person to whom the fuel oil is delivered."

22. Section 1394.5732 (b) is amended by inserting after the period at the end of the paragraph the following two sentences, "This paragraph applies only to the dealer or primary supplier to whom the ration evidence must be surrendered. Section 1394.5735 explains to whom evidences must be surrendered when fuel oil is delivered to a person for another person's account."

23. Section 1394.5735 is added to read as follows:

§ 1394.5735 *Surrender of ration evidence or furnishing primary supplier registration number when delivery is made for another person's account*—(a) *General rule.* Where a person (in this section called the "seller") causes fuel oil to be delivered for his account to a second person (called the "buyer") by a third person (called the "deliverer"), the following is the rule for the surrender of evidences or the furnishing of a primary supplier registration number: The seller must surrender ration evidence (or furnish a primary supplier registration number) to the deliverer, and the buyer must surrender ration evidence (or furnish a primary supplier registration number) to the seller, unless such surrender of evidence is not required by any provision of this order. No ration evidence shall be surrendered (and no primary supplier registration number need be furnished) by the buyer to the deliverer.

Examples. Note: Unless otherwise noted, the buyer, seller, and deliverer are within the limitation area.

1. A, a dealer or consumer, orders fuel oil from B, a dealer, who causes C, a primary supplier, to deliver the fuel oil to A for B's account. A must surrender ration evidence to B for the transfer from B to A. B must surrender evidence to C for the transfer from C to B. No evidence may be surrendered for the transfer from C to A. C will include in his primary supplier report a transfer to B.

2. A, a dealer or consumer, orders fuel oil from B, a primary supplier. B causes C, a primary supplier, to deliver fuel oil to A for B's account. A must surrender evidence to B for the transfer from B to A. B and C must each furnish to the other his primary supplier registration number for the transfer from C to B. No evidence may be surrendered for the transfer from C to A. B will report a transfer to A and an acquisition from a primary supplier. C will include in his primary supplier report a transfer to a primary supplier.

3. A, a dealer or consumer, orders fuel oil from B, a primary supplier. B causes C, a refiner located without the limitation area, to deliver the fuel oil to A for B's account. A must surrender evidence to B for the transfer from B to A. No evidence may be surrendered for the transfer from C to A or for the transfer from C to B. Surrender of ration evidence for the transfer from C to B is not otherwise required by this order or by this § 1394.5735. B will include in his primary supplier report the transfer to A and an acquisition from without the limitation area.

4. A, a consumer located without the limitation area, orders fuel oil from B, a primary supplier. B causes C, a primary supplier, to deliver the fuel oil to A for B's account. A must surrender evidence to B for the transfer from B to A. B and C will each furnish the other his primary supplier registration number for the transfer from C to B. No evidence may be surrendered for the transfer from C to A. B will include in his primary supplier report the transfer to A and an acquisition from a primary supplier. C will include in his primary supplier report a transfer to a primary supplier.

(b) *Exception where seller is without the area.* However, if the seller is without the limitation area, the buyer must surrender ration evidence (or furnish a

primary supplier registration number) to the deliverer (unless that surrender of evidence is not required by any provision of this order).

No ration evidence may be surrendered (and no primary supplier registration number need be furnished) by the buyer to the seller or by the seller to the deliverer but the deliverer may designate the seller as his agent to obtain the ration evidence (or primary supplier registration number) from the buyer. If so designated, the seller must surrender the ration evidence collected to the deliverer, and if it is a ration check, he must endorse it before the surrender. No such evidence may be used by the seller to acquire fuel oil.

Example. 1. A, a dealer or consumer located within the limitation area, orders fuel oil from B, a refiner located without the limitation area. B causes C, a primary supplier located within the limitation area, to transfer the fuel oil to A for B's account. C must obtain evidence from A for the transfer from C to A. C may designate B his agent to collect the evidence from A. No evidence may be surrendered for the transfer from B to A or for the transfer from C to B. C will include in his primary supplier report the transfer to A.

2. A, a consumer located without the limitation area, orders fuel oil from B, a supplier located without the limitation area. B causes C, a dealer within the limitation area, to deliver the fuel oil to A for B's account. C must obtain evidence from A for the transfer from C to A. C may designate B his agent to collect the evidence from A. No evidence may be surrendered for the transfer from B to A or for the transfer from C to B.

This amendment shall become effective on April 1, 1944.

NOTE: All reporting and record keeping requirements of this revised ration order have been approved by the Bureau of the Budget in accordance with the provisions of the Federal Reports Act of 1942.

SOLID FUELS IN UNION AND SOMERSET COUNTIES, N. J.

Order No. G-32 under §§ 1340.260 and 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122. Solid fuels sold and delivered by dealers. Pennsylvania anthracite delivered by dealers in designated portions of Union County and Somerset County, State of New Jersey, Coal Area VI.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of the Office of Price Administration by §§ 1340.260 and 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122, it is hereby ordered:

(a) *What this order does—*(1) *Dealers' maximum prices; area covered.* If you are a dealer in "Pennsylvania anthracite", this order fixes the maximum prices which you may charge, and if you are a purchaser in the course of trade or business, this order fixes the maximum prices which you may pay, for certain sizes and quantities of "Pennsylvania anthracite" (hereinafter called simply "anthracite") delivered to or at any point in State of New Jersey, Coal Area VI. That area comprises all of Union County except the City of Summit, the Borough of New Providence, and the Townships of Hillside, New Providence, Springfield, and Union. It also includes the Boroughs of North Plainfield and Watchung in Somerset County.

(2) *Schedules of prices, charges and discounts.* The applicable prices, authorized charges, and required discounts, from which you shall determine the maximum prices for designated sizes and quantities of anthracite delivered within Coal Area VI are set forth in Schedule I hereafter.

(3) *To what sales this order applies.* If you are a dealer in anthracite you are bound by the prices, charges and discounts, and by all other provisions of this order for all deliveries within Coal Area VI, whether or not you are located in Coal Area VI.

(b) *What this order prohibits.* Regardless of any contract or other obligations, you shall not:

(1) Sell or, in the course of trade or business, buy anthracite of the sizes and in the quantities set forth in the schedules herein, at prices higher than the

maximum prices computed as set forth in paragraph (c) of this order, although you may charge, pay or offer less than maximum prices.

(2) Obtain any price higher than the applicable maximum price by

(i) Changing the discounts authorized herein, or

(ii) Charging for any service which is not expressly requested by the buyer, or

(iii) Charging for any service for which a charge is not specifically authorized by this order, or

(iv) Charging a price for any service higher than the schedule price for such service, or

(v) Using any tying agreement or requiring that the buyer purchase anything in addition to the fuel requested by him, except that a dealer may comply with requirements or standards with respect to deliveries which have been or may be issued by an agency of the United States Government.

(vi) Using any other device by which a higher price than the applicable maximum price is obtained, directly or indirectly.

(c) *How to compute maximum prices.* You must figure your maximum prices as follows:

(1) Refer to Schedule I which contains a separate table of prices for sales on a "direct-delivery" basis, "yard sales", and "sales of bagged coal". You will find Schedule I in paragraph (d).

(2) Take the dollars-and-cents figure set forth in the applicable table of the schedule, for the sizes and quantity you are selling.

(3) Deduct from that figure the amount of the discount which you are required to give, as specified therein. Where a discount is required, you must state it separately on your invoice.

(4) If, at your purchaser's request, you actually render him a service for which this order authorizes a charge, you may add to the figure obtained as above no more than the maximum authorized service charge. You must state that charge separately on your invoice. The only authorized service charges are those provided for in the schedules.

(d) *Schedule I:* Schedule I establishes specific maximum prices for certain sizes of anthracite in certain specific quantities, delivered to or at any point within Coal Area VI. There is a separate table of prices for "direct-delivery" sales, "yard sales", and "sales of bagged coal".

(1) *Sales on a "direct-delivery" basis.*

For sales of anthracite of the sizes and in the quantities specified

Size	Per net ton	Per ½ ton	Per ¼ ton	Per 100 lbs. for less than ¼ ton
Broken, egg, stove, nut.	\$14.25	\$7.65	\$3.95	\$0.85

(e) *Commingleing*. If you sell one size of anthracite, commingled with another size of anthracite, your maximum price for the combination shall be the maximum prices established in this order for the smallest of the sizes so commingled, whether the sale be a "direct-delivery" sale, "yard sale," or "sale of bagged coal," except in the following situation. Where a purchaser requests that two or more sizes of anthracite be commingled in one delivery, then, and in that event, if those

sizes are separately weighed at the point of loading, or when bagged, the dealer may commingle those sizes in the truck or other vehicle, or in the bags, in which the delivery is made. The price for anthracite so commingled shall be calculated on the basis of the applicable per net ton price or, in the case of bagged coal, on the basis of the applicable bagged price, for each size in the combination, and the invoice shall separately state the price, so determined, for the quantity of each size in the combination.

(f) *Ex parte 148; freight rate increase*. Since the ex parte 148 freight rate increase has been rescinded by the Interstate Commerce Commission, dealers' freight rates are the same as those of December 1941. Therefore, you may not increase any Schedule price on account of freight rates.

(g) *Addition of increase in suppliers' maximum prices prohibited*. You may not increase the specific maximum prices established by this order to reflect, in whole or in part, any subsequent increase to you in your supplier's maximum price for the same fuel. The specific maximum prices already reflect increases to you in your supplier's maximum prices occurring up to the effective date of this order. If increases in your supplier's maximum prices should occur after such date, as the result of any amendment to or revision of a maximum price regulation issued by the Office of Price Administration governing sales and deliveries made by such suppliers, the Regional Administrator will, if he then deems it to be warranted, take appropriate action to amend this order to reflect such increases.

(h) *Taxes*. If you are a dealer subject to this order, you may collect, in addition to the specific maximum prices established herein, provided you state it separately, the amount of the Federal tax upon the transportation of property imposed by section 620 of the Revenue Act of 1942 actually paid or incurred by you, or an amount equal to the amount of such tax paid by any of your prior suppliers and separately stated and collected from you by the supplier from whom you purchased. On sales to the United States or any agency thereof, or to the State of New Jersey or any political subdivision thereof, you need not state this tax separately.

(i) *Adjustable pricing*. You may not make a price adjustable to a maximum price which will be in effect at some time after delivery of the anthracite has been completed; but the price may be adjustable to the maximum price in effect at the time of delivery.

(j) *Petitions for amendment*. Any person seeking an amendment of any provision of this order may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, except that the petition shall be filed with the Regional Administrator and acted upon by him.

(k) *Right of amendment or revocation*. The Regional Administrator or the Price Administrator may amend, revoke or rescind this order, or any provision thereof, at any time.

(l) *Applicability of other regulations*. If you are a dealer subject to this order, you are governed by the licensing provisions of Licensing Order 1. Licensing Order 1 provides, in brief, that a license is required of all persons making sales for which maximum prices are established. A license is automatically granted. It is not necessary to apply for the license. The license may be suspended for violations in connection with the sale of any commodity for which maximum prices are established. If your license is suspended, you may not sell any such commodity during the period of suspension.

(m) *Records*. If you are a dealer subject to this order, you shall preserve, keep, and make available for examination by the Office of Price Administration, a record of every sale of anthracite hereunder, showing the date, the name and address of the buyer, if known, the per net ton price charged, and the solid fuel sold. The solid fuel shall be identified in the manner in which it is described in the order. The record shall also state separately each service rendered and the charge made for it.

(n) *Posting of maximum prices; sales slips and receipts*. (1) If you are a dealer subject to this order, you shall post all your maximum prices (as set forth in the applicable schedule or schedules of this order) in your place of business in a manner plainly visible to and understandable by the purchasing public.

(2) If you are a dealer subject to this order, you shall, except for a sale of less than one-half ton, give each purchaser a sales slip or receipt showing your name and address, the kind, size, and quantity of the anthracite sold to him, the date of the sale or delivery and the price charged, separately stating the amount, if any, of the required discounts which must be deducted from, and the authorized service charges and the taxes, which may be added to the specific maximum prices prescribed herein.

In the case of all other sales, you shall give each purchaser a sales slip or receipt containing the information described in the foregoing paragraph, if requested by such purchaser or if, during December 1941, you customarily gave purchasers such sales slips or receipts.

(o) *Enforcement*. (1) Persons violating any provision of this order are subject to civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violation of this order are urged to communicate with the Newark District Office of the Office of Price Administration, or with the Price Panel of the appropriate War Price and Rationing Board.

"Direct delivery" in 100 lb. lots shall mean depositing in buyer's bin or other storage space designated by buyer.

(7) "Carry" and "wheel" refer to the movement of coal to buyer's bin or storage space in baskets or other containers, or by wheelbarrow or barrel, from seller's truck or vehicle, or from the point nearest and most accessible to the buyer's bin or storage space at which the coal is discharged from the seller's truck in the course of "direct delivery".

(8) "Yard sales" means sales accompanied by physical transfer to the buyer's truck or vehicle at the yard, dock, barge, car, or at a place of business of the seller other than at seller's truck or vehicle.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 59-13]

STANDARD POWER AND LIGHT CORPORATION MEMORANDUM OPINION AND ORDER GRANTING APPLICATION FOR EXTENSION OF TIME¹

At a regular session of the Securities and Exchange Commission held in its office in the City of Philadelphia, Pa. on the 23d day of March 1944.

Integration of holding company system. Extension of time pursuant to section 11 (c) of the act.

Application of a registered holding company filed pursuant to section 11 (c)

of the act for an extension of time of an additional period of six months from December 19, 1943, within which to comply with the Commission's liquidation order of June 19, 1942 issued pursuant to section 11 (b) (2) granted, the Commission finding that present conditions have not materially changed from those existing on June 19, 1943, the time the Commission granted applicant's first application for an extension of time and that applicant has been unable in the exercise of due diligence to comply with the order and that the extension is necessary and appropriate in the public interest and for the protection of investors.

Standard Power and Light Corporation (Standard Power), a registered holding company, has filed an application with the Commission, pursuant to section 11 (c) ¹ of the Public Utility Holding Company Act of 1935 requesting an extension of time of six months from December 19, 1943, within which to comply with the provisions of an order² issued by the Commission on June 19, 1942. Said order was entered pursuant to section 11 (b) (2) of the act and directed Standard Power, within one year of the date of said order, to liquidate and terminate its existence, and to proceed with due diligence to file a plan for its prompt liquidation and the termination of its existence.

After appropriate notice a public hearing was held and the Commission, having considered the record, now makes its findings and opinion.

Previously, on May 22, 1943, Standard Power not having complied with our liquidating order, filed an application requesting an extension of time of one year within which to comply with said order. Standard Power in its first application assigned two primary reasons for non-compliance with our order of June 19, 1942. The first was the undetermined liability on its 6% Gold Debentures, due February 1, 1957, in the aggregate principal amount of \$14,997,700 which were assumed by Standard Gas and Electric Company in 1930.³ The second

¹ Section 11 (c) of the act provides as follows:

Any order under subsection (b) shall be complied with within one year from the date of such order; but the Commission shall, upon a showing (made before or after the entry of such order) that the applicant has been or will be unable in the exercise of due diligence to comply with such order within such time, extend such time for an additional period not exceeding one year if it finds such extension necessary or appropriate in the public interest or for the protection of investors or consumers.

² Standard Power and Light Corporation, Holding Company Act Release No. 3607 (1942) — SEC —

³ On March 24, 1943, Standard Gas and Electric Company filed a plan for its recapitalization (File No. 54-72) pursuant to section 11 (e) of said act with this Commission and proceedings with respect thereto are still pending. Said plan provides that one-half of the aggregate principal amount of all notes and debentures of Standard Gas and Electric Company, including the debentures of Standard Power assumed by Standard Gas and Electric Company, will be paid in cash and that the remainder of such principal amount will be discharged by the delivery to the holders of said notes and debentures of shares of common stock of The California Oregon

ond was the pendency of the litigation instituted against it and others in December 1941, by Daniel O. Hastings, as Special Trustee of Standard Gas and Electric Company, in the Court of Chancery of the State of Delaware for New Castle County. In this litigation, the plaintiff seeks judgment decreeing that the defendants illegally received and dealt with property of Standard Gas and Electric Company, which property is held in trust for the last mentioned company and for the plaintiff, as Special Trustee, and plaintiff also demands an accounting and other equitable relief. On June 19, 1942,* after hearing, we granted Standard Power's application but only to the extent that it would be allowed a period of six months from June 19, 1943, within which to comply with our order of June 19, 1942.

The reasons assigned for an extension in the present application are the same as those assigned in the previous application for an extension of time. The record indicates that conditions have not materially changed since the hearing upon Standard Power's first application.

We therefore find that the applicant has been unable in the exercise of due diligence to comply with our order of June 19, 1942, within the additional period of six months' time granted applicant by our order of June 19, 1943, and that it is now necessary and appropriate in the public interest and for the protection of investors and consumers to grant applicant a further extension of time for a period of six months within which to comply with our order of June 19, 1942.

It is therefore ordered, That Standard Power and Light Corporation be and it is hereby granted an additional period of six months from December 19, 1943, within which to comply with our order of June 19, 1942.

By the Commission (Commissioners Healy, O'Brien, Pike, and McConnaughey), Chairman Purcell being absent and not participating.

UNITED GAS CORP., ET AL.

NOTICE OF FILING OF AMENDMENT TO JOINT DECLARATION IN CONSOLIDATED PROCEED- INGS AND NOTICE OF AND ORDER FOR HEAR- ING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania, on the 25th day of March, A. D., 1944.

In the matters of United Gas Corporation, United Gas Pipe Line Company, Houston Gulf Gas Company, File No. 70-314; Electric Bond and Share Company, File No. 70-315; and Electric Bond and Share Company, Electric Power & Light Corporation, United Gas Corporation, Houston Gas Securities Company, United Gas Pipe Line Company, Houston Gulf Gas Company, File No. 59-21;

The Commission having on March 6, 1944 issued its notice of filing and order for consolidation and hearing (Holding Company Act Release No. 4926) with respect to a plan filed pursuant to section 11 (e) by Electric Bond and Share Company ("Bond and Share"), a registered holding company, Electric Power & Light Corporation ("Electric"), a subsidiary of Bond and Share and likewise a registered holding company, and United Gas Corporation ("United"), a subsidiary of Electric, the stated purposes of which are to effectuate compliance with section 11 (b) (2) of the act through the conversion of United's present capital structure into a capital structure consisting only of par value common stock and mortgage debt; the simplification of the capital structure of United and the consequent simplification of the holding company system of Electric; the fair and equitable distribution of voting power among the security holders of United; and the compromise, settlement and discharge of the various claims, defenses and counter claims among Bond and Share, United, Electric and their respective security holders; and said notice and order having directed the consolidation, for purposes of consideration by the Commission, of the proceedings with respect to said plan with a previously consolidated proceeding in-

volving, among other things, a joint declaration filed by United and certain of its subsidiary companies for approval of a series of transactions incident to the refinancing of United (File No. 70-314); and said plan being stated to be contingent upon the issuance and sale by United of \$100,000,000 principal amount of First Mortgage and Collateral Trust Bonds pursuant to an anticipated amendment to its above-described previous filing designated File No. 70-314:

Notice is hereby given that the above-described amendment to the joint declaration designated File No. 70-314 has been filed pursuant to the applicable provisions of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder by United and its subsidiary, United Gas Pipe Line Company ("Pipe Line"). All interested persons are referred to said amendment which is on file in the office of this Commission for a statement of the transactions therein proposed which are summarized as follows:

(1) United proposes to issue and sell \$100,000,000 principal amount of its First Mortgage and Collateral Trust Bonds, Series due 1961. The proceeds from the sale of the bonds, together with such treasury funds as may be necessary, will be applied as follows:

(a) To redeem 432,512 shares of \$7 preferred stock of United held by the public at \$110 per share plus the amount of dividend arrearages thereon (which as of April 1, 1944, will amount to \$10.45% per share).

(b) To purchase from Electric for \$44,000,000 in cash, \$44,000,000 stated value (440,000 shares) of \$7 second preferred stock of United in connection with which purchase Electric will transfer to United the right of Electric to accumulated and unpaid dividends on such stock.

(c) To redeem \$3,460,000 principal amount of publicly held 5% Collateral Trust Gold Bonds of Houston Gas Securities Company due March 1, 1952, assumed by United.

(2) Pipe Line proposes to issue and sell \$23,000,000 principal amount of its First Mortgage Bonds 4% Series due 1961, all of which will be issued to United in exchange for a like principal amount of Pipe Line's 6% Debentures due March 1, 1952, now owned by United which debentures will be cancelled.

The \$23,000,000 principal amount of Pipe Line Bonds will be pledged under United's mortgage together with the following securities of Pipe Line and other subsidiaries of United: 100,000 shares of the capital stock (100%) of Pipe Line; 50,000 shares of the capital stock (100%) of Union Producing Company, \$40,000,000 principal amount of 6% Debentures due March 1, 1952, of United Producing Company, 5,000 shares of the capital stock (100%) of United Oil Pipe Line Company; and 53,094 shares of the capital stock (99.9%) of Compania Mexicana de Gas, S. A. The Amendment contemplates that the assets of Houston Gulf Gas Company, a subsidiary of Pipe Line, will be acquired by Pipe Line by merger, or by the liquidation or dissolution of Houston Gulf Gas Company.

The filing states that it is the belief of United that its proposed financing described above is exempt from the provisions of Rule U-50 by virtue of the fact that its original joint application in connection therewith was filed with the Commission prior to the effective date of such Rule. However, in the event that it should be determined by the Commission that such an exemption does not apply, United requests exemption from the competitive bidding requirements of Rule U-50 with respect to the issuance and sale of its bonds.

Hearings on the joint declaration described above and designated File No. 70-314 having been held at various dates and the record having been closed on September 21, 1943; and

United and Pipe Line having requested that the record in the said proceedings designated File No. 70-314 be reopened to consider the above-described amendment to said joint declaration; and

The Commission finding such request is reasonable and that the granting thereof will not be detrimental to the public interest or the interest of investors or consumers:

It is ordered, That the record in the proceedings designated File No. 70-314 be reopened for the purpose of considering the amendment hereinbefore described.

It is further ordered, That a hearing be held on the joint declaration as amended in connection with the hearing to be held on the section 11 (e) plan, with which by reason of previous orders of the Commission it is consolidated, which has been set for hearing on April 4, 1944, before William W. Swift or any other officer or officers of the Commission designated by it for that purpose. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission in the manner provided by Rule XVII of the rules of practice of the Commission on or before April 1, 1944.

It is further ordered, That, without limiting the scope of the issues presented by said joint application as amended, particular attention will be directed at the hearings to the following matters and questions in addition to those stated in the notice and order of this Commission referred to above dated March 6, 1944:

(1) Whether the issuance and sale of bonds of United should be exempted from the competitive bidding requirements of Rule U-50.

(2) Whether the securities proposed to be issued by United and Pipe Line are securities of a type authorized to be issued under the provisions of section 7 (c) of the act.

(3) Whether the securities proposed to be issued by United and Pipe Line are reasonably adapted to their security structures and earning power and to the security structure of the other companies in the same holding company systems.

(4) Whether the proposed issuance and sale of securities by United and Pipe Line are necessary and appropriate to the economical and efficient op-

eration of the business or businesses in which they are engaged or have an interest.

(5) Whether any of the terms and conditions of the securities proposed to be issued by United and Pipe Line are detrimental to the public interest or the interests of investors or consumers.

(6) Whether the proposed acquisition by United of the proposed bonds of Pipe Line is in conformity with the standards of section 10 of the act.

(7) Whether the fees and expenses proposed to be paid are for necessary services and are reasonable in amount.

(8) Whether the accounting entries in connection with the proposed transactions are in conformity with the standards of the act and the rules promulgated thereunder.

(9) Whether if the transactions proposed are authorized by the Commission it is appropriate in the public interest or in the interest of investors or consumers that any terms or conditions be imposed in connection with such authorization and if so what such terms and conditions should be.

By the Commission.

Dowling, James V. Gilloon, Jr., Joseph A. Shields, trustees under Pension Trust Agreement dated December 14, 1937, as amended, File No. 70-746.

The purpose of the agreement is to define the rights, duties, liabilities, and accountability of the Welfare Trustee, the present trustee being Noel T. Dowling. Uesco is to transfer to the Welfare Trustee all of its remaining assets. Within a reasonable time, after the receipt of the Uesco assets, the Welfare Trustee is to establish a separate account for each distributee company entitled to distribution of Uesco welfare assets and allocate to the account of such company its aliquot portion of the assets. Each distributee company is to be entitled to receive from the Welfare Trustee its portion upon the establishment by such distributee company of employee pension, insurance, or welfare programs as specified in the original settlement agreement of June 4, 1943. The Welfare Trustee is not, however, required to deliver to the company its portion, unless he is satisfied that such company has duly complied with all the conditions to be performed by it. It appearing to the Commission that the terms and conditions of the Welfare Trust Agreement are appropriate to effectuate the plan of liquidation heretofore approved;

It is hereby ordered, That jurisdiction be, and hereby is, released over the terms and conditions of the Welfare Trust Agreement, and that said terms and conditions be and hereby are approved; subject, however, to the terms and conditions of Rule U-24 of the general rules and regulations promulgated pursuant to the Public Utility Holding Company Act and subject further to the following condition that, on or before February 1, 1945, and each year thereafter as long as the Welfare Trust Agreement shall be operative, the Welfare Trustee shall file with the Commission a report for the prior calendar year setting forth in appropriate detail the results of operations and the financial condition of the Welfare Trust, and that within sixty days of the termination of said Welfare Trust, the Welfare Trustee shall file with the Commission a notification of said termination, together with a final report covering the period from the beginning of the calendar year to the date of said termination.

SELECTIVE SERVICE SYSTEM.

[Operations Order 26-A]

REGISTRANTS IN VIRGIN ISLANDS

ASSIGNMENT OF SERIAL AND ORDER NUMBERS

Pursuant to authority contained in the Selective Training and Service Act of 1940, as amended, I hereby order:

The order of the Director, Operations Order No. 26, is hereby amended in the following particulars:

1. The initial paragraph and subparagraph (a) under numerical paragraph 3 are deleted and the following substituted therefor:

3. The local board shall assign serial numbers and order numbers to registrants for whom it receives or completes a Registration Card on or before March 31, 1944, in the following manner:

(a) After the local board has transcribed from the Registration Card Form 1-F to a white Registration Card (Form 1) all of the information needed to complete the white Registration Card (Form 1) as provided in § 618.11 of the Selective Service Regulations, it shall place all of such Registration Cards (Form 1) together. On April 1, 1944, the local board shall thoroughly shuffle or mix such Registration Cards (Form 1) so that the location of any card in the pile—and the

number it later receives—will be purely a matter of chance.

2. Subparagraph (i) (1) under numerical paragraph 3 is deleted and the following substituted therefor:

(i) (1) When the local board has completed the actions provided for above, it shall on April 1, 1944, assign each registrant an order number by use of the National Master List—First Drawing, October 29-30, 1940 (Form 169). The greatest care must be used in the assignment of order numbers because the order numbers establish the order in which the registrants will be considered for selection for service. The registrant whose serial number appears at the top, or nearest the top of the National Master List shall get Order Number 1. The registrant whose serial number is next closest to the top of the National Master List shall get Order Number 2. The registrant whose serial number is third closest to the top of the list shall get Order Number 3, and so on until each registrant has an order number. Order numbers must be assigned in sequence; no order number shall be skipped. Serial numbers on the National Master List which are not held by any registrant of the particular local board are simply crossed off the National Master List and ignored. It is suggested that the local board shall as its first step in the assignment of order numbers mark the order numbers opposite the applicable serial numbers on the National Master List.

3. Numerical paragraph 4 and subparagraphs (a) and (b) thereunder are deleted and the following substituted therefor:

4. The local board shall assign serial numbers and order numbers to registrants for whom it receives or completes a Registration Card on and after April 1, 1944, in the following manner:

(a) After the local board has transcribed from the Registration Card (Form 1-F) to a white Registration Card (Form 1) all of the information needed to complete the white Registration Card (Form 1) as provided in § 618.11 of the Selective Service Regulations, it shall then place the smallest unassigned serial number upon such Registration Card (Form 1).

(b) The local board shall then find from the National Master List—First Drawing, October 29-30, 1940 (Form 169) what the registrant's order number would have been if his Registration Card (Form 1) had been completed prior to April 1, 1944. The local board shall then assign such registrant the order number which precedes the order number which would have been assigned to him had his Registration Card (Form 1) been completed prior to April 1, 1944, and shall add a letter to it. For example: If his order number would have been 84 had his card been completed prior to April 1, 1944, the local board will assign him Order No. 83-A."
